Grade 4 - Module 7 Week 3 Quiz - TEACHER ANSWER KEY

Scheduled: 2027-05-14 | Current-week goals + math spiral review; science/social studies alternate

Math: 4.MD.4-7; 4.G.1-3 | ELA: RL.4.4-7,9; L.4.5; W.4.5 | Science: E.4.9B-C | Social Studies: MS CCRS SS Grade 4 - regions/geography | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Math - 9 points

Score: _____ / 9

1. Classify a 35-degree angle as acute, right, or obtuse. (1 point)

Answer / scoring: Acute

2. Classify a 120-degree angle. (1 point)

Answer / scoring: Obtuse

3. How many degrees are in a right angle? (1 point)

Answer / scoring: 90

4. A right angle is split into 30 degrees and another angle. Find the other angle. (1 point)

Answer / scoring: 60

5. Draw a 60-degree angle using a protractor. Label its vertex. (1 point)

Answer / scoring: Two rays share a labeled vertex; angle measures 60 degrees (allow +/-3 degrees).

6. Draw a right angle and explain how you know it is a right angle. (2 points)

Answer / scoring: Perpendicular rays meet at 90 degrees; correct drawing plus explanation.

7. Spiral review: 28 + 7 = ? (1 point)

Answer / scoring: 35

8. Spiral review: 7 x 6 = ? (1 point)

Answer / scoring: 42

ELA - 13 points

Score: _____ / 13

Rain at the Window

Original poem:
Rain drums softly on the glass,
Silver footsteps cross the grass.
Clouds pull blankets through the sky,
While busy birds go fluttering by.
A puddle holds a crooked tree;
The wind sings low and talks to me.
Then sunlight opens one bright door,
And rain retreats to drum no more.

Prose companion: A short rain shower passed over the yard. Wind moved the clouds. When sunlight returned, the shower stopped.

1. Name an idea shared by the poem and prose companion. (1 point)

Answer / scoring: Both describe the weather event and its visible effects.

2. How does their language differ? (1 point)

Answer / scoring: Poem uses figurative/rhythmic imagery; prose describes more directly.

3. Which version uses line breaks as a feature of form? (1 point)

Answer / scoring: The poem.

4. Use one detail from each version to explain a difference in effect. (2 points)

Answer / scoring: Accurate detail from each and a sensible comparison of mood/style.

5. Which phrase gives clouds a human-like action? (1 point)

Answer / scoring: "Clouds pull blankets through the sky."

6. How does the prose version differ from the poem? (1 point)

Answer / scoring: It reports the event directly instead of using rhyme, imagery, and personification.

7. Correct this misspelling: weathar. (1 point)

Answer / scoring: weather

8. Write one organized paragraph (4-6 sentences) comparing the poem with its prose companion. Use a detail from each, explain their effects, and edit conventions. (5 points)

Answer / scoring: Rubric: clear relevant main idea/claim (1); two accurate supporting details (1 each); reasoning/organization (1); readable complete sentences and conventions (1). Accept defensible interpretations, not just the sample central idea: The poem turns an ordinary weather event into vivid imagery.

Science - 10 points

Score: _____ / 10

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How can proximity to a large body of water affect temperature patterns? (1 point)

Answer / scoring: Water heats/cools more slowly than land and can moderate nearby temperatures.

2. Why does elevation matter for climate? (1 point)

Answer / scoring: Higher elevations are often cooler; other factors also matter.

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W3 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 21 versus 13 in A; accept an accurate description without an unsupported causal claim.

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Model two factors that can affect a region's climate. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Two relevant factors, correct explanations, and acknowledgement that climate has multiple influences.

Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

El libro está encima de la mesa.
Word bank: encima de, debajo de, al lado de, cerca de, lejos de, entre.

1. Translate into English: encima de. (1 point)

Answer / scoring: on top of

2. Translate into Spanish: under. (1 point)

Answer / scoring: debajo de; accept appropriate article/gender variants when meaning is correct.

3. Complete: El libro está ___ la mesa. (under) (1 point)

Answer / scoring: debajo de

4. Oral task (teacher listens): Use 2 short statements or a 2-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: El libro está encima de la mesa. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.
