Grade 7 - Student Assessment Book

2026-2027 | Module 1 starts October 12, 2026

27 weekly quizzes + 9 end-of-module comprehensive tests. Weekly quizzes are scheduled in Weeks 1-3; Week 4 uses the module test. The final module assessment is July 16, 2027.

Print only the assessment you need. Individual student papers and teacher keys are available at https://venvlearning.com/planner. The planner calendar also offers printable daily lesson packets.

Suggested administration: split longer weekly papers into subject blocks if needed; complete module tests in 2-3 sittings. Keep supports consistent with instruction. All passages and questions are original; the supplied background notes and invented data are labeled.

Scoring: points appear on each question. Section totals are printed. Use the teacher keys for exact answers and rubrics. Percentage = points earned / section points x 100. Retain corrections and reteach missed goals. The planner's suggested quiz/test weighting may be used for grade records.

Alignment follows the supplied Mississippi-aligned curriculum planner. The papers are instructional assessments, not state-published exams.

Grade 7 - Module 1 Week 1 Quiz

Scheduled: 2026-10-16 | Current-week goals + math spiral review; science/social studies alternate

Student: _____ Date completed: _____

Math: 7.NS.1-3 | ELA: RL.7.1-3; RI.7.1-2; L.7.1-2,4-6 | Science: L.7.3 | Social Studies: MS CCRS SS Grade 7 Early World History - prehistory/Mesopotamia | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Math - 9 points

Score: _____ / 9

1. -6 + 13 = ? (1 point)

2. 6 - 15 = ? (1 point)

3. -3/4 + 1/2 = ? (1 point)

4. -1.25 - 0.75 = ? (1 point)

5. A temperature is -6 degrees C and rises 10 degrees. New temperature? (1 point)

6. A bank balance is $12.50. A $20.75 purchase is recorded. Find the new balance and explain its sign. (2 points)

7. Spiral review: -5 + 11 = ? (1 point)

8. Spiral review: Write 3/4 as a decimal. (1 point)

ELA - 13 points

Score: _____ / 13

A Pond Study

A class studied a small pond near its school. Students recorded water temperature, counted visible organisms from the bank, and drew a model of a food web. Because the first visit happened after rain, they wondered whether that single visit represented typical conditions. They returned at the same time of day during three later weeks. Their records were not identical. One student wanted to erase the unusual measurements, but her partner argued that differences could be useful evidence. The group kept the records and described the limits of its method: it had observed only one pond and had not counted organisms beneath the water. Their report distinguished observations from explanations. "We saw fewer insects" was an observation; "the cooler temperature caused the change" was a hypothesis that needed further testing. The study taught the class that careful questions are as important as confident conclusions.

1. Identify the dependent clause: "Although it rained, we recorded the temperature." (1 point)

2. Identify the independent clause in that same sentence. (1 point)

3. Combine "It rained" and "We continued" into a complex sentence. (1 point)

4. Explain why "When the class arrived" is a fragment alone. (2 points)

5. Why is the statement about cooler temperature a hypothesis rather than an observation? (1 point)

6. Give two limits of the study. (1 point)

7. Correct this misspelling: libary. (1 point)

8. Write two organized paragraphs (at least 8 sentences total) about the passage's main message. Use two accurate details, explain their connection, and edit sentences and spelling. (5 points)

Science - 10 points

Score: _____ / 10

W1 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 9 distinct species observed; Trial B: 15 distinct species observed. These are invented assessment data, not a claim about a real investigation.

1. How does carbon move from atmosphere into living plants? (1 point)

2. Why is the water cycle a cycle rather than a one-way path? (1 point)

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

4. Use W1 data. State one observation without claiming its cause. (1 point)

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

6. Model water and carbon movement in an ecosystem. (3 points)

Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Hola. Me llamo Ana. ¿Cómo te llamas?
Word bank: hola, adiós, gracias, por favor, buenos días, hasta luego.

1. Translate into English: hola. (1 point)

2. Translate into Spanish: goodbye. (1 point)

3. Complete: Me ___ Ana. (My name is Ana.) (1 point)

4. Oral task (teacher listens): Use 3 short statements or a 3-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Should the School Reduce Plastic?

The student council proposed replacing some single-use lunch packaging with reusable containers. Its argument began with a clear claim: the school should run a four-week trial before making a permanent purchase. The council's fictional classroom survey found that 72 of 120 respondents supported the trial. A second source, a cafeteria cost table, estimated that washing reusable containers would require additional time. Supporters argued that the trial could measure both waste and labor instead of assuming that one benefit settled the whole question. Critics worried about lost containers and unequal access to supplies. The proposal responded by lending containers during the trial and counting losses. The council did not claim that a survey proved the policy would work. It used the survey to show interest and proposed collecting direct evidence of costs and waste.

1. State a central idea or theme of the passage. (1 point)

2. Give a detail that supports that idea. (1 point)

3. Explain how a second detail adds to the idea. (1 point)

4. Explain how the ending or final statement develops the passage's message. (2 points)

5. What does the survey support, and what does it not prove? (1 point)

6. How does the proposal address a concern about access? (1 point)

7. Correct this misspelling: carefull. (1 point)

8. Write two organized paragraphs (at least 8 sentences total) stating an opinion or argument related to the supplied passage. Give two reasons and relevant evidence; use a transition and a conclusion. (5 points)

Score: _____ / 13

Should the School Reduce Plastic?

The student council proposed replacing some single-use lunch packaging with reusable containers. Its argument began with a clear claim: the school should run a four-week trial before making a permanent purchase. The council's fictional classroom survey found that 72 of 120 respondents supported the trial. A second source, a cafeteria cost table, estimated that washing reusable containers would require additional time. Supporters argued that the trial could measure both waste and labor instead of assuming that one benefit settled the whole question. Critics worried about lost containers and unequal access to supplies. The proposal responded by lending containers during the trial and counting losses. The council did not claim that a survey proved the policy would work. It used the survey to show interest and proposed collecting direct evidence of costs and waste.

1. Name one text structure used in the passage. (1 point)

2. Identify words or events that show that structure. (1 point)

3. How does organizing ideas help a reader? (1 point)

4. Make a three-part outline of the passage. (2 points)

5. What does the survey support, and what does it not prove? (1 point)

6. How does the proposal address a concern about access? (1 point)

7. Correct this misspelling: carefull. (1 point)

8. Write two organized paragraphs (at least 8 sentences total) stating an opinion or argument related to the supplied passage. Give two reasons and relevant evidence; use a transition and a conclusion. (5 points)

Social Studies - 10 points

Arachne: an Original Retelling

This original retelling draws on the traditional myth. Arachne was a talented weaver who took great pride in her work. When people praised her skill, she insisted that no teacher or goddess deserved any credit. Athena, associated with wisdom and crafts, approached in disguise and advised her to speak with humility. Arachne dismissed the advice and demanded a contest. The two wove remarkable pictures, but their conflict involved more than technical skill: Arachne's attitude challenged the goddess's authority. In the traditional ending, Athena transformed Arachne into a spider, forever connected with weaving. Readers can admire Arachne's ability while questioning her boastfulness and the severity of the punishment. The story invites discussion of pride, power, artistic skill, and the consequences of refusing advice. A theme is a reasoned interpretation, not simply the name of a topic.

1. State a central idea or theme of the passage. (1 point)

2. Give a detail that supports that idea. (1 point)

3. Explain how a second detail adds to the idea. (1 point)

4. Explain how the ending or final statement develops the passage's message. (2 points)

5. What evidence shows that Arachne refuses advice? (1 point)

6. Why can a reader admire Arachne and still criticize her behavior? (1 point)

7. Correct this misspelling: becuase. (1 point)

8. Write two organized paragraphs (at least 8 sentences total) about the passage's main message. Use two accurate details, explain their connection, and edit sentences and spelling. (5 points)

Arachne: an Original Retelling

This original retelling draws on the traditional myth. Arachne was a talented weaver who took great pride in her work. When people praised her skill, she insisted that no teacher or goddess deserved any credit. Athena, associated with wisdom and crafts, approached in disguise and advised her to speak with humility. Arachne dismissed the advice and demanded a contest. The two wove remarkable pictures, but their conflict involved more than technical skill: Arachne's attitude challenged the goddess's authority. In the traditional ending, Athena transformed Arachne into a spider, forever connected with weaving. Readers can admire Arachne's ability while questioning her boastfulness and the severity of the punishment. The story invites discussion of pride, power, artistic skill, and the consequences of refusing advice. A theme is a reasoned interpretation, not simply the name of a topic.

1. State a central idea or theme of the passage. (1 point)

2. Give a detail that supports that idea. (1 point)

3. Choose: Each of the notebooks (is/are) labeled. (1 point)

4. Choose: The students and teacher (reads/read) together. (1 point)

5. In "Maya found her book," what is the antecedent of her? (1 point)

6. Replace "Leo and I" with one subject pronoun. (1 point)

7. State a central idea or theme of the passage. (1 point)

8. Give a detail that supports that idea. (1 point)

9. What evidence shows that Arachne refuses advice? (1 point)

10. Why can a reader admire Arachne and still criticize her behavior? (1 point)

11. Correct this misspelling: becuase. (1 point)

12. Write two organized paragraphs (at least 8 sentences total) about the passage's main message. Use two accurate details, explain their connection, and edit sentences and spelling. Include one reflection about how your interpretation might differ from another reader's. (5 points)

Score: _____ / 13

The Bridge Apprentice

In this original historical fiction, an apprentice watched an experienced builder inspect a Roman-style stone bridge. The apprentice wanted to remove the wooden supports as soon as the final stone was placed. "A finished appearance is not enough," the builder warned. He checked the arch and explained how its stones pressed against one another and transferred forces toward the supports. The apprentice grew impatient, but a cracked stone changed her mind. Together they replaced it and repeated the inspection. Later, the apprentice wrote that the delay had been the most important part of the work. The scene does not establish facts about a particular ancient builder; it uses an imagined conversation to explore patience and responsibility. Readers should distinguish the fictional characters from historical claims, such as the Romans' use of arches in engineering.

1. Identify a character or participant and a challenge in the passage. (1 point)

2. What does pacing mean in a narrative? (1 point)

3. Write a transition that shows time order. (1 point)

4. Write a brief imagined continuation with a logical sequence and a descriptive detail. (2 points)

5. Which event changes the apprentice's attitude? (1 point)

6. Name one fictional element and one historical idea in the passage. (1 point)

7. Correct this misspelling: diffrent. (1 point)

8. Write an original short narrative of two organized paragraphs (at least 8 sentences total) about solving a problem. Include a clear sequence, a setting, one descriptive detail, and an action or line of dialogue. Edit conventions. (5 points)

Score: _____ / 24

W1 background: Sea and land routes connected trade, movement, and political control. Stories can express identity but are not automatically factual records. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: They can affect customs, roles, access, and expectations, with variation over time. Elite records may not represent the experience of all people. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: A republic uses institutions of public/representative rule; an empire rules over multiple peoples/territories, often with centralized authority; categories can overlap. Institutions and power changed across periods rather than remaining fixed. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: They supported movement, administration, trade, and water supply. No; interacting political, military, economic, and other factors matter. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How did the Mediterranean location support Rome's connections? (1 point)

2. Why distinguish founding traditions from historical evidence? (1 point)

3. Compare a founding story with material/written evidence. (3 points)

4. How can religion and social status shape daily life? (1 point)

5. Why compare accounts from different social positions? (1 point)

6. Analyze a Roman daily-life account. (3 points)

7. How does a republic differ from an empire as broad political concepts? (1 point)

8. Why must Roman political changes be placed on a timeline? (1 point)

9. Compare Roman republican and imperial power. (3 points)

10. Why were roads and aqueducts important to Roman power and life? (1 point)

11. Can one cause explain the fall of the western Roman Empire fully? (1 point)

12. Model a Roman legacy and a limitation of a single-cause explanation. (3 points)

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Two Sources for a Forecast

Fictional classroom sources: Source A, "Weather Log," by a student team, dated March 8, records local temperature, wind direction, and pressure at noon for five days. Source B, an unsigned advertisement dated March 8, says that one device "always predicts weather perfectly" but gives no measurements. A research group prefers Source A for describing what was actually observed. It still checks the team's instruments and method, because named authors and a date do not guarantee accuracy. The group writes a cautious forecast, separating data from inference. Its notes include each source's title, creator, date, and the particular information used. In its final explanation, it paraphrases the data instead of copying a paragraph and identifies its source. Readers can judge the explanation more easily because the evidence and its limits are visible.

1. Write a focused research question connected to the passage. (1 point)

2. Name two different kinds of sources that could help answer it. (1 point)

3. Why should a researcher record a source's creator and title? (1 point)

4. Explain how to narrow a research topic that is too broad. (2 points)

5. Why is Source A a better basis for this investigation than Source B? (1 point)

6. Why should researchers still check Source A's method? (1 point)

7. Correct this misspelling: enviroment. (1 point)

8. Write two organized paragraphs (at least 8 sentences total) explaining an important idea from the supplied passage. Paraphrase two relevant details and credit the supplied passage as your source. (5 points)

An Argument for Trees

A community group argues that a school should plant trees near its outdoor learning area. Its claim is narrower than "trees solve every problem": a carefully chosen location may provide shade and support habitat. The group presents a fictional class data table comparing temperatures at a sunny spot and a shaded spot. It also acknowledges counterarguments: planting and watering cost money, and roots or branches may interfere with structures. Its proposal recommends consulting knowledgeable staff, selecting a suitable location, and comparing costs before planting. An effective response to a counterargument does not mock the people who raise it. Instead, it explains how the plan addresses a reasonable concern or why the evidence supports a different choice. The final paragraph asks the school to try a manageable plan and report the results.

1. Write a defensible claim about the passage. (1 point)

2. Quote or paraphrase one supporting detail. (1 point)

3. Explain why unsupported opinion is weaker than evidence. (1 point)

4. Support your claim with two details and reasoning. (2 points)

5. How is the claim limited rather than absolute? (1 point)

6. What are two counterarguments named in the passage? (1 point)

7. Correct this misspelling: evidance. (1 point)

8. Write two organized paragraphs (at least 8 sentences total) stating an opinion or argument related to the supplied passage. Give two reasons and relevant evidence; use a transition and a conclusion. (5 points)

An Argument for Trees

A community group argues that a school should plant trees near its outdoor learning area. Its claim is narrower than "trees solve every problem": a carefully chosen location may provide shade and support habitat. The group presents a fictional class data table comparing temperatures at a sunny spot and a shaded spot. It also acknowledges counterarguments: planting and watering cost money, and roots or branches may interfere with structures. Its proposal recommends consulting knowledgeable staff, selecting a suitable location, and comparing costs before planting. An effective response to a counterargument does not mock the people who raise it. Instead, it explains how the plan addresses a reasonable concern or why the evidence supports a different choice. The final paragraph asks the school to try a manageable plan and report the results.

1. Write a defensible claim about the passage. (1 point)

2. Quote or paraphrase one supporting detail. (1 point)

3. Explain why unsupported opinion is weaker than evidence. (1 point)

4. Support your claim with two details and reasoning. (2 points)

5. How is the claim limited rather than absolute? (1 point)

6. What are two counterarguments named in the passage? (1 point)

7. Correct this misspelling: evidance. (1 point)

8. Write two organized paragraphs (at least 8 sentences total) stating an opinion or argument related to the supplied passage. Give two reasons and relevant evidence; use a transition and a conclusion. (5 points)

After the Storm

Original poem:
The street unrolls its silver thread,
The restless clouds move overhead.
A window holds the fading light;
A branch writes slowly into night.
I count the drops that leave the leaves,
And hear the roof repeat its eaves.
The storm has gone; its quiet trace
Still draws a map across this place.

Prose companion: Rainwater remains on leaves and the street after a storm. Clouds move away as evening approaches. A person observes these remaining signs of the weather. The prose summarizes observable conditions; the poem uses images to create a reflective mood.

1. What is a stanza? (1 point)

2. Identify a rhyming pair in the supplied poem. (1 point)

3. Identify and explain a figurative phrase from the poem. (1 point)

4. Explain how one word or image helps create the poem's mood. (2 points)

5. Explain the image "a branch writes slowly into night." (1 point)

6. How do the poem and prose present the same event differently? (1 point)

7. Correct this misspelling: weathar. (1 point)

8. Write two organized paragraphs (at least 8 sentences total) comparing the poem with its prose companion. Use a detail from each, explain their effects, and edit conventions. (5 points)

1. Find 25% of $80. (1 point)

2. A $60 jacket is 25% off. Sale price? (1 point)

3. A $50 purchase has 8% tax. Total? (1 point)

4. A price rises from $40 to $50. Percent increase? (1 point)

5. A $30 item is marked up by 20%. New price? (1 point)

6. A $100 item is discounted 20%, then taxed 5% on the sale price. Show the final cost. (2 points)

7. Table: x = 1, 2, 3; y = 6, 12, 18. Find constant k in y = kx. (1 point)

8. For y = 6x, find y when x = 7. (1 point)

9. For y = 6x, what does the graph point (1, 6) mean? (1 point)

10. Is y = 3x + 2 proportional? Explain. (1 point)

11. A proportional graph passes through (2, 10). What is y when x = 6? (1 point)

12. Plot (0,0), (1,6), and (3,18). Explain how the graph shows proportionality. (2 points)

13. A club costs $8 plus $3 per visit. With a $35 budget, write and solve an inequality. (1 point)

14. A worker earns $5 per hour. How many hours earn $40? Write an equation. (1 point)

15. Savings begin at $15 and grow by $4 weekly. When do they reach $47? (1 point)

16. A fee is $4 plus $2 per item. Total is $18. Find the number of items. (1 point)

17. Does 10 visits satisfy an $8 membership plus $3 per visit budget of $35? (1 point)

18. You have $5 and earn $10 per hour. Write and solve an inequality to have at least $85. Explain the solution. (2 points)

19. Table: x = 1, 2, 3; y = 3, 6, 9. Find constant k in y = kx. (1 point)

20. For y = 3x, find y when x = 7. (1 point)

21. For y = 3x, what does the graph point (1, 3) mean? (1 point)

22. Is y = 3x + 2 proportional? Explain. (1 point)

23. A proportional graph passes through (2, 10). What is y when x = 6? (1 point)

24. Plot (0,0), (1,3), and (3,9). Explain how the graph shows proportionality. (2 points)

After the Storm

Original poem:
The street unrolls its silver thread,
The restless clouds move overhead.
A window holds the fading light;
A branch writes slowly into night.
I count the drops that leave the leaves,
And hear the roof repeat its eaves.
The storm has gone; its quiet trace
Still draws a map across this place.

Prose companion: Rainwater remains on leaves and the street after a storm. Clouds move away as evening approaches. A person observes these remaining signs of the weather. The prose summarizes observable conditions; the poem uses images to create a reflective mood.

1. What is a stanza? (1 point)

2. Identify a rhyming pair in the supplied poem. (1 point)

3. Name an idea shared by the poem and prose companion. (1 point)

4. How does their language differ? (1 point)

5. Correct "Their going to the library." (1 point)

6. Correct "The students was ready." (1 point)

7. State a central idea or theme of the passage. (1 point)

8. Give a detail that supports that idea. (1 point)

9. Explain the image "a branch writes slowly into night." (1 point)

10. How do the poem and prose present the same event differently? (1 point)

11. Correct this misspelling: weathar. (1 point)

12. Write two organized paragraphs (at least 8 sentences total) comparing the poem with its prose companion. Use a detail from each, explain their effects, and edit conventions. Include one reflection about how your interpretation might differ from another reader's. (5 points)

The Printer's Workshop

Original drama:
[An apprentice arranges metal type on a table.]
APPRENTICE: If we print the same page many times, will every reader agree with it?
PRINTER: Copies spread words, not agreement.
APPRENTICE: Then accuracy matters before the first copy.
[The printer points to a misplaced letter.]
PRINTER: And readers must question what they read.

Informational companion: In early modern Europe, printing made it possible to reproduce texts more quickly than copying each one by hand. Printed works helped ideas circulate, including religious, scientific, and artistic arguments. Access remained uneven; not everyone could read or obtain books. Greater circulation did not guarantee that every claim was true. Scholars therefore needed observation, reasoning, and the comparison of sources as well as access to texts.

1. What do stage directions tell a performer? (1 point)

2. How is dialogue different from narration? (1 point)

3. Identify one stage direction in the supplied script. (1 point)

4. Explain one way an actor could show uncertainty without changing the words. (2 points)

5. Why does the printer say that copies do not spread agreement? (1 point)

6. Identify one limitation of printing discussed in the companion text. (1 point)

7. Correct this misspelling: communacate. (1 point)

8. Write two organized paragraphs (at least 8 sentences total) about the passage's main message. Use two accurate details, explain their connection, and edit sentences and spelling. (5 points)

Spanish model and vocabulary (cue support allowed)

Hola. Me llamo Ana. Me gusta leer.
Word bank: hola, el libro, la familia, la comida, hace sol, estudiar.

1. Week 1: Complete: Yo ___ un libro. (have) (1 point)

2. Week 2: Translate the country into Spanish. (1 point)

3. Week 3: Translate the country into Spanish. (1 point)

4. Week 4: Complete: Me ___ Ana. (1 point)

5. Read the supplied Spanish model. Give its meaning in English. (2 points)

6. Write one new correct sentence using vocabulary from this module. (2 points)

7. Oral task (teacher listens): Use 6-8 short statements or a 6-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Grade 7 - Module 9 Week 1 Quiz

Scheduled: 2027-06-25 | Current-week goals + math spiral review; science/social studies alternate

Student: _____ Date completed: _____

Math: Cumulative Grade 7 MS CCRS + Mathematical Practices | ELA: W.7.1-9; SL.7.4-6; cumulative RL/RI/L | Science: Cumulative L.7.3; P.7.5; E.7.9 | Social Studies: MS CCRS SS Grade 7 Early World History - Exploration/Enlightenment | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Math - 9 points

Score: _____ / 9

1. Simplify the ratio 18:24. (1 point)

2. -5/6 + 1/3 = ? (1 point)

3. Three pounds cost $7.50. Unit price? (1 point)

4. Find 15% of 80. (1 point)

5. For y = 4x, find y when x = 9. (1 point)

6. A recipe uses 2 cups flour for 3 cups oats. For 12 cups oats, find flour and explain proportionality. (2 points)

7. Spiral review: -5 + 19 = ? (1 point)

8. Spiral review: Write 3/4 as a decimal. (1 point)

ELA - 13 points

Score: _____ / 13

A History Portfolio

A student created a portfolio about how travel and communication changed societies. She began with a research question rather than a list of famous people: How did networks connect communities, and whose experiences were left out of the usual accounts? She compared a map, a trade-route reading, and a translated historical account. Her notes separated quotations, paraphrases, and her own interpretations. When two accounts disagreed, she recorded their authors, purposes, and contexts instead of choosing the more dramatic version. The final presentation used a timeline but did not imply that every change happened everywhere at once. It included an argument supported by evidence and a section explaining limitations. The student concluded that a strong portfolio shows not only a polished product but also how the researcher checked and revised the work.

1. Write a focused research question connected to the passage. (1 point)

2. Name two different kinds of sources that could help answer it. (1 point)

3. Why should a researcher record a source's creator and title? (1 point)

4. Explain how to narrow a research topic that is too broad. (2 points)

5. What does the student do when accounts disagree? (1 point)

6. Why does the timeline need explanation? (1 point)

7. Correct this misspelling: conclution. (1 point)

8. Write two organized paragraphs (at least 8 sentences total) about the passage's main message. Use two accurate details, explain their connection, and edit sentences and spelling. (5 points)

Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How do matter cycles differ from energy flow through an ecosystem? (1 point)

2. Why frame a capstone around a focused question? (1 point)

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

4. Use W1 data. State one observation without claiming its cause. (1 point)

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

6. Plan a systems/cycles capstone. (3 points)
