Grade 4 - Module 2 Week 1 Quiz - TEACHER ANSWER KEY

Scheduled: 2026-11-13 | Current-week goals + math spiral review; science/social studies alternate

Math: 4.OA.1-5; 4.NBT.5-6 | ELA: RI.4.1-5; W.4.2; L.4.1,4-6 | Science: L.4.1-2 | Social Studies: MS CCRS SS Grade 4 - Mississippi Studies & Regions | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Math - 9 points

Score: _____ / 9

1. List all factor pairs of 20. (1 point)

Answer / scoring: 1 and 20; 2 and 10; 4 and 5

2. Write the first four positive multiples of 4. (1 point)

Answer / scoring: 4, 8, 12, 16

3. Is 17 prime or composite? (1 point)

Answer / scoring: Prime

4. Is 21 prime or composite? Give a factor pair other than 1 and 21. (1 point)

Answer / scoring: Composite; 3 and 7

5. Jo has 4 cards. Ana has 4 times as many. How many does Ana have? (1 point)

Answer / scoring: 16

6. Explain the difference between a factor and a multiple using 3 and 12. (2 points)

Answer / scoring: 3 is a factor of 12 because 3 x 4 = 12; 12 is a multiple of 3. A factor divides a number evenly; multiples result from multiplying.

7. Spiral review: 21 + 7 = ? (1 point)

Answer / scoring: 28

8. Spiral review: 5 x 6 = ? (1 point)

Answer / scoring: 30

ELA - 13 points

Score: _____ / 13

The School Butterfly Box

The class watched a butterfly develop. At first, tiny eggs rested on a leaf. Caterpillars hatched and ate plant material. Later, each caterpillar formed a chrysalis. Finally, an adult butterfly emerged. Students recorded dates and made drawings instead of touching the animals. One student wrote that a butterfly is simply a small bird. The teacher asked the class to check its evidence. Their notes showed an insect with six legs, not a bird with two. Careful records helped them correct the mistake. Watching one animal did not tell them everything about every butterfly, but it gave them a useful beginning.

1. Change "We walk" to past tense. (1 point)

Answer / scoring: We walked.

2. Choose: Yesterday the class (study/studied) weather. (1 point)

Answer / scoring: studied

3. Correct "The students reads every day." (1 point)

Answer / scoring: The students read every day.

4. Write a sentence in future tense using will. (2 points)

Answer / scoring: Accept a complete sentence with will + base verb, e.g., "I will read tomorrow."

5. Why did students record dates and drawings? (1 point)

Answer / scoring: To preserve observations/evidence of the life cycle.

6. Which detail shows the butterfly is an insect rather than a bird? (1 point)

Answer / scoring: The adult has six legs; the comparison in the passage contrasts this with a bird's two legs.

7. Correct this misspelling: carefull. (1 point)

Answer / scoring: careful

8. Write one organized paragraph (4-6 sentences) about the passage's main message. Use two accurate details, explain their connection, and edit sentences and spelling. (5 points)

Answer / scoring: Rubric: clear relevant main idea/claim (1); two accurate supporting details (1 each); reasoning/organization (1); readable complete sentences and conventions (1). Accept defensible interpretations, not just the sample central idea: Observations help students understand a life cycle and correct mistakes.

Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares pulse counts at rest and after activity. Trial A: 71 pulse counts in one minute; Trial B: 101 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

1. Why does the heart beat faster during activity? (1 point)

Answer / scoring: Working tissues need increased transport of oxygen and nutrients.

2. How do lungs and circulation work together? (1 point)

Answer / scoring: Lungs exchange gases; circulation carries oxygen to tissues and returns carbon dioxide.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 30 pulse counts in one minute.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 101 versus 71 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Show the path from breathing to oxygen delivery to a muscle. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Lungs to blood/circulation to muscle; clear labels and arrows.

Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Hoy es lunes. Estamos en octubre.
Word bank: lunes, martes, viernes, enero, octubre, mes.

1. Translate into English: lunes. (1 point)

Answer / scoring: Monday

2. Translate into Spanish: Tuesday. (1 point)

Answer / scoring: martes; accept appropriate article/gender variants when meaning is correct.

3. Complete: Hoy es ___ . (Today is Friday.) (1 point)

Answer / scoring: viernes

4. Oral task (teacher listens): Use 2 short statements or a 2-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Hoy es lunes. Estamos en octubre. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.
