After the Storm

Original poem:
The street unrolls its silver thread,
The restless clouds move overhead.
A window holds the fading light;
A branch writes slowly into night.
I count the drops that leave the leaves,
And hear the roof repeat its eaves.
The storm has gone; its quiet trace
Still draws a map across this place.

Prose companion: Rainwater remains on leaves and the street after a storm. Clouds move away as evening approaches. A person observes these remaining signs of the weather. The prose summarizes observable conditions; the poem uses images to create a reflective mood.

8. Write two organized paragraphs (at least 8 sentences total) comparing the poem with its prose companion. Use a detail from each, explain their effects, and edit conventions. (5 points)

Answer / scoring: Rubric: clear relevant main idea/claim (1); two accurate supporting details (1 each); reasoning/organization (1); readable complete sentences and conventions (1). Accept defensible interpretations, not just the sample central idea: The poem reflects on the traces a storm leaves behind.

Science - 10 points

Score: _____ / 10

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Why trace pathways when evaluating human impacts? (1 point)

Answer / scoring: Effects can move through connected systems rather than stay local.

2. Why compare alternative explanations for a change? (1 point)

Answer / scoring: Other factors may account for observed differences.

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W3 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 21 versus 13 in A; accept an accurate description without an unsupported causal claim.

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Model one human impact and an alternative explanation. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Clear pathway, evidence needed, and a plausible confounding influence.
