Grade 4 · Module 6 Comprehensive gap assessment - TEACHER ANSWER KEY

Scheduled: 2027-04-23 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 4.NF.5-7; 4.MD.2 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: E.4.9A-B | Social Studies: MS CCRS SS Grade 4 - regions/geography/economics | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Writing and conventions · required gap check - 12 points

Score: _____ / 12

A Case for Shade

Our reading area should have a shaded bench. At noon, the sunny bench can be uncomfortable. A shaded seat would give readers another choice. We can first move a portable shade nearby and record how many students use the area. Then we can ask whether the change helped. Some people worry that a permanent structure would cost too much. That is a fair concern, so a temporary test is a sensible first step. The goal is not to promise that every reader will love the bench. The goal is to use evidence to decide whether a small improvement is worthwhile.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Answer / scoring: 4-point rubric: two appropriate module skills identified (2), two accurate applications explained (2). Check against the module's listed learning goals.

Science - 28 points

Score: _____ / 28

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 12 milliliters of water collected; Trial B: 20 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How are evaporation and condensation different? (1 point)

Answer / scoring: Liquid becomes gas in evaporation; gas becomes liquid in condensation.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

3. Draw a water-cycle model. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Include evaporation, condensation, precipitation, and collection/runoff with correct arrows.

4. Why record weather at consistent times? (1 point)

Answer / scoring: Measurements become more comparable across days.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

6. Design a five-day weather log. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). At least two variables with units, consistent time/location, and a table format.

7. What does a thermometer measure? (1 point)

Answer / scoring: Temperature.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

9. Draw a simple weather instrument and explain its use. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Appropriate instrument, labels, measurement variable, and consistent measurement method.

10. What data might help a weather forecast? (1 point)

Answer / scoring: Temperature, pressure, wind, humidity, cloud/radar information, or prior patterns.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

12. Write a cautious forecast from a pattern in a weather log. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Use stated evidence and qualified language; do not claim a pattern guarantees an outcome.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

Social Studies - 24 points

Score: _____ / 24

W1 background: Coasts/rivers supported travel, trade, settlement, and industry. Human decisions and changes over time also shape communities. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Flat land and suitable soils can support large fields, subject to climate/resources. Regions include physical, cultural, and economic variation. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: It supports a fair, clear geographic comparison. Water, food, transport, housing, work, or public services. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: People carry skills, ideas, relationships, and cultural practices as they move. Jobs, family, safety, education, and many other circumstances vary. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What is one way water has influenced the Northeast's development? (1 point)

Answer / scoring: Coasts/rivers supported travel, trade, settlement, and industry.

2. Why should a region's history be considered along with its geography? (1 point)

Answer / scoring: Human decisions and changes over time also shape communities.

3. Compare two Northeast states using a labeled map or table. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Two relevant shared/different features and clearly named sources/criteria.

4. How can broad plains support some types of farming? (1 point)

Answer / scoring: Flat land and suitable soils can support large fields, subject to climate/resources.

5. Why is the Midwest more than one kind of land or community? (1 point)

Answer / scoring: Regions include physical, cultural, and economic variation.

6. Compare a farm area and an urban area in the Midwest. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Land/resource use and economic connection; avoid assuming every place is identical.

7. Why compare Northeast and Midwest using common categories? (1 point)

Answer / scoring: It supports a fair, clear geographic comparison.

8. What is one shared need of communities in both regions? (1 point)

Answer / scoring: Water, food, transport, housing, work, or public services.

9. Construct a region-comparison chart. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). At least two common criteria, accurate similarities/differences, and a source note.

10. How can migration connect regions? (1 point)

Answer / scoring: People carry skills, ideas, relationships, and cultural practices as they move.

11. Why can people move for different reasons? (1 point)

Answer / scoring: Jobs, family, safety, education, and many other circumstances vary.

12. Model one movement between regions. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Origin/destination, possible reason, and a connection/effect; avoid claiming all migrants share one reason.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

Spanish - 12 points

Score: _____ / 12

Spanish model and vocabulary (cue support allowed)

Hoy hace frío y llueve.
Word bank: hace frío, hace calor, llueve, nieva, hace viento, hace sol.

1. Week 1: Translate it is cold into Spanish. (1 point)

Answer / scoring: Hace frío.

2. Week 2: Translate winter into Spanish. (1 point)

Answer / scoring: invierno / el invierno

3. Week 3: Write 3:00 in Spanish. (1 point)

Answer / scoring: Son las tres.

4. Week 4: Translate it is cold into Spanish. (1 point)

Answer / scoring: Hace frío.

5. Read the supplied Spanish model. Give its meaning in English. (2 points)

Answer / scoring: Today it is cold and raining.

6. Write one new correct sentence using vocabulary from this module. (2 points)

Answer / scoring: One point for relevant vocabulary; one for a meaningful correct sentence. Accept varied answers.

7. Oral task (teacher listens): Use 4 short statements or a 4-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Hoy hace frío y llueve. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.
