Grade 4 - Module 5 Week 3 Quiz - TEACHER ANSWER KEY

Scheduled: 2027-03-12 | Current-week goals + math spiral review; science/social studies alternate

Math: 4.NF.5-7 | ELA: RI.4.5-9; W.4.2,7-8; L.4.4-6 | Science: P.4.6A-C; engineering design | Social Studies: MS CCRS SS Grade 4 - regions/geography/economics | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Math - 9 points

Score: _____ / 9

1. Insert <, >, or =: 0.7 ___ 0.67. (1 point)

Answer / scoring: >

2. Insert <, >, or =: 0.25 ___ 0.52. (1 point)

Answer / scoring: <

3. Insert <, >, or =: 0.40 ___ 0.4. (1 point)

Answer / scoring: =

4. Insert <, >, or =: 0.08 ___ 0.8. (1 point)

Answer / scoring: <

5. Order: 0.09, 0.9, 0.19. (1 point)

Answer / scoring: 0.09, 0.19, 0.9

6. Explain why 0.8 is greater than 0.75 even though 75 is greater than 8. (2 points)

Answer / scoring: 0.8 = 0.80; compare 80 hundredths with 75 hundredths. Place value, not the number of written digits, determines size.

7. Spiral review: 26 + 7 = ? (1 point)

Answer / scoring: 33

8. Spiral review: 7 x 6 = ? (1 point)

Answer / scoring: 42

ELA - 13 points

Score: _____ / 13

Keeping Water Cool

Two students investigated how to keep a cup of water cool. They used identical cups, the same amount of water, and the same starting temperature. One cup was wrapped in cloth; the other was left uncovered. After twenty minutes in the same room, they measured both temperatures. They wrote the results in a table. They did not call one measurement proof that cloth is always the best material. Instead, they proposed trying another material and repeating the test. Their report explained the question, method, observations, and limits of their conclusion. A clear report lets another reader understand what was tested and what still needs investigation.

1. Write a focused research question connected to the passage. (1 point)

Answer / scoring: Accept a specific, answerable question connected to the text, not an unlimited topic.

2. Name two different kinds of sources that could help answer it. (1 point)

Answer / scoring: Accept relevant books/articles, maps/data, interviews/primary accounts; each must suit the question.

3. Why should a researcher record a source's creator and title? (1 point)

Answer / scoring: To trace, check, and credit information.

4. Explain how to narrow a research topic that is too broad. (2 points)

Answer / scoring: Limit the place, time, question, or aspect; include a concrete narrower example.

5. Name two things kept the same in the investigation. (1 point)

Answer / scoring: Any two: cup type, water amount, starting temperature, room, measurement interval.

6. Why do the students propose repeating the test? (1 point)

Answer / scoring: One measurement is limited evidence; repeating can check the result.

7. Correct this misspelling: enviroment. (1 point)

Answer / scoring: environment

8. Write one organized paragraph (4-6 sentences) explaining an important idea from the supplied passage. Paraphrase two relevant details and credit the supplied passage as your source. (5 points)

Answer / scoring: Rubric: clear relevant main idea/claim (1); two accurate supporting details (1 each); reasoning/organization (1); readable complete sentences and conventions (1). Accept defensible interpretations, not just the sample central idea: A clear investigation report describes methods, evidence, and limits.

Science - 10 points

Score: _____ / 10

W3 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 23 temperature in degrees C; Trial B: 31 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. What does energy transformation mean? (1 point)

Answer / scoring: Energy changes form within a system.

2. Why does a working device often become warm? (1 point)

Answer / scoring: Some energy is transferred as thermal energy.

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

4. Use W3 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 31 versus 23 in A; accept an accurate description without an unsupported causal claim.

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draw an energy-chain model for a fan or lamp. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct initial energy source, intermediate electrical energy, and motion/light plus thermal output.

Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Quiero el menú, por favor.
Word bank: el desayuno, el almuerzo, la cena, quiero, el menú, por favor.

1. Translate into English: el desayuno. (1 point)

Answer / scoring: breakfast

2. Translate into Spanish: lunch. (1 point)

Answer / scoring: el almuerzo; accept appropriate article/gender variants when meaning is correct.

3. Translate dinner into Spanish. (1 point)

Answer / scoring: cena / la cena

4. Oral task (teacher listens): Use 2 short statements or a 2-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Quiero el menú, por favor. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.
