The Final Project

Tara's class planned a display about their community. Tara chose a question: How can we help visitors understand the river? She gathered a map, a short library article, and notes from a visit. She labeled each source so she could find it again. Her first poster had many facts but no clear order. After reading it aloud, Tara grouped the information into three sections: location, uses, and ways to care for the river. She checked a number against the original article instead of trusting her memory. At the display, she explained both what she had learned and one question she still wanted to investigate.

1. Write a focused research question connected to the passage. (1 point)

2. Name two different kinds of sources that could help answer it. (1 point)

3. Why should a researcher record a source's creator and title? (1 point)

4. Explain how to narrow a research topic that is too broad. (2 points)

5. Why did Tara label her sources? (1 point)

6. How did Tara improve the organization of her poster? (1 point)

7. Correct this misspelling: conclution. (1 point)

8. Write one organized paragraph (4-6 sentences) about the passage's main message. Use two accurate details, explain their connection, and edit sentences and spelling. (5 points)

Science - 10 points

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. What makes a scientific question investigable? (1 point)

2. Why identify a system's boundary? (1 point)

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

4. Use W1 data. State one observation without claiming its cause. (1 point)

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

6. Plan a systems/energy capstone investigation. (3 points)
