Grade 7 - Module 6 Week 3 Quiz

Scheduled: 2027-04-16 | Current-week goals + math spiral review; science/social studies alternate

Student: _____ Date completed: _____

Math: 7.SP.5-8 | ELA: W.7.1; RI.7.8; L.7.1-3 | Science: E.7.9A.4-7 | Social Studies: MS CCRS SS Grade 7 - Africa/Asia/trade networks | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Math - 9 points

Score: _____ / 9

1. List all outcomes for two coin tosses. (1 point)

2. For two fair coin tosses, P(two heads)? (1 point)

3. A fair coin and fair die are used independently. How many outcomes? (1 point)

4. For a fair coin and die, P(heads and an even number)? (1 point)

5. Choose one of 3 shirts and one of 4 pants. How many outfits? (1 point)

6. Draw a tree diagram for two coin tosses and use it to find P(exactly one head). (2 points)

7. Spiral review: -7 + 16 = ? (1 point)

8. Spiral review: Write 3/4 as a decimal. (1 point)

ELA - 13 points

Score: _____ / 13

An Argument for Trees

A community group argues that a school should plant trees near its outdoor learning area. Its claim is narrower than "trees solve every problem": a carefully chosen location may provide shade and support habitat. The group presents a fictional class data table comparing temperatures at a sunny spot and a shaded spot. It also acknowledges counterarguments: planting and watering cost money, and roots or branches may interfere with structures. Its proposal recommends consulting knowledgeable staff, selecting a suitable location, and comparing costs before planting. An effective response to a counterargument does not mock the people who raise it. Instead, it explains how the plan addresses a reasonable concern or why the evidence supports a different choice. The final paragraph asks the school to try a manageable plan and report the results.

1. What is a counterargument? (1 point)

2. Why address a counterargument fairly? (1 point)

3. Choose the better response: insult a critic or answer the concern with evidence. (1 point)

4. Write a counterargument and respectful response related to the passage. (2 points)

5. How is the claim limited rather than absolute? (1 point)

6. What are two counterarguments named in the passage? (1 point)

7. Correct this misspelling: evidance. (1 point)

8. Write two organized paragraphs (at least 8 sentences total) stating an opinion or argument related to the supplied passage. Give two reasons and relevant evidence; use a transition and a conclusion. (5 points)

Science - 10 points

Score: _____ / 10

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How does convection transfer energy? (1 point)

2. Why is solar heating important to atmospheric motion? (1 point)

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

4. Use W3 data. State one observation without claiming its cause. (1 point)

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

6. Draw a convection model. (3 points)

Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

¿Dónde está la biblioteca?
Word bank: qué, quién, dónde, cuándo, cómo, por qué.

1. Translate into English: qué. (1 point)

2. Translate into Spanish: who. (1 point)

3. Choose the question word meaning where: ___ . (1 point)

4. Oral task (teacher listens): Use 3 short statements or a 3-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)
