Grade 4 - Module 2 Week 3 Quiz - TEACHER ANSWER KEY

Scheduled: 2026-12-04 | Current-week goals + math spiral review; science/social studies alternate

Math: 4.OA.1-5; 4.NBT.5-6 | ELA: RI.4.1-5; W.4.2; L.4.1,4-6 | Science: L.4.1-2 | Social Studies: MS CCRS SS Grade 4 - Mississippi Studies & Regions | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Math - 9 points

Score: _____ / 9

1. 178 x 16 = ? (1 point)

Answer / scoring: 2848

2. 185 x 16 = ? (1 point)

Answer / scoring: 2960

3. 202 x 16 = ? (1 point)

Answer / scoring: 3232

4. 213 x 16 = ? (1 point)

Answer / scoring: 3408

5. 279 x 16 = ? (1 point)

Answer / scoring: 4464

6. Show an area model or expanded-parts method for 178 x 16. (2 points)

Answer / scoring: Parts must sum to 2848. Example: (100 + 78) x 16; partial products and total correctly shown.

7. Spiral review: 23 + 7 = ? (1 point)

Answer / scoring: 30

8. Spiral review: 7 x 6 = ? (1 point)

Answer / scoring: 42

ELA - 13 points

Score: _____ / 13

The School Butterfly Box

The class watched a butterfly develop. At first, tiny eggs rested on a leaf. Caterpillars hatched and ate plant material. Later, each caterpillar formed a chrysalis. Finally, an adult butterfly emerged. Students recorded dates and made drawings instead of touching the animals. One student wrote that a butterfly is simply a small bird. The teacher asked the class to check its evidence. Their notes showed an insect with six legs, not a bird with two. Careful records helped them correct the mistake. Watching one animal did not tell them everything about every butterfly, but it gave them a useful beginning.

1. State a central idea or theme of the passage. (1 point)

Answer / scoring: Observations help students understand a life cycle and correct mistakes.

2. Give a detail that supports that idea. (1 point)

Answer / scoring: To preserve observations/evidence of the life cycle.

3. Explain how a second detail adds to the idea. (1 point)

Answer / scoring: The adult has six legs; the comparison in the passage contrasts this with a bird's two legs.; explain a logical connection.

4. Explain how the ending or final statement develops the passage's message. (2 points)

Answer / scoring: Observations help students understand a life cycle and correct mistakes.; include a relevant final detail and a logical explanation.

5. Why did students record dates and drawings? (1 point)

Answer / scoring: To preserve observations/evidence of the life cycle.

6. Which detail shows the butterfly is an insect rather than a bird? (1 point)

Answer / scoring: The adult has six legs; the comparison in the passage contrasts this with a bird's two legs.

7. Correct this misspelling: carefull. (1 point)

Answer / scoring: careful

8. Write one organized paragraph (4-6 sentences) about the passage's main message. Use two accurate details, explain their connection, and edit sentences and spelling. (5 points)

Answer / scoring: Rubric: clear relevant main idea/claim (1); two accurate supporting details (1 each); reasoning/organization (1); readable complete sentences and conventions (1). Accept defensible interpretations, not just the sample central idea: Observations help students understand a life cycle and correct mistakes.

Science - 10 points

Score: _____ / 10

W3 data: A fictional class compares pulse counts at rest and after activity. Trial A: 73 pulse counts in one minute; Trial B: 103 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

1. What are common stages in a flowering plant life cycle? (1 point)

Answer / scoring: Seed, germination, growth, flowering, and new seed production.

2. How does a butterfly life cycle differ from simple growth in size? (1 point)

Answer / scoring: It includes distinct stages: egg, larva, pupa, and adult.

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 30 pulse counts in one minute.

4. Use W3 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 103 versus 73 in A; accept an accurate description without an unsupported causal claim.

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draw and compare a flowering plant and butterfly life cycle. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct labeled stages and one similarity/difference; arrows show the cycle.

Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Por favor, abre el libro. Gracias.
Word bank: por favor, gracias, perdón, escucha, abre, lee.

1. Translate into English: por favor. (1 point)

Answer / scoring: please

2. Translate into Spanish: thank you. (1 point)

Answer / scoring: gracias; accept appropriate article/gender variants when meaning is correct.

3. Complete: ___, abre el libro. (Please, open the book.) (1 point)

Answer / scoring: Por favor

4. Oral task (teacher listens): Use 2 short statements or a 2-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Por favor, abre el libro. Gracias. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.
