A Map for the Show

Original short script:
[Nora puts a blank map on the table.]
NORA: Our trip story needs a map.
ELI: I can mark the river, but I do not know where to put the mountains.
NORA: Let us compare two sources before we draw.
[They examine a book and a map key.]
ELI: Now I see how the symbols work.
NORA: We can explain our choices to the audience.
Narrator: The friends label their route and practice their presentation.

Comparison note: In Greek tradition, Hermes is a messenger associated with travel; the Roman god Mercury has similar roles. Their names differ, but the shared roles make a useful comparison.

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

# Science - 10 points

Score: _____ / 10

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How can human actions affect land or water? (1 point)

Answer / scoring: Land clearing, building, pollution, or restoration can change systems.

2. Why compare evidence before and after a change? (1 point)

Answer / scoring: It helps describe differences, though other factors may also influence them.

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W3 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 21 versus 13 in A; accept an accurate description without an unsupported causal claim.

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Show one impact and a possible improvement. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Clear cause/pathway, affected system, and realistic action supported by evidence.
