Keeping Water Cool

Two students investigated how to keep a cup of water cool. They used identical cups, the same amount of water, and the same starting temperature. One cup was wrapped in cloth; the other was left uncovered. After twenty minutes in the same room, they measured both temperatures. They wrote the results in a table. They did not call one measurement proof that cloth is always the best material. Instead, they proposed trying another material and repeating the test. Their report explained the question, method, observations, and limits of their conclusion. A clear report lets another reader understand what was tested and what still needs investigation.

1. Write a focused research question connected to the passage. (1 point)

2. Name two different kinds of sources that could help answer it. (1 point)

3. Why should a researcher record a source's creator and title? (1 point)

4. Explain how to narrow a research topic that is too broad. (2 points)

5. Name two things kept the same in the investigation. (1 point)

6. Why do the students propose repeating the test? (1 point)

7. Correct this misspelling: enviroment. (1 point)

8. Write one organized paragraph (4-6 sentences) explaining an important idea from the supplied passage. Paraphrase two relevant details and credit the supplied passage as your source. (5 points)

Science - 10 points

Score: _____ / 10

W3 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 23 temperature in degrees C; Trial B: 31 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. What does energy transformation mean? (1 point)

2. Why does a working device often become warm? (1 point)

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

4. Use W3 data. State one observation without claiming its cause. (1 point)

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

6. Draw an energy-chain model for a fan or lamp. (3 points)

Spanish - 7 points
