Grade 7 - Module 2 Comprehensive Test

Scheduled: 2026-12-11 | Covers all four module weeks and all five subjects

Student: _____ Date completed: _____

Math: 7.RP.1-3 | ELA: RI.7.1-8; W.7.1-2; L.7.1-3 | Science: L.7.3.1-5 | Social Studies: MS CCRS SS 7.2-7.3 and related early-civilization standards | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Math - 28 points

Score: _____ / 28

1. A car travels 300 miles in 5 hours. Unit rate? (1 point)

2. 5 kg of rice costs $20. Cost per kg? (1 point)

3. A person walks 3/4 mile in 1/2 hour. Speed? (1 point)

4. A recipe uses 2 cups of flour for 3 cups of oats. Cups of flour per cup of oats? (1 point)

5. Which is cheaper per item: 4 for $6 or 5 for $8? (1 point)

6. Two printers make 120 pages in 3 minutes and 150 pages in 5 minutes. Which is faster? Show both rates. (2 points)

7. Table: x = 1, 2, 3; y = 6, 12, 18. Find constant k in y = kx. (1 point)

8. For y = 6x, find y when x = 7. (1 point)

9. For y = 6x, what does the graph point (1, 6) mean? (1 point)

10. Is y = 3x + 2 proportional? Explain. (1 point)

11. A proportional graph passes through (2, 10). What is y when x = 6? (1 point)

12. Plot (0,0), (1,6), and (3,18). Explain how the graph shows proportionality. (2 points)

13. Table: x = 1, 2, 3; y = 2, 4, 6. Find constant k in y = kx. (1 point)

14. For y = 2x, find y when x = 7. (1 point)

15. For y = 2x, what does the graph point (1, 2) mean? (1 point)

16. Is y = 3x + 2 proportional? Explain. (1 point)

17. A proportional graph passes through (2, 10). What is y when x = 6? (1 point)

18. Plot (0,0), (1,2), and (3,6). Explain how the graph shows proportionality. (2 points)

19. Find 15% of $80. (1 point)

20. A $60 jacket is 25% off. Sale price? (1 point)

21. A $50 purchase has 8% tax. Total? (1 point)

22. A price rises from $40 to $50. Percent increase? (1 point)

23. A $30 item is marked up by 20%. New price? (1 point)

24. A $100 item is discounted 20%, then taxed 5% on the sale price. Show the final cost. (2 points)

ELA - 16 points

Score: _____ / 16

Should the School Reduce Plastic?

The student council proposed replacing some single-use lunch packaging with reusable containers. Its argument began with a clear claim: the school should run a four-week trial before making a permanent purchase. The council's fictional classroom survey found that 72 of 120 respondents supported the trial. A second source, a cafeteria cost table, estimated that washing reusable containers would require additional time. Supporters argued that the trial could measure both waste and labor instead of assuming that one benefit settled the whole question. Critics worried about lost containers and unequal access to supplies. The proposal responded by lending containers during the trial and counting losses. The council did not claim that a survey proved the policy would work. It used the survey to show interest and proposed collecting direct evidence of costs and waste.

1. State a central idea or theme of the passage. (1 point)

2. Give a detail that supports that idea. (1 point)

3. Name one text structure used in the passage. (1 point)

4. Identify words or events that show that structure. (1 point)

5. Write a defensible claim about the passage. (1 point)

6. Quote or paraphrase one supporting detail. (1 point)

7. Combine: "The class measured. The class compared." (1 point)

8. Correct the run-on: "We took notes we revised the report." (1 point)

9. What does the survey support, and what does it not prove? (1 point)

10. How does the proposal address a concern about access? (1 point)

11. Correct this misspelling: carefull. (1 point)

12. Write two organized paragraphs (at least 8 sentences total) stating an opinion or argument related to the supplied passage. Give two reasons and relevant evidence; use a transition and a conclusion. Include one reflection about how your interpretation might differ from another reader's. (5 points)

Science - 28 points

Score: _____ / 28

W1 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 9 distinct species observed; Trial B: 15 distinct species observed. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 10 distinct species observed; Trial B: 16 distinct species observed. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 11 distinct species observed; Trial B: 17 distinct species observed. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 12 distinct species observed; Trial B: 18 distinct species observed. These are invented assessment data, not a claim about a real investigation.

1. Why can excess nutrient runoff affect an ecosystem? (1 point)

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

3. Model one human impact on a cycle. (3 points)

4. Why is not every introduced species called invasive? (1 point)

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

6. Compare two explanations for a biodiversity change. (3 points)

7. Why consider unintended consequences? (1 point)

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

9. Evaluate an ecosystem solution. (3 points)

10. Does a correlation by itself establish causation? (1 point)

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

12. Outline an ecology data report. (3 points)

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Social Studies - 24 points

Score: _____ / 24

W1 background: Water, farming, transport, and settlement patterns were tied to the river. Images/objects can reveal beliefs, roles, materials, and purposes when interpreted in context. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Evidence of urban organization and infrastructure, though not a complete account of government. Evidence is incomplete; undeciphered or limited records restrict conclusions. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Water, agriculture, travel, and settlement were linked to river valleys. Different places, dynasties, periods, and communities changed over time. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Understand similar environmental opportunities and different social responses. People developed different institutions, beliefs, and choices. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Why was the Nile important to ancient Egypt? (1 point)

2. How can art provide historical evidence? (1 point)

3. Use an Egyptian object as historical evidence. (3 points)

4. What can planned streets or drains show about Indus cities? (1 point)

5. Why are interpretations of an ancient society sometimes uncertain? (1 point)

6. Compare an Indus city plan with another river-valley society. (3 points)

7. How did rivers support some early Chinese societies? (1 point)

8. Why should ancient China not be treated as one unchanging society? (1 point)

9. Create a river-valley comparison involving early China. (3 points)

10. What is a common reason to compare river-valley civilizations? (1 point)

11. Why is a shared river setting not proof of identical cultures? (1 point)

12. Compare two river-valley societies. (3 points)

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Spanish - 12 points

Score: _____ / 12

Spanish model and vocabulary (cue support allowed)

Hoy es lunes. Estamos en octubre.
Word bank: lunes, martes, viernes, enero, octubre, mes.

1. Week 1: Complete: Hoy es ___ . (Today is Friday.) (1 point)

2. Week 2: Write 3:00 in Spanish. (1 point)

3. Week 3: Translate notebook into Spanish. (1 point)

4. Week 4: Complete: Hoy es ___ . (Today is Friday.) (1 point)

5. Read the supplied Spanish model. Give its meaning in English. (2 points)

6. Write one new correct sentence using vocabulary from this module. (2 points)

7. Oral task (teacher listens): Use 6-8 short statements or a 6-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)
