A Library Garden

Maya wanted a quiet place to read outside. She asked the librarian if the empty corner of the courtyard could become a garden. First, Maya measured the space. Next, she drew a plan with a path and two benches. Her friends brought seed packets, and an adult helped them plant. A week later, Maya noticed that the plants beside the wall were dry. She moved the watering can closer to them and made a watering chart. By spring, visitors were reading beside green leaves. Maya learned that a good plan needs careful observation as well as enthusiasm.

W3 data: A fictional class compares pulse counts at rest and after activity. Trial A: 73 pulse counts in one minute; Trial B: 103 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

1. What is the main role of the digestive system? (1 point)

Answer / scoring: Break down food so nutrients can be absorbed.

2. What is the main role of the respiratory system? (1 point)

Answer / scoring: Exchange gases: bring oxygen into the body and remove carbon dioxide.

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 30 pulse counts in one minute.

4. Use W3 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 103 versus 73 in A; accept an accurate description without an unsupported causal claim.

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draw how digestion and breathing support the body. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct food/nutrient pathway and oxygen/gas-exchange role; labeled arrows, not necessarily every organ.
