Math - 9 points

Score: _____ / 9

1. Table: x = 1, 2, 3; y = 5, 10, 15. Find constant k in y = kx. (1 point)

Answer / scoring: 5

2. For y = 5x, find y when x = 7. (1 point)

Answer / scoring: 35

3. For y = 5x, what does the graph point (1, 5) mean? (1 point)

Answer / scoring: One unit of x corresponds to 5 units of y; 5 is the unit rate.

4. Is y = 3x + 2 proportional? Explain. (1 point)

Answer / scoring: No. It does not pass through the origin and y/x is not constant.

5. A proportional graph passes through (2, 10). What is y when x = 6? (1 point)

Answer / scoring: 30

6. Plot (0,0), (1,5), and (3,15). Explain how the graph shows proportionality. (2 points)

Answer / scoring: Correct points lie on a straight line through the origin; y/x = 5 for nonzero x.

7. Spiral review: -6 + 12 = ? (1 point)

Answer / scoring: 6

8. Spiral review: Write 3/4 as a decimal. (1 point)

Answer / scoring: 0.75

Should the School Reduce Plastic?

The student council proposed replacing some single-use lunch packaging with reusable containers. Its argument began with a clear claim: the school should run a four-week trial before making a permanent purchase. The council's fictional classroom survey found that 72 of 120 respondents supported the trial. A second source, a cafeteria cost table, estimated that washing reusable containers would require additional time. Supporters argued that the trial could measure both waste and labor instead of assuming that one benefit settled the whole question. Critics worried about lost containers and unequal access to supplies. The proposal responded by lending containers during the trial and counting losses. The council did not claim that a survey proved the policy would work. It used the survey to show interest and proposed collecting direct evidence of costs and waste.

1. Name one text structure used in the passage. (1 point)

Answer / scoring: Accept a defensible sequence, cause/effect, problem/solution, or argument structure with supporting detail.

2. Identify words or events that show that structure. (1 point)

Answer / scoring: Relevant sequence/cause/problem/claim details from this passage.

3. How does organizing ideas help a reader? (1 point)

Answer / scoring: It shows relationships and helps readers follow the explanation.

4. Make a three-part outline of the passage. (2 points)

Answer / scoring: Three accurately ordered main sections/events that represent the text.

5. What does the survey support, and what does it not prove? (1 point)

Answer / scoring: It shows interest among respondents; it does not prove the policy will work or represent every student.

6. How does the proposal address a concern about access? (1 point)

Answer / scoring: It lends containers during the trial.

7. Correct this misspelling: carefull. (1 point)

Answer / scoring: careful

8. Write two organized paragraphs (at least 8 sentences total) stating an opinion or argument related to the supplied passage. Give two reasons and relevant evidence; use a transition and a conclusion. (5 points)

Answer / scoring: Rubric (5): clear claim (1); two relevant reasons (1 each); evidence and logical organization/conclusion (1); conventions (1). Accept supported positions that disagree with the passage.
