Grade 7 - Module 5 Week 2 Quiz - TEACHER ANSWER KEY

Scheduled: 2027-03-05 | Current-week goals + math spiral review; science/social studies alternate

Math: 7.SP.1-4 | ELA: W.7.2,7-9; RI.7.1-9 | Science: E.7.9A.1-3 | Social Studies: MS CCRS SS Grade 7 - Byzantine/Islamic civilizations | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Math - 9 points

Score: _____ / 9

1. A survey of 50 students is used to estimate preferences of 600 students. Identify the population and sample. (1 point)

Answer / scoring: Population: all 600 students; sample: the 50 surveyed.

2. A survey asks only soccer players about the most popular school sport. Explain a likely bias. (1 point)

Answer / scoring: Soccer players are overrepresented; they may prefer soccer more than the whole school.

3. Choose a better random sample: first 20 arrivals or 20 names drawn from all student names. (1 point)

Answer / scoring: 20 names drawn from all student names.

4. In a random sample, 15 of 60 students choose art. Estimate how many of 400 students choose art. (1 point)

Answer / scoring: 100

5. Does a random sample guarantee a perfectly correct estimate? (1 point)

Answer / scoring: No; random sampling reduces selection bias but sampling variation remains.

6. Design a representative sample to ask 300 students about lunch choices. (2 points)

Answer / scoring: Use a random selection from all students or random samples across grades; avoid a convenience group. One point for random selection, one for coverage.

7. Spiral review: -6 + 15 = ? (1 point)

Answer / scoring: 9

8. Spiral review: Write 3/4 as a decimal. (1 point)

Answer / scoring: 0.75

ELA - 13 points

Score: _____ / 13

Two Sources for a Forecast

Fictional classroom sources: Source A, "Weather Log," by a student team, dated March 8, records local temperature, wind direction, and pressure at noon for five days. Source B, an unsigned advertisement dated March 8, says that one device "always predicts weather perfectly" but gives no measurements. A research group prefers Source A for describing what was actually observed. It still checks the team's instruments and method, because named authors and a date do not guarantee accuracy. The group writes a cautious forecast, separating data from inference. Its notes include each source's title, creator, date, and the particular information used. In its final explanation, it paraphrases the data instead of copying a paragraph and identifies its source. Readers can judge the explanation more easily because the evidence and its limits are visible.

1. A source makes a strong claim but provides no evidence. What should a researcher do? (1 point)

Answer / scoring: Seek supporting evidence/corroboration and check the source before relying on it.

2. Why does an author's expertise matter? (1 point)

Answer / scoring: It helps judge whether the author is qualified on that topic; expertise alone is not proof.

3. Why check a source's date? (1 point)

Answer / scoring: Information and context can change; relevance depends on the question.

4. Compare a dated data log and an unsigned advertisement as evidence for a measurement claim. (2 points)

Answer / scoring: The data log offers traceable measurements; the advertisement needs evidence and may be persuasive. Check both methods and purposes.

5. Why is Source A a better basis for this investigation than Source B? (1 point)

Answer / scoring: A supplies dated measurements and a traceable method; B makes an unsupported absolute claim.

6. Why should researchers still check Source A's method? (1 point)

Answer / scoring: An author and date do not ensure that measurements or procedures are accurate.

7. Correct this misspelling: enviroment. (1 point)

Answer / scoring: environment

8. Write two organized paragraphs (at least 8 sentences total) explaining an important idea from the supplied passage. Paraphrase two relevant details and credit the supplied passage as your source. (5 points)

Answer / scoring: Rubric: clear relevant main idea/claim (1); two accurate supporting details (1 each); reasoning/organization (1); readable complete sentences and conventions (1). Accept defensible interpretations, not just the sample central idea: Credible research connects traceable evidence with cautious conclusions.

Social Studies - 10 points

Score: _____ / 10

W2 background: The Arabian Peninsula in the seventh century CE. Movement of people, texts, institutions, and contacts can carry ideas; mechanisms vary. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Where did Islam begin as a historical religious movement? (1 point)

Answer / scoring: The Arabian Peninsula in the seventh century CE.

2. How can trade and other networks help beliefs spread? (1 point)

Answer / scoring: Movement of people, texts, institutions, and contacts can carry ideas; mechanisms vary.

3. Use W2 background. Identify one claim that could be checked against a map, document, or other reliable source. (1 point)

Answer / scoring: The Arabian Peninsula in the seventh century CE. OR Movement of people, texts, institutions, and contacts can carry ideas; mechanisms vary.; accept a checkable claim accurately drawn from the note.

4. Use W2 background. Explain how two ideas in the note connect. (2 points)

Answer / scoring: Accept a logical relationship using accurate details from both statements; do not require one exact interpretation.

5. Name one kind of source that could help check the background note and explain why. (2 points)

Answer / scoring: A relevant map, scholarly/educator text, community source, historical document, or data record; source must match the claim. One point for suitable source and one for purpose.

6. Map a route of cultural/religious exchange. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Accurate broad regions, a plausible mechanism, and limits; distinguish exchange from universal acceptance.

Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Estudio español y escucho música.
Word bank: hablar, estudiar, escuchar, cantar, trabajar, mirar.

1. Translate into English: hablar. (1 point)

Answer / scoring: to speak

2. Translate into Spanish: to study. (1 point)

Answer / scoring: estudiar; accept appropriate article/gender variants when meaning is correct.

3. Complete: Yo ___ español. (hablar, present tense) (1 point)

Answer / scoring: hablo

4. Oral task (teacher listens): Use 3 short statements or a 3-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Estudio español y escucho música. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.
