Grade 7 - Module 1 Week 2 Quiz - TEACHER ANSWER KEY

Scheduled: 2026-10-23 | Current-week goals + math spiral review; science/social studies alternate

Math: 7.NS.1-3 | ELA: RL.7.1-3; RI.7.1-2; L.7.1-2,4-6 | Science: L.7.3 | Social Studies: MS CCRS SS Grade 7 Early World History - prehistory/Mesopotamia | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Math - 9 points

Score: _____ / 9

1. -2 x 12 = ? (1 point)

Answer / scoring: -24

2. -24 / -2 = ? (1 point)

Answer / scoring: 12

3. -3/4 x 2/3 = ? (1 point)

Answer / scoring: -1/2

4. -1.2 / 0.3 = ? (1 point)

Answer / scoring: -4

5. What sign results from multiplying two negative nonzero numbers? (1 point)

Answer / scoring: Positive

6. A diver descends 2 meters per minute for 4 minutes. Represent the change with a signed product and find it. (2 points)

Answer / scoring: 4 x (-2) = -8 meters; negative indicates downward change.

7. Spiral review: -6 + 11 = ? (1 point)

Answer / scoring: 5

8. Spiral review: Write 3/4 as a decimal. (1 point)

Answer / scoring: 0.75

ELA - 13 points

Score: _____ / 13

A Pond Study

A class studied a small pond near its school. Students recorded water temperature, counted visible organisms from the bank, and drew a model of a food web. Because the first visit happened after rain, they wondered whether that single visit represented typical conditions. They returned at the same time of day during three later weeks. Their records were not identical. One student wanted to erase the unusual measurements, but her partner argued that differences could be useful evidence. The group kept the records and described the limits of its method: it had observed only one pond and had not counted organisms beneath the water. Their report distinguished observations from explanations. "We saw fewer insects" was an observation; "the cooler temperature caused the change" was a hypothesis that needed further testing. The study taught the class that careful questions are as important as confident conclusions.

1. Write a defensible claim about the passage. (1 point)

Answer / scoring: Good scientific explanations distinguish evidence, hypotheses, and limitations.

2. Quote or paraphrase one supporting detail. (1 point)

Answer / scoring: The class measured temperature and insect counts but did not establish that temperature caused the change.

3. Explain why unsupported opinion is weaker than evidence. (1 point)

Answer / scoring: An unsupported opinion gives no verifiable reason; evidence allows a reader to evaluate a claim.

4. Support your claim with two details and reasoning. (2 points)

Answer / scoring: Good scientific explanations distinguish evidence, hypotheses, and limitations.; two accurate relevant details and a connection to the claim.

5. Why is the statement about cooler temperature a hypothesis rather than an observation? (1 point)

Answer / scoring: The class measured temperature and insect counts but did not establish that temperature caused the change.

6. Give two limits of the study. (1 point)

Answer / scoring: Only one pond was observed; underwater organisms were not counted. Few visits/time-of-day restrictions also acceptable.

7. Correct this misspelling: libary. (1 point)

Answer / scoring: library

8. Write two organized paragraphs (at least 8 sentences total) about the passage's main message. Use two accurate details, explain their connection, and edit sentences and spelling. (5 points)

Answer / scoring: Rubric: clear relevant main idea/claim (1); two accurate supporting details (1 each); reasoning/organization (1); readable complete sentences and conventions (1). Accept defensible interpretations, not just the sample central idea: Good scientific explanations distinguish evidence, hypotheses, and limitations.

Social Studies - 10 points

Score: _____ / 10

W2 background: It supported more permanent settlements and changed work, resources, and social organization. No; crops, environments, timing, and choices varied. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How did agriculture change some human communities? (1 point)

Answer / scoring: It supported more permanent settlements and changed work, resources, and social organization.

2. Was adopting agriculture an identical process everywhere? (1 point)

Answer / scoring: No; crops, environments, timing, and choices varied.

3. Use W2 background. Identify one claim that could be checked against a map, document, or other reliable source. (1 point)

Answer / scoring: It supported more permanent settlements and changed work, resources, and social organization. OR No; crops, environments, timing, and choices varied.; accept a checkable claim accurately drawn from the note.

4. Use W2 background. Explain how two ideas in the note connect. (2 points)

Answer / scoring: Accept a logical relationship using accurate details from both statements; do not require one exact interpretation.

5. Name one kind of source that could help check the background note and explain why. (2 points)

Answer / scoring: A relevant map, scholarly/educator text, community source, historical document, or data record; source must match the claim. One point for suitable source and one for purpose.

6. Compare foraging and early farming. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Food production, movement/settlement, benefits, costs, and recognition of variation.

Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Mi nombre se escribe A-N-A.
Word bank: a, e, i, o, u, ñ.

1. Write the first five letters of the Spanish alphabet. (1 point)

Answer / scoring: a, b, c, d, e

2. What is the name of the Spanish letter ñ? (1 point)

Answer / scoring: eñe

3. Write the Spanish letter n with a tilde. (1 point)

Answer / scoring: ñ

4. Oral task (teacher listens): Use 3 short statements or a 3-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Mi nombre se escribe A-N-A. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.
