Grade 7 - Module 5 Week 1 Quiz

Scheduled: 2027-02-26 | Current-week goals + math spiral review; science/social studies alternate

Student: _____ Date completed: _____

Math: 7.SP.1-4 | ELA: W.7.2,7-9; RI.7.1-9 | Science: E.7.9A.1-3 | Social Studies: MS CCRS SS Grade 7 - Byzantine/Islamic civilizations | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Math - 9 points

Score: _____ / 9

1. A survey of 50 students is used to estimate preferences of 600 students. Identify the population and sample. (1 point)

2. A survey asks only soccer players about the most popular school sport. Explain a likely bias. (1 point)

3. Choose a better random sample: first 20 arrivals or 20 names drawn from all student names. (1 point)

4. In a random sample, 15 of 60 students choose art. Estimate how many of 400 students choose art. (1 point)

5. Does a random sample guarantee a perfectly correct estimate? (1 point)

6. Design a representative sample to ask 300 students about lunch choices. (2 points)

7. Spiral review: -5 + 15 = ? (1 point)

8. Spiral review: Write 3/4 as a decimal. (1 point)

ELA - 13 points

Score: _____ / 13

Two Sources for a Forecast

Fictional classroom sources: Source A, "Weather Log," by a student team, dated March 8, records local temperature, wind direction, and pressure at noon for five days. Source B, an unsigned advertisement dated March 8, says that one device "always predicts weather perfectly" but gives no measurements. A research group prefers Source A for describing what was actually observed. It still checks the team's instruments and method, because named authors and a date do not guarantee accuracy. The group writes a cautious forecast, separating data from inference. Its notes include each source's title, creator, date, and the particular information used. In its final explanation, it paraphrases the data instead of copying a paragraph and identifies its source. Readers can judge the explanation more easily because the evidence and its limits are visible.

1. Write a focused research question connected to the passage. (1 point)

2. Name two different kinds of sources that could help answer it. (1 point)

3. Why should a researcher record a source's creator and title? (1 point)

4. Explain how to narrow a research topic that is too broad. (2 points)

5. Why is Source A a better basis for this investigation than Source B? (1 point)

6. Why should researchers still check Source A's method? (1 point)

7. Correct this misspelling: enviroment. (1 point)

8. Write two organized paragraphs (at least 8 sentences total) explaining an important idea from the supplied passage. Paraphrase two relevant details and credit the supplied passage as your source. (5 points)

Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Why cannot one storm establish a climate trend? (1 point)

2. How can weather observations vary within one region? (1 point)

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

4. Use W1 data. State one observation without claiming its cause. (1 point)

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

6. Compare short-term observations with long-term climate data. (3 points)

Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Estudio por la mañana. Leo por la noche.
Word bank: estudiar, leer, comer, dormir, la mañana, la noche.

1. Translate into English: estudiar. (1 point)

2. Translate into Spanish: to read. (1 point)

3. Translate to study into Spanish. (1 point)

4. Oral task (teacher listens): Use 3 short statements or a 3-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)
