Grade 4 · Module 5 Comprehensive gap assessment

Scheduled: 2027-03-26 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Student: _____ Date completed: _____

Math: 4.NF.3-4 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: P.4.6A-C; engineering design | Social Studies: MS CCRS SS Grade 4 - regions/geography/economics | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Writing and conventions · required gap check - 12 points

Score: _____ / 12

Keeping Water Cool

Two students investigated how to keep a cup of water cool. They used identical cups, the same amount of water, and the same starting temperature. One cup was wrapped in cloth; the other was left uncovered. After twenty minutes in the same room, they measured both temperatures. They wrote the results in a table. They did not call one measurement proof that cloth is always the best material. Instead, they proposed trying another material and repeating the test. Their report explained the question, method, observations, and limits of their conclusion. A clear report lets another reader understand what was tested and what still needs investigation.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Science - 28 points

Score: _____ / 28

W1 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 21 temperature in degrees C; Trial B: 29 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 22 temperature in degrees C; Trial B: 30 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 23 temperature in degrees C; Trial B: 31 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 24 temperature in degrees C; Trial B: 32 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. What does energy transfer mean? (1 point)

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

3. Show an energy transfer in a familiar situation. (3 points)

4. Why does an insulating material slow heat transfer? (1 point)

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

6. Plan a fair insulation comparison. (3 points)

7. Why does a working device often become warm? (1 point)

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

9. Draw an energy-chain model for a fan or lamp. (3 points)

10. Why revise a design after testing? (1 point)

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

12. Propose an energy-saving design and a test. (3 points)

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Social Studies - 24 points

Score: _____ / 24

W1 background: To study shared location, physical features, climate, or cultural/economic patterns. Yes; groupings depend on purpose and criteria. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Temperature and precipitation influence crops, water needs, energy use, and other activities. No; climate uses long-term patterns. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Resources, transport, population, skills, history, and decisions vary. Exchange of goods/services among people or places. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Broad regional similarities coexist with local differences. It makes similarities/differences interpretable. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Why do people group states into regions? (1 point)

2. Can regional boundaries vary by source? (1 point)

3. Map a Southeast grouping and explain your source's criteria. (3 points)

4. How can climate affect use of resources? (1 point)

5. Does one weather event describe a region's climate? (1 point)

6. Compare climate and resources in two Southeast locations. (3 points)

7. Why can two nearby places have different economies? (1 point)

8. What is trade? (1 point)

9. Show an economic connection between two places. (3 points)

10. How can Mississippi share features with the Southeast and still have its own regions? (1 point)

11. Why should comparisons use the same criteria? (1 point)

12. Compare Mississippi with another Southeast state. (3 points)

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Spanish - 12 points

Score: _____ / 12

Spanish model and vocabulary (cue support allowed)

Quiero el menú, por favor.
Word bank: el desayuno, el almuerzo, la cena, quiero, el menú, por favor.

1. Week 1: Translate bread into Spanish. (1 point)

2. Week 2: Complete: Me ___ el arroz. (1 point)

3. Week 3: Translate dinner into Spanish. (1 point)

4. Week 4: Translate dinner into Spanish. (1 point)

5. Read the supplied Spanish model. Give its meaning in English. (2 points)

6. Write one new correct sentence using vocabulary from this module. (2 points)

7. Oral task (teacher listens): Use 4 short statements or a 4-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)
