# Grade 7 - Khan Primary Curriculum: Gap Answer Keys

Khan Academy is the primary source for Math and core ELA. Use its named units in course order within the calendar pacing. Grade 7 Science and early World History use appropriate Khan unit selections with required gap materials. Grade 4 Science, Mississippi/regional studies, Spanish, composition, and hands-on work require the listed gap curriculum. Friday weeks 1-3: Khan quiz or teacher-assigned exercise checks plus the printable gap quiz. Friday week 4: completed-unit Khan tests plus comprehensive printable gap assessment. Record first-attempt scores before retakes; keep Khan mastery progress separately. Assign these items in the existing Khan teacher accounts; links on VenvLearning do not create assignments or sync scores. Advance only after sufficient practice; unfinished units carry forward. Printed original assessment books are archived and no longer the current sequence.

# Grade 7 · Module 1 Week 1 Friday gap quiz - TEACHER ANSWER KEY

Scheduled: 2026-10-16 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 7.RP.1-2 | ELA: RL.7.1-10; RI.7.1-10; W.7.1-9; L.7.1-6; SL.7.1-6 (grade-level coverage; module skill targets below) | Science: L.7.3 | Social Studies: MS CCRS SS Grade 7 Early World History - prehistory/Mesopotamia | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

## Writing and conventions · required gap check - 8 points

Score: _____ / 8

A Pond Study

A class studied a small pond near its school. Students recorded water temperature, counted visible organisms from the bank, and drew a model of a food web. Because the first visit happened after rain, they wondered whether that single visit represented typical conditions. They returned at the same time of day during three later weeks. Their records were not identical. One student wanted to erase the unusual measurements, but her partner argued that differences could be useful evidence. The group kept the records and described the limits of its method: it had observed only one pond and had not counted organisms beneath the water. Their report distinguished observations from explanations. "We saw fewer insects" was an observation; "the cooler temperature caused the change" was a hypothesis that needed further testing. The study taught the class that careful questions are as important as confident conclusions.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

# Science - 10 points

Score: _____ / 10

W1 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 9 distinct species observed; Trial B: 15 distinct species observed. These are invented assessment data, not a claim about a real investigation.

1. How does carbon move from atmosphere into living plants? (1 point)

Answer / scoring: Photosynthesis incorporates carbon dioxide into organic molecules.

2. Why is the water cycle a cycle rather than a one-way path? (1 point)

Answer / scoring: Water moves among reservoirs through repeated processes.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 6 distinct species observed.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 15 versus 9 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Model water and carbon movement in an ecosystem. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct reservoirs, processes, and arrows; distinguish movement of matter from energy flow.

# Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Hola. Me llamo Ana. ¿Cómo te llamas?
Word bank: hola, adiós, gracias, por favor, buenos días, hasta luego.

1. Translate into English: hola. (1 point)

Answer / scoring: hello

2. Translate into Spanish: goodbye. (1 point)

Answer / scoring: adiós; accept appropriate article/gender variants when meaning is correct.

3. Complete: Me ___ Ana. (My name is Ana.) (1 point)

Answer / scoring: llamo

4. Oral task (teacher listens): Use 3 short statements or a 3-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Hola. Me llamo Ana. ¿Cómo te llamas? Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.

# Social Studies - 10 points

Score: _____ / 10

W2 background: It supported more permanent settlements and changed work, resources, and social organization. No; crops, environments, timing, and choices varied. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How did agriculture change some human communities? (1 point)

Answer / scoring: It supported more permanent settlements and changed work, resources, and social organization.

2. Was adopting agriculture an identical process everywhere? (1 point)

Answer / scoring: No; crops, environments, timing, and choices varied.

3. Use W2 background. Identify one claim that could be checked against a map, document, or other reliable source. (1 point)

Answer / scoring: It supported more permanent settlements and changed work, resources, and social organization. OR No; crops, environments, timing, and choices varied.; accept a checkable claim accurately drawn from the note.

4. Use W2 background. Explain how two ideas in the note connect. (2 points)

Answer / scoring: Accept a logical relationship using accurate details from both statements; do not require one exact interpretation.

5. Name one kind of source that could help check the background note and explain why. (2 points)

Answer / scoring: A relevant map, scholarly/educator text, community source, historical document, or data record; source must match the claim. One point for suitable source and one for purpose.

6. Compare foraging and early farming. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Food production, movement/settlement, benefits, costs, and recognition of variation.

# Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Mi nombre se escribe A-N-A.
Word bank: a, e, i, o, u, ñ.

1. Write the first five letters of the Spanish alphabet. (1 point)

Answer / scoring: a, b, c, d, e

2. What is the name of the Spanish letter ñ? (1 point)

Answer / scoring: eñe

3. Write the Spanish letter n with a tilde. (1 point)

Answer / scoring: ñ

4. Oral task (teacher listens): Use 3 short statements or a 3-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Mi nombre se escribe A-N-A. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.

Score: _____ / 10

W3 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 11 distinct species observed; Trial B: 17 distinct species observed. These are invented assessment data, not a claim about a real investigation.

1. What is the role of photosynthesis in an ecosystem? (1 point)

Answer / scoring: Use light energy to make organic molecules from carbon dioxide and water.

2. What does cellular respiration do? (1 point)

Answer / scoring: Release usable energy from organic molecules; aerobic respiration uses oxygen.

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 6 distinct species observed.

4. Use W3 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 17 versus 11 in A; accept an accurate description without an unsupported causal claim.

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Compare photosynthesis with aerobic cellular respiration. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct inputs/outputs and energy roles; do not say matter or energy is created from nothing.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Answer / scoring: 4-point rubric: two appropriate module skills identified (2), two accurate applications explained (2). Check against the module's listed learning goals.

# Science - 28 points

Score: _____ / 28

W1 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 9 distinct species observed; Trial B: 15 distinct species observed. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 10 distinct species observed; Trial B: 16 distinct species observed. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 11 distinct species observed; Trial B: 17 distinct species observed. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 12 distinct species observed; Trial B: 18 distinct species observed. These are invented assessment data, not a claim about a real investigation.

1. Why is the water cycle a cycle rather than a one-way path? (1 point)

Answer / scoring: Water moves among reservoirs through repeated processes.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 6 distinct species observed.

3. Model water and carbon movement in an ecosystem. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct reservoirs, processes, and arrows; distinguish movement of matter from energy flow.

4. How do photosynthesis and respiration relate to oxygen? (1 point)

Answer / scoring: Photosynthesis releases oxygen; many organisms use oxygen in cellular respiration.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 6 distinct species observed.

6. Model a nitrogen or oxygen cycle. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Relevant reservoirs and correct processes; arrows show repeated matter movement.

7. What does cellular respiration do? (1 point)

Answer / scoring: Release usable energy from organic molecules; aerobic respiration uses oxygen.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 6 distinct species observed.

9. Compare photosynthesis with aerobic cellular respiration. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct inputs/outputs and energy roles; do not say matter or energy is created from nothing.

10. What is an ecosystem service? (1 point)

Answer / scoring: A benefit people receive from ecosystems, such as pollination or water regulation.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 6 distinct species observed.

12. Model a food web and a possible effect of losing one species. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). At least four organisms with correct energy-flow arrows and a plausible cascade/alternative pathway.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

# Social Studies - 24 points

Score: _____ / 24

W1 background: The period before written records for a society; it does not mean people lacked history. Resources, climate, population, opportunities, and other pressures could influence movement. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: It supported more permanent settlements and changed work, resources, and social organization. No; crops, environments, timing, and choices varied. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: They supported water access, irrigation, transport, and fertile lands while posing flood risks. Specialized work, institutions, networks, writing in some societies, or organized infrastructure. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: A writing system using wedge-shaped marks, associated with ancient Mesopotamia. They show rules/ideals and authority, but not necessarily how every case was handled. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What does prehistory mean? (1 point)

Answer / scoring: The period before written records for a society; it does not mean people lacked history.

2. Why might early humans migrate? (1 point)

Answer / scoring: Resources, climate, population, opportunities, and other pressures could influence movement.

3. Model an early migration question. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Route, possible motivations, archaeological evidence, and uncertainty; avoid one cause for all migrations.

4. How did agriculture change some human communities? (1 point)

Answer / scoring: It supported more permanent settlements and changed work, resources, and social organization.

5. Was adopting agriculture an identical process everywhere? (1 point)

Answer / scoring: No; crops, environments, timing, and choices varied.

6. Compare foraging and early farming. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Food production, movement/settlement, benefits, costs, and recognition of variation.

7. Why were the Tigris and Euphrates important in Mesopotamia? (1 point)

Answer / scoring: They supported water access, irrigation, transport, and fertile lands while posing flood risks.

8. What is one feature of an early city/civilization? (1 point)

Answer / scoring: Specialized work, institutions, networks, writing in some societies, or organized infrastructure.

9. Model river, agriculture, and city development. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Correct connections plus one benefit and one challenge; avoid saying rivers automatically create states.

10. What is cuneiform? (1 point)

Answer / scoring: A writing system using wedge-shaped marks, associated with ancient Mesopotamia.

11. Why are written laws useful historical evidence? (1 point)

Answer / scoring: They show rules/ideals and authority, but not necessarily how every case was handled.

12. Compare a law text with evidence of everyday life. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Different evidence types, each source's limits, and one question for corroboration.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

# Spanish - 12 points

Score: _____ / 12

Spanish model and vocabulary (cue support allowed)

Yo soy estudiante. Ella tiene un libro.
Word bank: yo, tú, él, ella, nosotros, ellos.

1. Week 1: Complete: Me ___ Ana. (My name is Ana.) (1 point)

Answer / scoring: llamo

2. Week 2: Write the Spanish letter n with a tilde. (1 point)

Answer / scoring: ñ

3. Week 3: Write 42 in Spanish. (1 point)

Answer / scoring: cuarenta y dos

4. Week 4: Translate we into Spanish. (1 point)

Answer / scoring: nosotros / nosotras

5. Read the supplied Spanish model. Give its meaning in English. (2 points)

Answer / scoring: I am a student. She has a book.

6. Write one new correct sentence using vocabulary from this module. (2 points)

Answer / scoring: One point for relevant vocabulary; one for a meaningful correct sentence. Accept varied answers.

7. Oral task (teacher listens): Use 6-8 short statements or a 6-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Yo soy estudiante. Ella tiene un libro. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.

# Grade 7 · Module 2 Week 1 Friday gap quiz - TEACHER ANSWER KEY

Should the School Reduce Plastic?

The student council proposed replacing some single-use lunch packaging with reusable containers. Its argument began with a clear claim: the school should run a four-week trial before making a permanent purchase. The council's fictional classroom survey found that 72 of 120 respondents supported the trial. A second source, a cafeteria cost table, estimated that washing reusable containers would require additional time. Supporters argued that the trial could measure both waste and labor instead of assuming that one benefit settled the whole question. Critics worried about lost containers and unequal access to supplies. The proposal responded by lending containers during the trial and counting losses. The council did not claim that a survey proved the policy would work. It used the survey to show interest and proposed collecting direct evidence of costs and waste.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

# Science - 10 points

Score: _____ / 10

W1 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 9 distinct species observed; Trial B: 15 distinct species observed. These are invented assessment data, not a claim about a real investigation.

1. How can burning fossil fuels affect carbon cycling? (1 point)

Answer / scoring: It transfers stored carbon to the atmosphere as carbon dioxide.

2. Why can excess nutrient runoff affect an ecosystem? (1 point)

Answer / scoring: It can alter growth and water conditions, including oxygen availability.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 6 distinct species observed.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 15 versus 9 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Model one human impact on a cycle. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Activity, affected reservoir/process, likely consequence, and uncertainty/other influences.

# Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Hoy es lunes. Estamos en octubre.
Word bank: lunes, martes, viernes, enero, octubre, mes.

1. Translate into English: lunes. (1 point)

Answer / scoring: Monday

2. Translate into Spanish: Tuesday. (1 point)

Answer / scoring: martes; accept appropriate article/gender variants when meaning is correct.

3. Complete: Hoy es ___ . (Today is Friday.) (1 point)

Answer / scoring: viernes

4. Oral task (teacher listens): Use 3 short statements or a 3-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Hoy es lunes. Estamos en octubre. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.

# Grade 7 · Module 2 Week 2 Friday gap quiz - TEACHER ANSWER KEY

Scheduled: 2026-11-20 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 7.RP.1-3 | ELA: RL.7.1-10; RI.7.1-10; W.7.1-9; L.7.1-6; SL.7.1-6 (grade-level coverage; module skill targets below) | Science: L.7.3.1-5 | Social Studies: MS CCRS SS 7.2-7.3 and related early-civilization standards | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Score: _____ / 8

Should the School Reduce Plastic?

The student council proposed replacing some single-use lunch packaging with reusable containers. Its argument began with a clear claim: the school should run a four-week trial before making a permanent purchase. The council's fictional classroom survey found that 72 of 120 respondents supported the trial. A second source, a cafeteria cost table, estimated that washing reusable containers would require additional time. Supporters argued that the trial could measure both waste and labor instead of assuming that one benefit settled the whole question. Critics worried about lost containers and unequal access to supplies. The proposal responded by lending containers during the trial and counting losses. The council did not claim that a survey proved the policy would work. It used the survey to show interest and proposed collecting direct evidence of costs and waste.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

W1 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 9 distinct species observed; Trial B: 15 distinct species observed. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 10 distinct species observed; Trial B: 16 distinct species observed. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 11 distinct species observed; Trial B: 17 distinct species observed. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 12 distinct species observed; Trial B: 18 distinct species observed. These are invented assessment data, not a claim about a real investigation.

1. Why can excess nutrient runoff affect an ecosystem? (1 point)

Answer / scoring: It can alter growth and water conditions, including oxygen availability.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 6 distinct species observed.

3. Model one human impact on a cycle. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Activity, affected reservoir/process, likely consequence, and uncertainty/other influences.

4. Why is not every introduced species called invasive? (1 point)

Answer / scoring: Invasive implies establishment/spread with harmful impacts; introduction alone is not enough.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 6 distinct species observed.

6. Compare two explanations for a biodiversity change. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Two plausible mechanisms and evidence that would distinguish them.

7. Why consider unintended consequences? (1 point)

Answer / scoring: A solution may shift impacts to another part of a system.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 6 distinct species observed.

9. Evaluate an ecosystem solution. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Problem, expected benefit, cost/constraint, evidence measure, and possible unintended effect.

10. Does a correlation by itself establish causation? (1 point)

Answer / scoring: No; other variables or chance may explain the association.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 6 distinct species observed.

12. Outline an ecology data report. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Question, method, labeled data, interpretation, limitation, and next test.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

# Social Studies - 24 points

Score: _____ / 24

W1 background: Water, farming, transport, and settlement patterns were tied to the river. Images/objects can reveal beliefs, roles, materials, and purposes when interpreted in context. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Evidence of urban organization and infrastructure, though not a complete account of government. Evidence is incomplete; undeciphered or limited records restrict conclusions. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Water, agriculture, travel, and settlement were linked to river valleys. Different places, dynasties, periods, and communities changed over time. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Understand similar environmental opportunities and different social responses. People developed different institutions, beliefs, and choices. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Why was the Nile important to ancient Egypt? (1 point)

Answer / scoring: Water, farming, transport, and settlement patterns were tied to the river.

2. How can art provide historical evidence? (1 point)

Answer / scoring: Images/objects can reveal beliefs, roles, materials, and purposes when interpreted in context.

3. Use an Egyptian object as historical evidence. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Describe observable features, context, interpretation, and one limitation/question.

4. What can planned streets or drains show about Indus cities? (1 point)

Answer / scoring: Evidence of urban organization and infrastructure, though not a complete account of government.

5. Why are interpretations of an ancient society sometimes uncertain? (1 point)

Answer / scoring: Evidence is incomplete; undeciphered or limited records restrict conclusions.

6. Compare an Indus city plan with another river-valley society. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Common geographic/infrastructure criteria, evidence, and limits.

7. How did rivers support some early Chinese societies? (1 point)

Answer / scoring: Water, agriculture, travel, and settlement were linked to river valleys.

8. Why should ancient China not be treated as one unchanging society? (1 point)

Answer / scoring: Different places, dynasties, periods, and communities changed over time.

9. Create a river-valley comparison involving early China. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Geography, agriculture, institutions/evidence, and an explicit time/place focus.

10. What is a common reason to compare river-valley civilizations? (1 point)

Answer / scoring: Understand similar environmental opportunities and different social responses.

11. Why is a shared river setting not proof of identical cultures? (1 point)

Answer / scoring: People developed different institutions, beliefs, and choices.

12. Compare two river-valley societies. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Same criteria, two similarities/differences, and one limitation of the comparison.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

## Writing and conventions · required gap check - 8 points

Score: _____ / 8

Arachne: an Original Retelling

This original retelling draws on the traditional myth. Arachne was a talented weaver who took great pride in her work. When people praised her skill, she insisted that no teacher or goddess deserved any credit. Athena, associated with wisdom and crafts, approached in disguise and advised her to speak with humility. Arachne dismissed the advice and demanded a contest. The two wove remarkable pictures, but their conflict involved more than technical skill: Arachne's attitude challenged the goddess's authority. In the traditional ending, Athena transformed Arachne into a spider, forever connected with weaving. Readers can admire Arachne's ability while questioning her boastfulness and the severity of the punishment. The story invites discussion of pride, power, artistic skill, and the consequences of refusing advice. A theme is a reasoned interpretation, not simply the name of a topic.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

# Science - 10 points

Score: _____ / 10

W1 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 21 temperature in degrees C; Trial B: 29 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. What distinguishes a solid from a liquid in a simple particle model? (1 point)

Answer / scoring: Solid particles maintain positions relative to neighbors; liquid particles move past one another.

2. Is melting usually a physical or chemical change? (1 point)

Answer / scoring: Physical; the substance's identity remains the same.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 29 versus 21 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draw particle models for solid, liquid, and gas. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct relative spacing/movement and the same particle identity for phase changes.

W2 background: Belief in multiple gods. They can reveal beliefs, values, conflicts, and storytelling traditions. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What does polytheism mean? (1 point)

Answer / scoring: Belief in multiple gods.

2. Why study myths as cultural evidence rather than scientific accounts? (1 point)

Answer / scoring: They can reveal beliefs, values, conflicts, and storytelling traditions.

3. Use W2 background. Identify one claim that could be checked against a map, document, or other reliable source. (1 point)

Answer / scoring: Belief in multiple gods. OR They can reveal beliefs, values, conflicts, and storytelling traditions.; accept a checkable claim accurately drawn from the note.

4. Use W2 background. Explain how two ideas in the note connect. (2 points)

Answer / scoring: Accept a logical relationship using accurate details from both statements; do not require one exact interpretation.

5. Name one kind of source that could help check the background note and explain why. (2 points)

Answer / scoring: A relevant map, scholarly/educator text, community source, historical document, or data record; source must match the claim. One point for suitable source and one for purpose.

6. Analyze a myth's cultural role. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Identify belief/value, text evidence, interpretation, and limits of generalizing from one story.

# Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Mi hermana es alta y amable.
Word bank: alto, bajo, amable, inteligente, joven, pequeño.

1. Translate into English: alto. (1 point)

Answer / scoring: tall

2. Translate into Spanish: short in height. (1 point)

Answer / scoring: bajo; accept appropriate article/gender variants when meaning is correct.

3. Complete for a girl: Ella es ___ . (tall) (1 point)

Answer / scoring: alta

4. Oral task (teacher listens): Use 3 short statements or a 3-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Mi hermana es alta y amable. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.

# Grade 7 · Module 3 Week 3 Friday gap quiz - TEACHER ANSWER KEY

Scheduled: 2027-01-15 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 7.NS.1 | ELA: RL.7.1-10; RI.7.1-10; W.7.1-9; L.7.1-6; SL.7.1-6 (grade-level coverage; module skill targets below) | Science: P.7.5A-B | Social Studies: 7.4 Ancient Greece | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Score: _____ / 8

Arachne: an Original Retelling

This original retelling draws on the traditional myth. Arachne was a talented weaver who took great pride in her work. When people praised her skill, she insisted that no teacher or goddess deserved any credit. Athena, associated with wisdom and crafts, approached in disguise and advised her to speak with humility. Arachne dismissed the advice and demanded a contest. The two wove remarkable pictures, but their conflict involved more than technical skill: Arachne's attitude challenged the goddess's authority. In the traditional ending, Athena transformed Arachne into a spider, forever connected with weaving. Readers can admire Arachne's ability while questioning her boastfulness and the severity of the punishment. The story invites discussion of pride, power, artistic skill, and the consequences of refusing advice. A theme is a reasoned interpretation, not simply the name of a topic.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

# Science - 10 points

Score: _____ / 10

W3 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 23 temperature in degrees C; Trial B: 31 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. What is evidence that a chemical reaction may occur? (1 point)

Answer / scoring: New substances indicated by gas, precipitate, color/temperature changes; one sign alone may need confirmation.

2. How does chemical change differ from changing state? (1 point)

Answer / scoring: Chemical change changes substance identity; a phase change usually does not.

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

4. Use W3 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 31 versus 23 in A; accept an accurate description without an unsupported causal claim.

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Model particles before and after a reaction. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Atoms are rearranged into new groupings; atom counts are conserved in a closed system.

Score: _____ / 28

W1 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 21 temperature in degrees C; Trial B: 29 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 22 temperature in degrees C; Trial B: 30 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 23 temperature in degrees C; Trial B: 31 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 24 temperature in degrees C; Trial B: 32 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. Is melting usually a physical or chemical change? (1 point)

Answer / scoring: Physical; the substance's identity remains the same.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

3. Draw particle models for solid, liquid, and gas. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct relative spacing/movement and the same particle identity for phase changes.

4. Why can equal-volume objects have different masses? (1 point)

Answer / scoring: They can have different densities/material compositions.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

6. Model a fair comparison of density or solubility. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). State measured quantities, consistent comparison conditions, and a defensible conclusion.

7. How does chemical change differ from changing state? (1 point)

Answer / scoring: Chemical change changes substance identity; a phase change usually does not.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

9. Model particles before and after a reaction. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Atoms are rearranged into new groupings; atom counts are conserved in a closed system.

10. Why can observing bubbles alone be insufficient proof of chemical change? (1 point)

Answer / scoring: Bubbles may come from a physical process such as boiling; context/additional evidence is needed.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

12. Design a comparison of physical and chemical changes. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Two appropriate examples, identity criterion, evidence, and limitations.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

# Social Studies - 24 points

Score: _____ / 24

W1 background: A city-state/community with its own political organization. Mountains could separate communities; seas supported travel/trade. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Belief in multiple gods. They can reveal beliefs, values, conflicts, and storytelling traditions. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Political rights were restricted; women, enslaved people, and many noncitizens were excluded. Rule by a small group. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: They helped connect regions and spread/intermix Greek and other traditions. Reasoned inquiry into knowledge, values, existence, or related questions. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What was a polis in ancient Greece? (1 point)

Answer / scoring: A city-state/community with its own political organization.

2. How could Greek mountains and seas influence connections? (1 point)

Answer / scoring: Mountains could separate communities; seas supported travel/trade.

3. Model Greek geography and city-state connections. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Location/barriers/routes and plausible effects without geographic determinism.

4. What does polytheism mean? (1 point)

Answer / scoring: Belief in multiple gods.

5. Why study myths as cultural evidence rather than scientific accounts? (1 point)

Answer / scoring: They can reveal beliefs, values, conflicts, and storytelling traditions.

6. Analyze a myth's cultural role. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Identify belief/value, text evidence, interpretation, and limits of generalizing from one story.

7. How did Athenian democracy limit participation? (1 point)

Answer / scoring: Political rights were restricted; women, enslaved people, and many noncitizens were excluded.

8. What is an oligarchy? (1 point)

Answer / scoring: Rule by a small group.

9. Compare Athens and Sparta using political/social criteria. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Accurate distinctions, restricted participation acknowledged, and a common comparison framework.

10. How did Alexander's conquests contribute to cultural exchange? (1 point)

Answer / scoring: They helped connect regions and spread/intermix Greek and other traditions.

11. What does philosophy involve? (1 point)

Answer / scoring: Reasoned inquiry into knowledge, values, existence, or related questions.

12. Explain a Hellenistic cultural connection. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Two connected regions/traditions, mechanism of exchange, and evidence; avoid claiming culture moved only one way.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

Score: _____ / 8

The Bridge Apprentice

In this original historical fiction, an apprentice watched an experienced builder inspect a Roman-style stone bridge. The apprentice wanted to remove the wooden supports as soon as the final stone was placed. "A finished appearance is not enough," the builder warned. He checked the arch and explained how its stones pressed against one another and transferred forces toward the supports. The apprentice grew impatient, but a cracked stone changed her mind. Together they replaced it and repeated the inspection. Later, the apprentice wrote that the delay had been the most important part of the work. The scene does not establish facts about a particular ancient builder; it uses an imagined conversation to explore patience and responsibility. Readers should distinguish the fictional characters from historical claims, such as the Romans' use of arches in engineering.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

# Science - 10 points

Score: _____ / 10

W1 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 21 temperature in degrees C; Trial B: 29 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. Why can a precipitate indicate a chemical reaction? (1 point)

Answer / scoring: A new insoluble solid may form from reacting substances.

2. Does a visible change always mean a chemical reaction? (1 point)

Answer / scoring: No; physical changes can also be visible.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 29 versus 21 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Explain how to investigate a possible chemical reaction. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Observe identity-related evidence, compare alternatives, and use multiple observations.

The Bridge Apprentice

In this original historical fiction, an apprentice watched an experienced builder inspect a Roman-style stone bridge. The apprentice wanted to remove the wooden supports as soon as the final stone was placed. "A finished appearance is not enough," the builder warned. He checked the arch and explained how its stones pressed against one another and transferred forces toward the supports. The apprentice grew impatient, but a cracked stone changed her mind. Together they replaced it and repeated the inspection. Later, the apprentice wrote that the delay had been the most important part of the work. The scene does not establish facts about a particular ancient builder; it uses an imagined conversation to explore patience and responsibility. Readers should distinguish the fictional characters from historical claims, such as the Romans' use of arches in engineering.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Answer / scoring: 4-point rubric: two appropriate module skills identified (2), two accurate applications explained (2). Check against the module's listed learning goals.

# Science - 28 points

Score: _____ / 28

W1 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 21 temperature in degrees C; Trial B: 29 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 22 temperature in degrees C; Trial B: 30 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 23 temperature in degrees C; Trial B: 31 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 24 temperature in degrees C; Trial B: 32 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. Does a visible change always mean a chemical reaction? (1 point)

Answer / scoring: No; physical changes can also be visible.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

3. Explain how to investigate a possible chemical reaction. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Observe identity-related evidence, compare alternatives, and use multiple observations.

4. What does an indicator help reveal? (1 point)

Answer / scoring: A property such as pH through a color response; it does not identify every substance uniquely.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

6. Interpret a hypothetical pH chart: A=3, B=7, C=10. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). A acidic, B neutral, C basic; classify without tasting or handling unknowns.

7. Why can a reaction's surroundings change temperature? (1 point)

Answer / scoring: Energy is transferred between the reaction system and surroundings.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

9. Draw an energy-transfer model for each reaction type. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct direction of energy arrows and the appropriate temperature tendency.

10. Why might measured mass fall in an open container? (1 point)

Answer / scoring: A gas or other material may escape beyond the measured boundary.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

12. Model a closed reaction with equal atom counts before and after. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Matching counts for each atom type and a clear system boundary.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

# Social Studies - 24 points

Score: _____ / 24

W1 background: Sea and land routes connected trade, movement, and political control. Stories can express identity but are not automatically factual records. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: They can affect customs, roles, access, and expectations, with variation over time. Elite records may not represent the experience of all people. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: A republic uses institutions of public/representative rule; an empire rules over multiple peoples/territories, often with centralized authority; categories can overlap. Institutions and power changed across periods rather than remaining fixed. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: They supported movement, administration, trade, and water supply. No; interacting political, military, economic, and other factors matter. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How did the Mediterranean location support Rome's connections? (1 point)

Answer / scoring: Sea and land routes connected trade, movement, and political control.

2. Why distinguish founding traditions from historical evidence? (1 point)

Answer / scoring: Stories can express identity but are not automatically factual records.

3. Compare a founding story with material/written evidence. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Genre/purpose distinction, evidence to check, and a qualified conclusion.

4. How can religion and social status shape daily life? (1 point)

Answer / scoring: They can affect customs, roles, access, and expectations, with variation over time.

5. Why compare accounts from different social positions? (1 point)

Answer / scoring: Elite records may not represent the experience of all people.

6. Analyze a Roman daily-life account. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Creator/status/purpose, useful evidence, and missing perspectives.

7. How does a republic differ from an empire as broad political concepts? (1 point)

Answer / scoring: A republic uses institutions of public/representative rule; an empire rules over multiple peoples/territories, often with centralized authority; categories can overlap.

8. Why must Roman political changes be placed on a timeline? (1 point)

Answer / scoring: Institutions and power changed across periods rather than remaining fixed.

9. Compare Roman republican and imperial power. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Roles of institutions/leaders, time/context, limits on participation, and evidence.

10. Why were roads and aqueducts important to Roman power and life? (1 point)

Answer / scoring: They supported movement, administration, trade, and water supply.

11. Can one cause explain the fall of the western Roman Empire fully? (1 point)

Answer / scoring: No; interacting political, military, economic, and other factors matter.

12. Model a Roman legacy and a limitation of a single-cause explanation. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Accurate legacy and at least two interacting factors or competing explanations.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

# Spanish - 12 points

Score: _____ / 12

Spanish model and vocabulary (cue support allowed)

Quiero el menú, por favor.
Word bank: el desayuno, el almuerzo, la cena, quiero, el menú, por favor.

1. Week 1: Translate bread into Spanish. (1 point)

Answer / scoring: pan / el pan

2. Week 2: Complete: Me ___ el arroz. (1 point)

Answer / scoring: gusta

3. Week 3: Translate dinner into Spanish. (1 point)

Answer / scoring: cena / la cena

4. Week 4: Translate dinner into Spanish. (1 point)

Answer / scoring: cena / la cena

5. Read the supplied Spanish model. Give its meaning in English. (2 points)

Answer / scoring: I want the menu, please.

6. Write one new correct sentence using vocabulary from this module. (2 points)

Answer / scoring: One point for relevant vocabulary; one for a meaningful correct sentence. Accept varied answers.

7. Oral task (teacher listens): Use 6-8 short statements or a 6-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Quiero el menú, por favor. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.

# Grade 7 · Module 5 Week 1 Friday gap quiz - TEACHER ANSWER KEY

## Writing and conventions · required gap check - 8 points

Score: _____ / 8

Two Sources for a Forecast

Fictional classroom sources: Source A, "Weather Log," by a student team, dated March 8, records local temperature, wind direction, and pressure at noon for five days. Source B, an unsigned advertisement dated March 8, says that one device "always predicts weather perfectly" but gives no measurements. A research group prefers Source A for describing what was actually observed. It still checks the team's instruments and method, because named authors and a date do not guarantee accuracy. The group writes a cautious forecast, separating data from inference. Its notes include each source's title, creator, date, and the particular information used. In its final explanation, it paraphrases the data instead of copying a paragraph and identifies its source. Readers can judge the explanation more easily because the evidence and its limits are visible.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

# Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Why cannot one storm establish a climate trend? (1 point)

Answer / scoring: Climate requires long-term patterns, not one event.

2. How can weather observations vary within one region? (1 point)

Answer / scoring: Time, elevation, land cover, distance to water, and other factors differ.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 19 versus 11 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Compare short-term observations with long-term climate data. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct time scales, variables, and cautious inference.

# Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Estudio por la mañana. Leo por la noche.
Word bank: estudiar, leer, comer, dormir, la mañana, la noche.

1. Translate into English: estudiar. (1 point)

Answer / scoring: to study

2. Translate into Spanish: to read. (1 point)

Answer / scoring: leer; accept appropriate article/gender variants when meaning is correct.

3. Translate to study into Spanish. (1 point)

Answer / scoring: estudiar

4. Oral task (teacher listens): Use 3 short statements or a 3-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Estudio por la mañana. Leo por la noche. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How can weather observations vary within one region? (1 point)

Answer / scoring: Time, elevation, land cover, distance to water, and other factors differ.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

3. Compare short-term observations with long-term climate data. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct time scales, variables, and cautious inference.

4. What is a weather front? (1 point)

Answer / scoring: A boundary between air masses with different characteristics.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

6. Draw two air masses and a front with possible weather changes. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct boundary and plausible temperature/moisture changes; forecast is qualified, not certain.

7. Why combine satellite, radar, and surface data? (1 point)

Answer / scoring: They provide different scales and variables, improving interpretation.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

9. Plan a weather-data comparison. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Identify each source/variable, align times/locations, and discuss limits.

10. Why evaluate forecasts after the predicted period? (1 point)

Answer / scoring: It reveals accuracy, errors, and possible model improvements.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

12. Create a forecast evaluation plan. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Prediction, verification data, comparison metric, and revision/reflection.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

# Social Studies - 24 points

Score: _____ / 24

W1 background: It continued the eastern Roman political tradition, with Constantinople as a central city. Its position connected important land/sea routes and offered strategic advantages. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: The Arabian Peninsula in the seventh century CE. Movement of people, texts, institutions, and contacts can carry ideas; mechanisms vary. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Mathematics, medicine, astronomy, philosophy, literature, or related fields. It helped preserve, compare, adapt, and extend knowledge from different traditions. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Travelers share ideas, techniques, beliefs, languages, and information. Power, conflict, and access can differ among participants. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What was the Byzantine Empire's connection to Rome? (1 point)

Answer / scoring: It continued the eastern Roman political tradition, with Constantinople as a central city.

2. Why did location matter for Constantinople? (1 point)

Answer / scoring: Its position connected important land/sea routes and offered strategic advantages.

3. Explain continuity and change in Byzantine history. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). One Roman continuity, one change, context, and evidence.

4. Where did Islam begin as a historical religious movement? (1 point)

Answer / scoring: The Arabian Peninsula in the seventh century CE.

5. How can trade and other networks help beliefs spread? (1 point)

Answer / scoring: Movement of people, texts, institutions, and contacts can carry ideas; mechanisms vary.

6. Map a route of cultural/religious exchange. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Accurate broad regions, a plausible mechanism, and limits; distinguish exchange from universal acceptance.

7. Name one field developed through scholarship in the Islamic Golden Age. (1 point)

Answer / scoring: Mathematics, medicine, astronomy, philosophy, literature, or related fields.

8. Why did translation matter to scholarship? (1 point)

Answer / scoring: It helped preserve, compare, adapt, and extend knowledge from different traditions.

9. Model a scholarly exchange. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Text/idea, translation/contact, new use/development, and acknowledgment of multiple contributors.

10. Why can trade carry more than goods? (1 point)

Answer / scoring: Travelers share ideas, techniques, beliefs, languages, and information.

11. Why is cultural exchange not always peaceful or equal? (1 point)

Answer / scoring: Power, conflict, and access can differ among participants.

12. Explain an exchange through a historical network. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Goods and ideas, participants, mechanism, and a benefit/unequal effect.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

Spanish model and vocabulary (cue support allowed)

Estudio por la mañana. Leo por la noche.
Word bank: estudiar, leer, comer, dormir, la mañana, la noche.

1. Week 1: Translate to study into Spanish. (1 point)

Answer / scoring: estudiar

2. Week 2: Complete: Yo ___ español. (hablar, present tense) (1 point)

Answer / scoring: hablo

3. Week 3: Translate to study into Spanish. (1 point)

Answer / scoring: estudiar

4. Week 4: Translate to study into Spanish. (1 point)

Answer / scoring: estudiar

5. Read the supplied Spanish model. Give its meaning in English. (2 points)

Answer / scoring: I study in the morning. I read at night.

6. Write one new correct sentence using vocabulary from this module. (2 points)

Answer / scoring: One point for relevant vocabulary; one for a meaningful correct sentence. Accept varied answers.

7. Oral task (teacher listens): Use 6-8 short statements or a 6-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Estudio por la mañana. Leo por la noche. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.

# Grade 7 · Module 6 Week 1 Friday gap quiz - TEACHER ANSWER KEY

Scheduled: 2027-04-02 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 7.EE.1-4 | ELA: RL.7.1-10; RI.7.1-10; W.7.1-9; L.7.1-6; SL.7.1-6 (grade-level coverage; module skill targets below) | Science: E.7.9A.4-7 | Social Studies: MS CCRS SS Grade 7 - Africa/Asia/trade networks | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

## Writing and conventions · required gap check - 8 points

Score: _____ / 8

An Argument for Trees

A community group argues that a school should plant trees near its outdoor learning area. Its claim is narrower than "trees solve every problem": a carefully chosen location may provide shade and support habitat. The group presents a fictional class data table comparing temperatures at a sunny spot and a shaded spot. It also acknowledges counterarguments: planting and watering cost money, and roots or branches may interfere with structures. Its proposal recommends consulting knowledgeable staff, selecting a suitable location, and comparing costs before planting. An effective response to a counterargument does not mock the people who raise it. Instead, it explains how the plan addresses a reasonable concern or why the evidence supports a different choice. The final paragraph asks the school to try a manageable plan and report the results.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

# Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How does latitude affect average incoming sunlight? (1 point)

Answer / scoring: Sun angle and seasonal day length vary with latitude.

2. How can elevation and large water bodies affect climate? (1 point)

Answer / scoring: Elevation often lowers temperature; water moderates temperature and influences moisture.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 19 versus 11 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Model three climate controls for two hypothetical places. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Latitude, elevation, and water influence explained without assuming one factor decides everything.

# Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Vivo en Mississippi. Escribo una carta.
Word bank: comer, beber, vivir, escribir, leer, abrir.

1. Translate into English: comer. (1 point)

Answer / scoring: to eat

2. Translate into Spanish: to drink. (1 point)

Answer / scoring: beber; accept appropriate article/gender variants when meaning is correct.

3. Complete: Yo ___ agua. (beber, present tense) (1 point)

Answer / scoring: bebo

4. Oral task (teacher listens): Use 3 short statements or a 3-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Vivo en Mississippi. Escribo una carta. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.

# Social Studies - 10 points

Score: _____ / 10

W2 background: Water, distances, routes, and transport needs shaped journeys. Travelers needed routes, supplies, skills, and relationships. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How did desert geography influence trans-Saharan trade? (1 point)

Answer / scoring: Water, distances, routes, and transport needs shaped journeys.

2. Why were knowledge and cooperation important to long-distance travel? (1 point)

Answer / scoring: Travelers needed routes, supplies, skills, and relationships.

3. Use W2 background. Identify one claim that could be checked against a map, document, or other reliable source. (1 point)

Answer / scoring: Water, distances, routes, and transport needs shaped journeys. OR Travelers needed routes, supplies, skills, and relationships.; accept a checkable claim accurately drawn from the note.

4. Use W2 background. Explain how two ideas in the note connect. (2 points)

Answer / scoring: Accept a logical relationship using accurate details from both statements; do not require one exact interpretation.

5. Name one kind of source that could help check the background note and explain why. (2 points)

Answer / scoring: A relevant map, scholarly/educator text, community source, historical document, or data record; source must match the claim. One point for suitable source and one for purpose.

6. Plan a historical trade-route explanation. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Geographic challenge, goods/transport, people's knowledge, and exchange beyond goods.

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Latitude, elevation, and water influence explained without assuming one factor decides everything.

4. How can currents redistribute thermal energy? (1 point)

Answer / scoring: Moving water transports heat between regions.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

6. Model an ocean-atmosphere energy pathway. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Uneven heating, motion, and thermal transfer connected; correct direction for chosen example.

7. Why is solar heating important to atmospheric motion? (1 point)

Answer / scoring: It produces uneven heating and pressure/density differences.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

9. Draw a convection model. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Heating location, rising warmer fluid, sinking cooler fluid, and circulating arrows.

10. How do hazard and risk differ? (1 point)

Answer / scoring: Hazard is a potentially damaging event; risk includes likelihood/exposure/vulnerability.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

12. Evaluate a storm explanation using data and limits. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Relevant mechanism, specific evidence, qualified claim, and one missing variable.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

# Social Studies - 24 points

Score: _____ / 24

W1 background: Control and taxation of important trade networks supported wealth and political power. They were valuable goods demanded in different regions. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Water, distances, routes, and transport needs shaped journeys. Travelers needed routes, supplies, skills, and relationships. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: It includes diverse societies and changing institutions. Trade, movement, diplomacy, religion, and conflict linked regions. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Spread and adaptation of ideas/practices through contact. People adapt it to their language, beliefs, needs, and institutions. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How did trade contribute to West African kingdoms such as Ghana and Mali? (1 point)

Answer / scoring: Control and taxation of important trade networks supported wealth and political power.

2. Why were gold and salt important in trans-Saharan trade? (1 point)

Answer / scoring: They were valuable goods demanded in different regions.

3. Model a West African trade network. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Relevant regions/goods/routes, political/economic connection, and limits of the model.

4. How did desert geography influence trans-Saharan trade? (1 point)

Answer / scoring: Water, distances, routes, and transport needs shaped journeys.

5. Why were knowledge and cooperation important to long-distance travel? (1 point)

Answer / scoring: Travelers needed routes, supplies, skills, and relationships.

6. Plan a historical trade-route explanation. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Geographic challenge, goods/transport, people's knowledge, and exchange beyond goods.

7. Why should medieval/imperial Asia be studied through specific times and places? (1 point)

Answer / scoring: It includes diverse societies and changing institutions.

8. How could land/sea routes connect Asian communities? (1 point)

Answer / scoring: Trade, movement, diplomacy, religion, and conflict linked regions.

9. Compare two Asian communities using a defined framework. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Specified place/time, common criteria, evidence, and acknowledgment of variation.

10. What is cultural diffusion? (1 point)

Answer / scoring: Spread and adaptation of ideas/practices through contact.

11. Why can an adopted practice change in a new setting? (1 point)

Answer / scoring: People adapt it to their language, beliefs, needs, and institutions.

12. Trace an example of cultural diffusion. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Origin/contact/adaptation sequence and evidence; avoid unsupported one-way assumptions.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

After the Storm

Original poem:
The street unrolls its silver thread,
The restless clouds move overhead.
A window holds the fading light;
A branch writes slowly into night.
I count the drops that leave the leaves,
And hear the roof repeat its eaves.
The storm has gone; its quiet trace
Still draws a map across this place.

Prose companion: Rainwater remains on leaves and the street after a storm. Clouds move away as evening approaches. A person observes these remaining signs of the weather. The prose summarizes observable conditions; the poem uses images to create a reflective mood.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

# Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Name interactions among atmosphere, hydrosphere, geosphere, and biosphere. (1 point)

Answer / scoring: Accept water moving through soil/plants, weathering, evaporation, erosion, or comparable pathways.

2. Why are Earth-system boundaries useful but not absolute barriers? (1 point)

Answer / scoring: They organize models, but matter/energy cross among systems.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 19 versus 11 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draw an Earth-system interaction model. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). At least three spheres, correct arrows/processes, and a defined focus.

# Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

La biblioteca está cerca del parque.
Word bank: la biblioteca, el parque, la tienda, el hospital, la escuela, el mercado.

1. Translate into English: la biblioteca. (1 point)

Answer / scoring: the library

2. Translate into Spanish: the park. (1 point)

Answer / scoring: el parque; accept appropriate article/gender variants when meaning is correct.

3. Translate library into Spanish. (1 point)

Answer / scoring: biblioteca / la biblioteca

4. Oral task (teacher listens): Use 3 short statements or a 3-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: La biblioteca está cerca del parque. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.

# Grade 7 · Module 7 Week 2 Friday gap quiz - TEACHER ANSWER KEY

Scheduled: 2027-05-07 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 7.SP.1-8 | ELA: RL.7.1-10; RI.7.1-10; W.7.1-9; L.7.1-6; SL.7.1-6 (grade-level coverage; module skill targets below) | Science: E.7.9 + integrated practices | Social Studies: MS CCRS SS Grade 7 - Medieval Europe | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

## Writing and conventions · required gap check - 8 points

Score: _____ / 8

After the Storm

Original poem:
The street unrolls its silver thread,
The restless clouds move overhead.
A window holds the fading light;
A branch writes slowly into night.
I count the drops that leave the leaves,
And hear the roof repeat its eaves.
The storm has gone; its quiet trace
Still draws a map across this place.

Prose companion: Rainwater remains on leaves and the street after a storm. Clouds move away as evening approaches. A person observes these remaining signs of the weather. The prose summarizes observable conditions; the poem uses images to create a reflective mood.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

Score: _____ / 10

W2 background: Religious practices, education, institutions, art, and political relationships affected life. People and communities varied by place, status, belief, and period. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How could the medieval Church influence European culture? (1 point)

Answer / scoring: Religious practices, education, institutions, art, and political relationships affected life.

2. Why should one institution not stand for every medieval experience? (1 point)

Answer / scoring: People and communities varied by place, status, belief, and period.

3. Use W2 background. Identify one claim that could be checked against a map, document, or other reliable source. (1 point)

Answer / scoring: Religious practices, education, institutions, art, and political relationships affected life. OR People and communities varied by place, status, belief, and period.; accept a checkable claim accurately drawn from the note.

4. Use W2 background. Explain how two ideas in the note connect. (2 points)

Answer / scoring: Accept a logical relationship using accurate details from both statements; do not require one exact interpretation.

5. Name one kind of source that could help check the background note and explain why. (2 points)

Answer / scoring: A relevant map, scholarly/educator text, community source, historical document, or data record; source must match the claim. One point for suitable source and one for purpose.

6. Analyze a cultural institution's role. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Specific function/evidence, people affected, and missing or different perspectives.

# Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Sigue todo recto y gira a la derecha.
Word bank: a la derecha, a la izquierda, todo recto, cerca, lejos, la calle.

1. Translate into English: a la derecha. (1 point)

Answer / scoring: to the right

2. Translate into Spanish: to the left. (1 point)

Answer / scoring: a la izquierda; accept appropriate article/gender variants when meaning is correct.

3. Translate to the left into Spanish. (1 point)

Answer / scoring: a la izquierda

4. Oral task (teacher listens): Use 3 short statements or a 3-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Sigue todo recto y gira a la derecha. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.

After the Storm

Original poem:
The street unrolls its silver thread,
The restless clouds move overhead.
A window holds the fading light;
A branch writes slowly into night.
I count the drops that leave the leaves,
And hear the roof repeat its eaves.
The storm has gone; its quiet trace
Still draws a map across this place.

Prose companion: Rainwater remains on leaves and the street after a storm. Clouds move away as evening approaches. A person observes these remaining signs of the weather. The prose summarizes observable conditions; the poem uses images to create a reflective mood.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Answer / scoring: 4-point rubric: two appropriate module skills identified (2), two accurate applications explained (2). Check against the module's listed learning goals.

# Science - 28 points

Score: _____ / 28

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 12 milliliters of water collected; Trial B: 20 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Why are Earth-system boundaries useful but not absolute barriers? (1 point)

Answer / scoring: They organize models, but matter/energy cross among systems.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

3. Draw an Earth-system interaction model. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). At least three spheres, correct arrows/processes, and a defined focus.

4. What do closely spaced contour lines usually indicate? (1 point)

Answer / scoring: A steeper slope.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

6. Sketch a hill with contour lines and explain a weather/geography connection. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct nested equal-elevation lines, steep/gentle spacing, and plausible elevation/weather relationship.

7. Why compare alternative explanations for a change? (1 point)

Answer / scoring: Other factors may account for observed differences.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

9. Model one human impact and an alternative explanation. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Clear pathway, evidence needed, and a plausible confounding influence.

10. Why distinguish uncertainty from an error? (1 point)

Answer / scoring: Uncertainty reflects limits/variation; an error may be a specific mistake.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

12. Write a data-based claim-evidence-reasoning outline. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Claim, at least two observations, scientific reasoning, and one limitation.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

# Social Studies - 24 points

Score: _____ / 24

W1 background: Feudal ties concern political/military obligations; manorial life concerns an estate's economic/social organization; both varied. It provided resources, livelihoods, and a basis for obligations/control. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Religious practices, education, institutions, art, and political relationships affected life. People and communities varied by place, status, belief, and period. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Religious, political, military, and economic motives/interests interacted. Participants and affected communities had different experiences and purposes. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Markets, crafts, urban institutions, and networks expanded opportunities and tensions. No; local conditions and histories differed. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How are feudal ties and manorial life different concepts? (1 point)

Answer / scoring: Feudal ties concern political/military obligations; manorial life concerns an estate's economic/social organization; both varied.

2. Why did land matter to medieval power and work? (1 point)

Answer / scoring: It provided resources, livelihoods, and a basis for obligations/control.

3. Compare a lord's and a peasant's roles on a manor. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Work, rights/obligations, unequal power, and recognition of regional variation.

4. How could the medieval Church influence European culture? (1 point)

Answer / scoring: Religious practices, education, institutions, art, and political relationships affected life.

5. Why should one institution not stand for every medieval experience? (1 point)

Answer / scoring: People and communities varied by place, status, belief, and period.

6. Analyze a cultural institution's role. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Specific function/evidence, people affected, and missing or different perspectives.

7. What broad factors were involved in the Crusades? (1 point)

Answer / scoring: Religious, political, military, and economic motives/interests interacted.

8. Why should Crusades be studied from multiple perspectives? (1 point)

Answer / scoring: Participants and affected communities had different experiences and purposes.

9. Compare two perspectives on medieval conflict/exchange. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Creator/context, agreement/disagreement, harm or contact, and limits of each account.

10. How could towns and trade change medieval economic life? (1 point)

Answer / scoring: Markets, crafts, urban institutions, and networks expanded opportunities and tensions.

11. Did every region change at the same speed or in the same way? (1 point)

Answer / scoring: No; local conditions and histories differed.

12. Model a transition from rural estate life to urban trade. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Work/market/institution changes, continuity, and context rather than a universal sequence.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

# Spanish - 12 points

## Writing and conventions · required gap check - 8 points

Score: _____ / 8

The Printer's Workshop

Original drama:
[An apprentice arranges metal type on a table.]
APPRENTICE: If we print the same page many times, will every reader agree with it?
PRINTER: Copies spread words, not agreement.
APPRENTICE: Then accuracy matters before the first copy.
[The printer points to a misplaced letter.]
PRINTER: And readers must question what they read.

Informational companion: In early modern Europe, printing made it possible to reproduce texts more quickly than copying each one by hand. Printed works helped ideas circulate, including religious, scientific, and artistic arguments. Access remained uneven; not everyone could read or obtain books. Greater circulation did not guarantee that every claim was true. Scholars therefore needed observation, reasoning, and the comparison of sources as well as access to texts.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

# Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How can chemistry and ecology interact? (1 point)

Answer / scoring: Substance properties and reactions affect organisms and environments.

2. Why identify what crosses a laboratory system's boundary? (1 point)

Answer / scoring: It helps track matter and interpret changes.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 19 versus 11 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Plan an integrated matter/ecology model. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Define system, relevant matter/organisms, interaction pathway, and observations to collect.

Score: _____ / 10

W2 background: Religious reform movements and challenges to church practices/authority, with political/social consequences. Texts could be reproduced and shared more quickly. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What did the Reformation involve? (1 point)

Answer / scoring: Religious reform movements and challenges to church practices/authority, with political/social consequences.

2. Why did printing help reform arguments circulate? (1 point)

Answer / scoring: Texts could be reproduced and shared more quickly.

3. Use W2 background. Identify one claim that could be checked against a map, document, or other reliable source. (1 point)

Answer / scoring: Religious reform movements and challenges to church practices/authority, with political/social consequences. OR Texts could be reproduced and shared more quickly.; accept a checkable claim accurately drawn from the note.

4. Use W2 background. Explain how two ideas in the note connect. (2 points)

Answer / scoring: Accept a logical relationship using accurate details from both statements; do not require one exact interpretation.

5. Name one kind of source that could help check the background note and explain why. (2 points)

Answer / scoring: A relevant map, scholarly/educator text, community source, historical document, or data record; source must match the claim. One point for suitable source and one for purpose.

6. Explain a reform argument's circulation. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Idea/text, printing/network, differing responses, and context; avoid universal agreement.

# Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

En este país se habla español.
Word bank: el país, la ciudad, la comida, la música, la tradición, el idioma.

1. Translate into English: el país. (1 point)

Answer / scoring: the country

2. Translate into Spanish: the city. (1 point)

Answer / scoring: la ciudad; accept appropriate article/gender variants when meaning is correct.

3. Translate the country into Spanish. (1 point)

Answer / scoring: el país / país

4. Oral task (teacher listens): Use 3 short statements or a 3-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: En este país se habla español. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.

# Grade 7 · Module 8 Week 3 Friday gap quiz - TEACHER ANSWER KEY

Scheduled: 2027-06-11 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 7.G.1 | ELA: RL.7.1-10; RI.7.1-10; W.7.1-9; L.7.1-6; SL.7.1-6 (grade-level coverage; module skill targets below) | Science: Integrated L.7.3/P.7.5/E.7.9 | Social Studies: MS CCRS SS Grade 7 - Renaissance/Reformation/Scientific Revolution | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

## Writing and conventions · required gap check - 8 points

Score: _____ / 8

The Printer's Workshop

Original drama:
[An apprentice arranges metal type on a table.]
APPRENTICE: If we print the same page many times, will every reader agree with it?
PRINTER: Copies spread words, not agreement.
APPRENTICE: Then accuracy matters before the first copy.
[The printer points to a misplaced letter.]
PRINTER: And readers must question what they read.

Informational companion: In early modern Europe, printing made it possible to reproduce texts more quickly than copying each one by hand. Printed works helped ideas circulate, including religious, scientific, and artistic arguments. Access remained uneven; not everyone could read or obtain books. Greater circulation did not guarantee that every claim was true. Scholars therefore needed observation, reasoning, and the comparison of sources as well as access to texts.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

# Science - 10 points

Score: _____ / 10

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How do criteria and constraints differ in engineering? (1 point)

Answer / scoring: Criteria are desired outcomes; constraints are limits on designs.

2. Why use test results to revise a prototype? (1 point)

Answer / scoring: Evidence shows how well it meets criteria within constraints.

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W3 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 21 versus 13 in A; accept an accurate description without an unsupported causal claim.

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Develop an engineering comparison. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Goal, constraints, two designs, measurement, and an evidence-based improvement.

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Answer / scoring: 4-point rubric: two appropriate module skills identified (2), two accurate applications explained (2). Check against the module's listed learning goals.

# Science - 28 points

Score: _____ / 28

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 12 milliliters of water collected; Trial B: 20 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Why identify what crosses a laboratory system's boundary? (1 point)

Answer / scoring: It helps track matter and interpret changes.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

3. Plan an integrated matter/ecology model. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Define system, relevant matter/organisms, interaction pathway, and observations to collect.

4. Why does a graph need labeled axes and units? (1 point)

Answer / scoring: Readers must know which variables and quantities are compared.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

6. Interpret a multivariable investigation plan. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Identify variables, controls, trend, and a limitation; do not assign causation without evidence.

7. Why use test results to revise a prototype? (1 point)

Answer / scoring: Evidence shows how well it meets criteria within constraints.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

9. Develop an engineering comparison. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Goal, constraints, two designs, measurement, and an evidence-based improvement.

10. Why can the same data support different initial explanations? (1 point)

Answer / scoring: Interpretations may differ; further tests can discriminate among them.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

12. Communicate an explanation to a nonspecialist. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Accurate claim/data, clear model or language, correct reasoning, and uncertainty.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

# Social Studies - 24 points

Score: _____ / 24

W1 background: Interest in classical texts and human learning/capabilities, with diverse religious and cultural contexts. Supporters supplied resources and could influence subjects, opportunities, and purposes. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Religious reform movements and challenges to church practices/authority, with political/social consequences. Texts could be reproduced and shared more quickly. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Observation, experiments, mathematics, and debate provided ways to test explanations. No; change was uneven and included continuities/conflicts. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: More copies can reach more readers and settings. No; critical evaluation and evidence remain necessary. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What is Renaissance humanism in a broad historical sense? (1 point)

Answer / scoring: Interest in classical texts and human learning/capabilities, with diverse religious and cultural contexts.

2. How could patronage affect art or scholarship? (1 point)

Answer / scoring: Supporters supplied resources and could influence subjects, opportunities, and purposes.

3. Analyze a Renaissance work or idea. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Evidence of classical/human interests, creator/patron/context, and a qualified interpretation.

4. What did the Reformation involve? (1 point)

Answer / scoring: Religious reform movements and challenges to church practices/authority, with political/social consequences.

5. Why did printing help reform arguments circulate? (1 point)

Answer / scoring: Texts could be reproduced and shared more quickly.

6. Explain a reform argument's circulation. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Idea/text, printing/network, differing responses, and context; avoid universal agreement.

7. How did scientific inquiry challenge some inherited explanations? (1 point)

Answer / scoring: Observation, experiments, mathematics, and debate provided ways to test explanations.

8. Did the Scientific Revolution instantly replace every earlier belief? (1 point)

Answer / scoring: No; change was uneven and included continuities/conflicts.

9. Compare inherited authority with evidence-based inquiry. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Specific question, observation/test, reasoning, and limits of an instant-change narrative.

10. Why can printing change the scale of debate? (1 point)

Answer / scoring: More copies can reach more readers and settings.

11. Does wider circulation guarantee a claim is accurate? (1 point)

Answer / scoring: No; critical evaluation and evidence remain necessary.

12. Model how a printed idea changes or meets opposition. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Creator/message, network, audiences/responses, evidence, and qualification.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

# Spanish - 12 points

## Writing and conventions · required gap check - 8 points

Score: _____ / 8

A History Portfolio

A student created a portfolio about how travel and communication changed societies. She began with a research question rather than a list of famous people: How did networks connect communities, and whose experiences were left out of the usual accounts? She compared a map, a trade-route reading, and a translated historical account. Her notes separated quotations, paraphrases, and her own interpretations. When two accounts disagreed, she recorded their authors, purposes, and contexts instead of choosing the more dramatic version. The final presentation used a timeline but did not imply that every change happened everywhere at once. It included an argument supported by evidence and a section explaining limitations. The student concluded that a strong portfolio shows not only a polished product but also how the researcher checked and revised the work.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

# Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How do matter cycles differ from energy flow through an ecosystem? (1 point)

Answer / scoring: Matter cycles among reservoirs; energy flows and is dispersed as thermal energy.

2. Why frame a capstone around a focused question? (1 point)

Answer / scoring: A focused question guides feasible evidence collection.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 19 versus 11 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Plan a systems/cycles capstone. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Specific question, model boundary, variables/processes, data, and possible explanations.

# Social Studies - 10 points

Score: _____ / 10

W2 background: Reason, rights, consent, limits on government, or debates about equality. Rights/equality claims often coexisted with exclusion and slavery. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What is one broad Enlightenment idea? (1 point)

Answer / scoring: Reason, rights, consent, limits on government, or debates about equality.

2. Why compare ideals with actual practices? (1 point)

Answer / scoring: Rights/equality claims often coexisted with exclusion and slavery.

3. Use W2 background. Identify one claim that could be checked against a map, document, or other reliable source. (1 point)

Answer / scoring: Reason, rights, consent, limits on government, or debates about equality. OR Rights/equality claims often coexisted with exclusion and slavery.; accept a checkable claim accurately drawn from the note.

4. Use W2 background. Explain how two ideas in the note connect. (2 points)

Answer / scoring: Accept a logical relationship using accurate details from both statements; do not require one exact interpretation.

5. Name one kind of source that could help check the background note and explain why. (2 points)

Answer / scoring: A relevant map, scholarly/educator text, community source, historical document, or data record; source must match the claim. One point for suitable source and one for purpose.

6. Analyze an Enlightenment ideal and contradiction. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Accurate ideal, example of unequal application, context, and reasoned evaluation.

The student concluded that a strong portfolio shows not only a polished product but also how the researcher checked and revised the work.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

# Science - 10 points

Score: _____ / 10

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Why must reasoning link data to a scientific mechanism? (1 point)

Answer / scoring: Data alone do not explain why an outcome occurs.

2. What is one purpose of a lab report's methods section? (1 point)

Answer / scoring: Enable others to understand and repeat/evaluate the procedure.

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W3 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 21 versus 13 in A; accept an accurate description without an unsupported causal claim.

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draft a lab-report/CER outline. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Question, methods, data, claim, scientific reasoning, and limitation.

# Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

En este país se habla español.
Word bank: el país, la ciudad, la comida, la música, la tradición, el idioma.

1. Translate into English: el país. (1 point)

Answer / scoring: the country

2. Translate into Spanish: the city. (1 point)

Answer / scoring: la ciudad; accept appropriate article/gender variants when meaning is correct.

3. Translate the country into Spanish. (1 point)

Answer / scoring: el país / país

4. Oral task (teacher listens): Use 3 short statements or a 3-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: En este país se habla español. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.

# Grade 7 · Module 9 Comprehensive gap assessment - TEACHER ANSWER KEY

Scheduled: 2027-07-16 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 7.G.2-6 | ELA: RL.7.1-10; RI.7.1-10; W.7.1-9; L.7.1-6; SL.7.1-6 (grade-level coverage; module skill targets below) | Science: Cumulative L.7.3; P.7.5; E.7.9 | Social Studies: MS CCRS SS Grade 7 Early World History - Exploration/Enlightenment | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

## Writing and conventions · required gap check - 12 points

Score: _____ / 12

A History Portfolio

A student created a portfolio about how travel and communication changed societies. She began with a research question rather than a list of famous people: How did networks connect communities, and whose experiences were left out of the usual accounts? She compared a map, a trade-route reading, and a translated historical account. Her notes separated quotations, paraphrases, and her own interpretations. When two accounts disagreed, she recorded their authors, purposes, and contexts instead of choosing the more dramatic version. The final presentation used a timeline but did not imply that every change happened everywhere at once. It included an argument supported by evidence and a section explaining limitations. The student concluded that a strong portfolio shows not only a polished product but also how the researcher checked and revised the work.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Answer / scoring: 4-point rubric: two appropriate module skills identified (2), two accurate applications explained (2). Check against the module's listed learning goals.

# Science - 28 points

Score: _____ / 28

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 12 milliliters of water collected; Trial B: 20 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Why frame a capstone around a focused question? (1 point)

Answer / scoring: A focused question guides feasible evidence collection.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

3. Plan a systems/cycles capstone. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Specific question, model boundary, variables/processes, data, and possible explanations.

4. Why can a model be useful even when it is simplified? (1 point)

Answer / scoring: It makes selected relationships visible, but its limits must be stated.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

6. Revise a model using new observations. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Identify original feature, new evidence, changed feature, and remaining limitation.

7. What is one purpose of a lab report's methods section? (1 point)

Answer / scoring: Enable others to understand and repeat/evaluate the procedure.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

9. Draft a lab-report/CER outline. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Question, methods, data, claim, scientific reasoning, and limitation.

10. Why should a capstone include more than a final score? (1 point)

Answer / scoring: It should document evidence, reasoning, revision, and communication.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

12. Plan a science showcase summary. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Question, model/method, results, explanation, limitations, and next investigation.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

# Social Studies - 24 points

Score: _____ / 24

W1 background: New routes linked trade and migration, while conquest, exploitation, disease, and enslavement damaged communities. European accounts alone omit experiences of many people affected. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Reason, rights, consent, limits on government, or debates about equality. Rights/equality claims often coexisted with exclusion and slavery. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: It comes from the relevant period/event or direct participants, depending on the question. Perspective, purpose, bias, and limited knowledge affect accounts. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: It selects events and scales, leaving out many experiences and connections. Evidence-based argument, source comparison, connections, and reflection. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Why did maritime exploration connect societies and also create harm? (1 point)

Answer / scoring: New routes linked trade and migration, while conquest, exploitation, disease, and enslavement damaged communities.

2. Why include Indigenous and African perspectives? (1 point)

Answer / scoring: European accounts alone omit experiences of many people affected.

3. Compare accounts of exploration/contact. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Different creators/purposes, evidence, benefits/harms, and omissions.

4. What is one broad Enlightenment idea? (1 point)

Answer / scoring: Reason, rights, consent, limits on government, or debates about equality.

5. Why compare ideals with actual practices? (1 point)

Answer / scoring: Rights/equality claims often coexisted with exclusion and slavery.

6. Analyze an Enlightenment ideal and contradiction. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Accurate ideal, example of unequal application, context, and reasoned evaluation.

7. What makes an account a primary source for a historical question? (1 point)

Answer / scoring: It comes from the relevant period/event or direct participants, depending on the question.

8. Why is a primary source not automatically accurate or complete? (1 point)

Answer / scoring: Perspective, purpose, bias, and limited knowledge affect accounts.

9. Plan a primary-source seminar comparison. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Creator/date/purpose, observable claims, corroboration, missing voices, and questions.

10. Why is a world-history timeline a model rather than a full history? (1 point)

Answer / scoring: It selects events and scales, leaving out many experiences and connections.

11. What can a capstone show besides memorized dates? (1 point)

Answer / scoring: Evidence-based argument, source comparison, connections, and reflection.

12. Plan a world-history capstone and timeline. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Focused question, accurate sequencing, connections, sources/perspectives, and limitations.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

# Spanish - 12 points

Score: _____ / 12

Spanish model and vocabulary (cue support allowed)

Hola. Me llamo Ana. Me gusta leer.
Word bank: hola, el libro, la familia, la comida, hace sol, estudiar.

1. Week 1: Complete: Me ___ Ana. (1 point)

Answer / scoring: llamo

2. Week 2: Complete: Me ___ Ana. (1 point)

Answer / scoring: llamo

3. Week 3: Translate the country into Spanish. (1 point)

Answer / scoring: el país / país

4. Week 4: Complete: Me ___ Ana. (1 point)

Answer / scoring: llamo

5. Read the supplied Spanish model. Give its meaning in English. (2 points)

Answer / scoring: Hello. My name is Ana. I like reading.

6. Write one new correct sentence using vocabulary from this module. (2 points)

Answer / scoring: One point for relevant vocabulary; one for a meaningful correct sentence. Accept varied answers.

7. Oral task (teacher listens): Use 6-8 short statements or a 6-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Hola. Me llamo Ana. Me gusta leer. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.
