The Bridge Apprentice

In this original historical fiction, an apprentice watched an experienced builder inspect a Roman-style stone bridge. The apprentice wanted to remove the wooden supports as soon as the final stone was placed. "A finished appearance is not enough," the builder warned. He checked the arch and explained how its stones pressed against one another and transferred forces toward the supports. The apprentice grew impatient, but a cracked stone changed her mind. Together they replaced it and repeated the inspection. Later, the apprentice wrote that the delay had been the most important part of the work. The scene does not establish facts about a particular ancient builder; it uses an imagined conversation to explore patience and responsibility. Readers should distinguish the fictional characters from historical claims, such as the Romans' use of arches in engineering.
Background for comparison: Hermes in Greek tradition and Mercury in Roman tradition are messengers associated with travel.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

W3 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 23 temperature in degrees C; Trial B: 31 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. How do exothermic and endothermic reactions differ? (1 point)

2. Why can a reaction's surroundings change temperature? (1 point)

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

4. Use W3 data. State one observation without claiming its cause. (1 point)

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

6. Draw an energy-transfer model for each reaction type. (3 points)
