Grade 4 · Module 5 Comprehensive gap assessment - TEACHER ANSWER KEY

Scheduled: 2027-03-26 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 4.NF.3-4 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: P.4.6A-C; engineering design | Social Studies: MS CCRS SS Grade 4 - regions/geography/economics | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Writing and conventions · required gap check - 12 points

Score: _____ / 12

Keeping Water Cool

Two students investigated how to keep a cup of water cool. They used identical cups, the same amount of water, and the same starting temperature. One cup was wrapped in cloth; the other was left uncovered. After twenty minutes in the same room, they measured both temperatures. They wrote the results in a table. They did not call one measurement proof that cloth is always the best material. Instead, they proposed trying another material and repeating the test. Their report explained the question, method, observations, and limits of their conclusion. A clear report lets another reader understand what was tested and what still needs investigation.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Answer / scoring: 4-point rubric: two appropriate module skills identified (2), two accurate applications explained (2). Check against the module's listed learning goals.

Science - 28 points

Score: _____ / 28

W1 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 21 temperature in degrees C; Trial B: 29 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 22 temperature in degrees C; Trial B: 30 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 23 temperature in degrees C; Trial B: 31 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 24 temperature in degrees C; Trial B: 32 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. What does energy transfer mean? (1 point)

Answer / scoring: Energy moves from one object/system to another.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

3. Show an energy transfer in a familiar situation. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct source, receiving object/system, and transfer pathway; e.g., sunlight warms pavement.

4. Why does an insulating material slow heat transfer? (1 point)

Answer / scoring: Its properties reduce the rate of thermal transfer; it does not create cold.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

6. Plan a fair insulation comparison. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Equal cups, water amounts and initial temperatures; change wrap material; compare temperatures over equal intervals.

7. Why does a working device often become warm? (1 point)

Answer / scoring: Some energy is transferred as thermal energy.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

9. Draw an energy-chain model for a fan or lamp. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct initial energy source, intermediate electrical energy, and motion/light plus thermal output.

10. Why revise a design after testing? (1 point)

Answer / scoring: Evidence can show a weakness and suggest improvement.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

12. Propose an energy-saving design and a test. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Reasonable goal, design, measured comparison, and a possible revision based on results.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

Social Studies - 24 points

Score: _____ / 24

W1 background: To study shared location, physical features, climate, or cultural/economic patterns. Yes; groupings depend on purpose and criteria. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Temperature and precipitation influence crops, water needs, energy use, and other activities. No; climate uses long-term patterns. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Resources, transport, population, skills, history, and decisions vary. Exchange of goods/services among people or places. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Broad regional similarities coexist with local differences. It makes similarities/differences interpretable. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Why do people group states into regions? (1 point)

Answer / scoring: To study shared location, physical features, climate, or cultural/economic patterns.

2. Can regional boundaries vary by source? (1 point)

Answer / scoring: Yes; groupings depend on purpose and criteria.

3. Map a Southeast grouping and explain your source's criteria. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Labeled states and stated grouping/source; accept reasonable sourced regional definitions.

4. How can climate affect use of resources? (1 point)

Answer / scoring: Temperature and precipitation influence crops, water needs, energy use, and other activities.

5. Does one weather event describe a region's climate? (1 point)

Answer / scoring: No; climate uses long-term patterns.

6. Compare climate and resources in two Southeast locations. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Long-term criteria, accurate resource connection, and no one-day generalization.

7. Why can two nearby places have different economies? (1 point)

Answer / scoring: Resources, transport, population, skills, history, and decisions vary.

8. What is trade? (1 point)

Answer / scoring: Exchange of goods/services among people or places.

9. Show an economic connection between two places. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Goods/service, reason for exchange, and a transport/communication connection.

10. How can Mississippi share features with the Southeast and still have its own regions? (1 point)

Answer / scoring: Broad regional similarities coexist with local differences.

11. Why should comparisons use the same criteria? (1 point)

Answer / scoring: It makes similarities/differences interpretable.

12. Compare Mississippi with another Southeast state. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Same criteria such as water, landforms, climate, or work; source-supported statements.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

Spanish - 12 points

Score: _____ / 12

Spanish model and vocabulary (cue support allowed)

Quiero el menú, por favor.
Word bank: el desayuno, el almuerzo, la cena, quiero, el menú, por favor.

1. Week 1: Translate bread into Spanish. (1 point)

Answer / scoring: pan / el pan

2. Week 2: Complete: Me ___ el arroz. (1 point)

Answer / scoring: gusta

3. Week 3: Translate dinner into Spanish. (1 point)

Answer / scoring: cena / la cena

4. Week 4: Translate dinner into Spanish. (1 point)

Answer / scoring: cena / la cena

5. Read the supplied Spanish model. Give its meaning in English. (2 points)

Answer / scoring: I want the menu, please.

6. Write one new correct sentence using vocabulary from this module. (2 points)

Answer / scoring: One point for relevant vocabulary; one for a meaningful correct sentence. Accept varied answers.

7. Oral task (teacher listens): Use 4 short statements or a 4-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Quiero el menú, por favor. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.
