Grade 4 - Module 6 Comprehensive Test

Scheduled: 2027-04-23 | Covers all four module weeks and all five subjects

Student: _____ Date completed: _____

Math: 4.MD.1-3 | ELA: W.4.1; RI.4.8; SL.4.1; L.4.2 | Science: E.4.9A-B | Social Studies: MS CCRS SS Grade 4 - regions/geography/economics | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Math - 28 points

Score: _____ / 28

1. Convert 2 m to cm. (1 point)

2. Convert 2 kg to g. (1 point)

3. Convert 2 L to mL. (1 point)

4. Convert 2 hours to minutes. (1 point)

5. Convert 300 cm to meters. (1 point)

6. A rope is 2 m long. Cut off 75 cm. Find the remaining length in centimeters. Show both steps. (2 points)

7. A rectangle is 13 cm by 3 cm. Find its area. (1 point)

8. A rectangle is 13 cm by 3 cm. Find its perimeter. (1 point)

9. A rectangle is 12 cm by 4 cm. Find its area. (1 point)

10. A rectangle is 12 cm by 4 cm. Find its perimeter. (1 point)

11. A rectangle has area 36 square cm and width 4 cm. Find its length. (1 point)

12. Two rectangles are 3 by 8 cm and 4 by 6 cm. Compare their areas and perimeters. (2 points)

13. A lesson begins at 9:25 a.m. and lasts 45 minutes. When does it end? (1 point)

14. How many minutes from 1:15 p.m. to 2:05 p.m.? (1 point)

15. Convert 2 hours 20 minutes to minutes. (1 point)

16. A $4.75 item is paid for with $10.00. Find change. (1 point)

17. Convert 2 m 35 cm to centimeters. (1 point)

18. A trip takes 35 minutes, a stop takes 20 minutes, and the return takes 40 minutes. Beginning at 10:10 a.m., when do you finish? Show elapsed time. (2 points)

19. Convert 5 m to cm. (1 point)

20. Convert 5 kg to g. (1 point)

21. Convert 5 L to mL. (1 point)

22. Convert 5 hours to minutes. (1 point)

23. Convert 300 cm to meters. (1 point)

24. A rope is 5 m long. Cut off 75 cm. Find the remaining length in centimeters. Show both steps. (2 points)

ELA - 16 points

Score: _____ / 16

A Case for Shade

Our reading area should have a shaded bench. At noon, the sunny bench can be uncomfortable. A shaded seat would give readers another choice. We can first move a portable shade nearby and record how many students use the area. Then we can ask whether the change helped. Some people worry that a permanent structure would cost too much. That is a fair concern, so a temporary test is a sensible first step. The goal is not to promise that every reader will love the bench. The goal is to use evidence to decide whether a small improvement is worthwhile.

1. Write a defensible claim about the passage. (1 point)

2. Quote or paraphrase one supporting detail. (1 point)

3. Write a defensible claim about the passage. (1 point)

4. Quote or paraphrase one supporting detail. (1 point)

5. Choose a transition for adding another reason: however, also, or finally. (1 point)

6. Choose a transition for a contrast: however, also, or first. (1 point)

7. Identify one strong idea you could develop from the passage. (1 point)

8. Name one revision that improves organization or evidence. (1 point)

9. What concern does the writer acknowledge? (1 point)

10. What evidence would help decide whether the change is useful? (1 point)

11. Correct this misspelling: evidance. (1 point)

12. Write one organized paragraph (4-6 sentences) stating an opinion or argument related to the supplied passage. Give two reasons and relevant evidence; use a transition and a conclusion. Include one reflection about how your interpretation might differ from another reader's. (5 points)

Science - 28 points

Score: _____ / 28

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 12 milliliters of water collected; Trial B: 20 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How are evaporation and condensation different? (1 point)

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

3. Draw a water-cycle model. (3 points)

4. Why record weather at consistent times? (1 point)

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

6. Design a five-day weather log. (3 points)

7. What does a thermometer measure? (1 point)

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

9. Draw a simple weather instrument and explain its use. (3 points)

10. What data might help a weather forecast? (1 point)

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

12. Write a cautious forecast from a pattern in a weather log. (3 points)

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Social Studies - 24 points

Score: _____ / 24

W1 background: Coasts/rivers supported travel, trade, settlement, and industry. Human decisions and changes over time also shape communities. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Flat land and suitable soils can support large fields, subject to climate/resources. Regions include physical, cultural, and economic variation. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: It supports a fair, clear geographic comparison. Water, food, transport, housing, work, or public services. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: People carry skills, ideas, relationships, and cultural practices as they move. Jobs, family, safety, education, and many other circumstances vary. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What is one way water has influenced the Northeast's development? (1 point)

2. Why should a region's history be considered along with its geography? (1 point)

3. Compare two Northeast states using a labeled map or table. (3 points)

4. How can broad plains support some types of farming? (1 point)

5. Why is the Midwest more than one kind of land or community? (1 point)

6. Compare a farm area and an urban area in the Midwest. (3 points)

7. Why compare Northeast and Midwest using common categories? (1 point)

8. What is one shared need of communities in both regions? (1 point)

9. Construct a region-comparison chart. (3 points)

10. How can migration connect regions? (1 point)

11. Why can people move for different reasons? (1 point)

12. Model one movement between regions. (3 points)

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Spanish - 12 points

Score: _____ / 12

Spanish model and vocabulary (cue support allowed)

Hoy hace frío y llueve.
Word bank: hace frío, hace calor, llueve, nieva, hace viento, hace sol.

1. Week 1: Translate it is cold into Spanish. (1 point)

2. Week 2: Translate winter into Spanish. (1 point)

3. Week 3: Write 3:00 in Spanish. (1 point)

4. Week 4: Translate it is cold into Spanish. (1 point)

5. Read the supplied Spanish model. Give its meaning in English. (2 points)

6. Write one new correct sentence using vocabulary from this module. (2 points)

7. Oral task (teacher listens): Use 4 short statements or a 4-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)
