Arachne: an Original Retelling

This original retelling draws on the traditional myth. Arachne was a talented weaver who took great pride in her work. When people praised her skill, she insisted that no teacher or goddess deserved any credit. Athena, associated with wisdom and crafts, approached in disguise and advised her to speak with humility. Arachne dismissed the advice and demanded a contest. The two wove remarkable pictures, but their conflict involved more than technical skill: Arachne's attitude challenged the goddess's authority. In the traditional ending, Athena transformed Arachne into a spider, forever connected with weaving. Readers can admire Arachne's ability while questioning her boastfulness and the severity of the punishment. The story invites discussion of pride, power, artistic skill, and the consequences of refusing advice. A theme is a reasoned interpretation, not simply the name of a topic.

1. State a central idea or theme of the passage. (1 point)

Answer / scoring: Possible themes involve pride, refusal of advice, power, or disproportionate punishment.

2. Give a detail that supports that idea. (1 point)

Answer / scoring: She dismisses the disguised Athena's advice and demands a contest.

3. Explain how a second detail adds to the idea. (1 point)

Answer / scoring: The passage recognizes her skill while showing boastfulness and refusal to listen.; explain a logical connection.

4. Explain how the ending or final statement develops the passage's message. (2 points)

Answer / scoring: Possible themes involve pride, refusal of advice, power, or disproportionate punishment.; include a relevant final detail and a logical explanation.

5. What evidence shows that Arachne refuses advice? (1 point)

Answer / scoring: She dismisses the disguised Athena's advice and demands a contest.

6. Why can a reader admire Arachne and still criticize her behavior? (1 point)

Answer / scoring: The passage recognizes her skill while showing boastfulness and refusal to listen.

7. Correct this misspelling: becuase. (1 point)

Answer / scoring: because

8. Write two organized paragraphs (at least 8 sentences total) about the passage's main message. Use two accurate details, explain their connection, and edit sentences and spelling. (5 points)

Answer / scoring: Rubric: clear relevant main idea/claim (1); two accurate supporting details (1 each); reasoning/organization (1); readable complete sentences and conventions (1). Accept defensible interpretations, not just the sample central idea: Possible themes involve pride, refusal of advice, power, or disproportionate punishment.

W1 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 21 temperature in degrees C; Trial B: 29 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. What distinguishes a solid from a liquid in a simple particle model? (1 point)

Answer / scoring: Solid particles maintain positions relative to neighbors; liquid particles move past one another.

2. Is melting usually a physical or chemical change? (1 point)

Answer / scoring: Physical; the substance's identity remains the same.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 29 versus 21 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draw particle models for solid, liquid, and gas. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct relative spacing/movement and the same particle identity for phase changes.
