The Sparrow and the Lantern

This is an original fable. A sparrow bragged that she could light the whole forest with one lantern. An owl asked her to test the lantern before promising too much. The sparrow refused. At dusk she lifted the lantern, but its light reached only the nearest branch. Embarrassed, she almost flew away. Then she invited the fireflies to help. Together they marked a safe path to the clearing. The sparrow thanked each helper and promised to listen before boasting again. The owl did not laugh at her mistake; he praised the useful path.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

Science - 10 points

Score: _____ / 10

W1 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 21 temperature in degrees C; Trial B: 29 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. What is thermal energy related to? (1 point)

Answer / scoring: Motion of particles; temperature reflects average particle kinetic energy at this level.

2. In which direction does heat transfer naturally between objects? (1 point)

Answer / scoring: From higher temperature toward lower temperature.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 29 versus 21 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draw heat transfer from a warm object to a cooler one. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Two temperatures identified; arrow from warmer to cooler; transfer reduces the difference.
