Grade 7 · Module 7 Comprehensive gap assessment

Scheduled: 2027-05-21 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Student: _____ Date completed: _____

Math: 7.SP.1-8 | ELA: RL.7.1-10; RI.7.1-10; W.7.1-9; L.7.1-6; SL.7.1-6 (grade-level coverage; module skill targets below) | Science: E.7.9 + integrated practices | Social Studies: MS CCRS SS Grade 7 - Medieval Europe | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Writing and conventions · required gap check - 12 points

Score: _____ / 12

After the Storm

Original poem:
The street unrolls its silver thread,
The restless clouds move overhead.
A window holds the fading light;
A branch writes slowly into night.
I count the drops that leave the leaves,
And hear the roof repeat its eaves.
The storm has gone; its quiet trace
Still draws a map across this place.

Prose companion: Rainwater remains on leaves and the street after a storm. Clouds move away as evening approaches. A person observes these remaining signs of the weather. The prose summarizes observable conditions; the poem uses images to create a reflective mood.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Science - 28 points

Score: _____ / 28

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 12 milliliters of water collected; Trial B: 20 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Why are Earth-system boundaries useful but not absolute barriers? (1 point)

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

3. Draw an Earth-system interaction model. (3 points)

4. What do closely spaced contour lines usually indicate? (1 point)

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

6. Sketch a hill with contour lines and explain a weather/geography connection. (3 points)

7. Why compare alternative explanations for a change? (1 point)

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

9. Model one human impact and an alternative explanation. (3 points)

10. Why distinguish uncertainty from an error? (1 point)

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

12. Write a data-based claim-evidence-reasoning outline. (3 points)

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Social Studies - 24 points

Score: _____ / 24

W1 background: Feudal ties concern political/military obligations; manorial life concerns an estate's economic/social organization; both varied. It provided resources, livelihoods, and a basis for obligations/control. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Religious practices, education, institutions, art, and political relationships affected life. People and communities varied by place, status, belief, and period. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Religious, political, military, and economic motives/interests interacted. Participants and affected communities had different experiences and purposes. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Markets, crafts, urban institutions, and networks expanded opportunities and tensions. No; local conditions and histories differed. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How are feudal ties and manorial life different concepts? (1 point)

2. Why did land matter to medieval power and work? (1 point)

3. Compare a lord's and a peasant's roles on a manor. (3 points)

4. How could the medieval Church influence European culture? (1 point)

5. Why should one institution not stand for every medieval experience? (1 point)

6. Analyze a cultural institution's role. (3 points)

7. What broad factors were involved in the Crusades? (1 point)

8. Why should Crusades be studied from multiple perspectives? (1 point)

9. Compare two perspectives on medieval conflict/exchange. (3 points)

10. How could towns and trade change medieval economic life? (1 point)

11. Did every region change at the same speed or in the same way? (1 point)

12. Model a transition from rural estate life to urban trade. (3 points)

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Spanish - 12 points

Score: _____ / 12

Spanish model and vocabulary (cue support allowed)

Sigue todo recto y gira a la derecha.
Word bank: a la derecha, a la izquierda, todo recto, cerca, lejos, la calle.

1. Week 1: Translate library into Spanish. (1 point)

2. Week 2: Translate to the left into Spanish. (1 point)

3. Week 3: Complete: Yo ___ a leer mañana. (1 point)

4. Week 4: Translate to the left into Spanish. (1 point)

5. Read the supplied Spanish model. Give its meaning in English. (2 points)

6. Write one new correct sentence using vocabulary from this module. (2 points)

7. Oral task (teacher listens): Use 6-8 short statements or a 6-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)
