Grade 7 · Module 5 Comprehensive gap assessment - TEACHER ANSWER KEY

Scheduled: 2027-03-26 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 7.NS.2-3 | ELA: RL.7.1-10; RI.7.1-10; W.7.1-9; L.7.1-6; SL.7.1-6 (grade-level coverage; module skill targets below) | Science: E.7.9A.1-3 | Social Studies: MS CCRS SS Grade 7 - Byzantine/Islamic civilizations | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Writing and conventions · required gap check - 12 points

Score: _____ / 12

Two Sources for a Forecast

Fictional classroom sources: Source A, "Weather Log," by a student team, dated March 8, records local temperature, wind direction, and pressure at noon for five days. Source B, an unsigned advertisement dated March 8, says that one device "always predicts weather perfectly" but gives no measurements. A research group prefers Source A for describing what was actually observed. It still checks the team's instruments and method, because named authors and a date do not guarantee accuracy. The group writes a cautious forecast, separating data from inference. Its notes include each source's title, creator, date, and the particular information used. In its final explanation, it paraphrases the data instead of copying a paragraph and identifies its source. Readers can judge the explanation more easily because the evidence and its limits are visible.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Answer / scoring: 4-point rubric: two appropriate module skills identified (2), two accurate applications explained (2). Check against the module's listed learning goals.

Science - 28 points

Score: _____ / 28

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 12 milliliters of water collected; Trial B: 20 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How can weather observations vary within one region? (1 point)

Answer / scoring: Time, elevation, land cover, distance to water, and other factors differ.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

3. Compare short-term observations with long-term climate data. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct time scales, variables, and cautious inference.

4. What is a weather front? (1 point)

Answer / scoring: A boundary between air masses with different characteristics.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

6. Draw two air masses and a front with possible weather changes. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct boundary and plausible temperature/moisture changes; forecast is qualified, not certain.

7. Why combine satellite, radar, and surface data? (1 point)

Answer / scoring: They provide different scales and variables, improving interpretation.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

9. Plan a weather-data comparison. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Identify each source/variable, align times/locations, and discuss limits.

10. Why evaluate forecasts after the predicted period? (1 point)

Answer / scoring: It reveals accuracy, errors, and possible model improvements.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

12. Create a forecast evaluation plan. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Prediction, verification data, comparison metric, and revision/reflection.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

Social Studies - 24 points

Score: _____ / 24

W1 background: It continued the eastern Roman political tradition, with Constantinople as a central city. Its position connected important land/sea routes and offered strategic advantages. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: The Arabian Peninsula in the seventh century CE. Movement of people, texts, institutions, and contacts can carry ideas; mechanisms vary. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Mathematics, medicine, astronomy, philosophy, literature, or related fields. It helped preserve, compare, adapt, and extend knowledge from different traditions. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Travelers share ideas, techniques, beliefs, languages, and information. Power, conflict, and access can differ among participants. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What was the Byzantine Empire's connection to Rome? (1 point)

Answer / scoring: It continued the eastern Roman political tradition, with Constantinople as a central city.

2. Why did location matter for Constantinople? (1 point)

Answer / scoring: Its position connected important land/sea routes and offered strategic advantages.

3. Explain continuity and change in Byzantine history. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). One Roman continuity, one change, context, and evidence.

4. Where did Islam begin as a historical religious movement? (1 point)

Answer / scoring: The Arabian Peninsula in the seventh century CE.

5. How can trade and other networks help beliefs spread? (1 point)

Answer / scoring: Movement of people, texts, institutions, and contacts can carry ideas; mechanisms vary.

6. Map a route of cultural/religious exchange. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Accurate broad regions, a plausible mechanism, and limits; distinguish exchange from universal acceptance.

7. Name one field developed through scholarship in the Islamic Golden Age. (1 point)

Answer / scoring: Mathematics, medicine, astronomy, philosophy, literature, or related fields.

8. Why did translation matter to scholarship? (1 point)

Answer / scoring: It helped preserve, compare, adapt, and extend knowledge from different traditions.

9. Model a scholarly exchange. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Text/idea, translation/contact, new use/development, and acknowledgment of multiple contributors.

10. Why can trade carry more than goods? (1 point)

Answer / scoring: Travelers share ideas, techniques, beliefs, languages, and information.

11. Why is cultural exchange not always peaceful or equal? (1 point)

Answer / scoring: Power, conflict, and access can differ among participants.

12. Explain an exchange through a historical network. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Goods and ideas, participants, mechanism, and a benefit/unequal effect.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

Spanish - 12 points

Score: _____ / 12

Spanish model and vocabulary (cue support allowed)

Estudio por la mañana. Leo por la noche.
Word bank: estudiar, leer, comer, dormir, la mañana, la noche.

1. Week 1: Translate to study into Spanish. (1 point)

Answer / scoring: estudiar

2. Week 2: Complete: Yo ___ español. (hablar, present tense) (1 point)

Answer / scoring: hablo

3. Week 3: Translate to study into Spanish. (1 point)

Answer / scoring: estudiar

4. Week 4: Translate to study into Spanish. (1 point)

Answer / scoring: estudiar

5. Read the supplied Spanish model. Give its meaning in English. (2 points)

Answer / scoring: I study in the morning. I read at night.

6. Write one new correct sentence using vocabulary from this module. (2 points)

Answer / scoring: One point for relevant vocabulary; one for a meaningful correct sentence. Accept varied answers.

7. Oral task (teacher listens): Use 6-8 short statements or a 6-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Estudio por la mañana. Leo por la noche. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.
