A History Portfolio

A student created a portfolio about how travel and communication changed societies. She began with a research question rather than a list of famous people: How did networks connect communities, and whose experiences were left out of the usual accounts? She compared a map, a trade-route reading, and a translated historical account. Her notes separated quotations, paraphrases, and her own interpretations. When two accounts disagreed, she recorded their authors, purposes, and contexts instead of choosing the more dramatic version. The final presentation used a timeline but did not imply that every change happened everywhere at once. It included an argument supported by evidence and a section explaining limitations. The student concluded that a strong portfolio shows not only a polished product but also how the researcher checked and revised the work.

1. Write a focused research question connected to the passage. (1 point)

2. Name two different kinds of sources that could help answer it. (1 point)

3. Why should a researcher record a source's creator and title? (1 point)

4. Explain how to narrow a research topic that is too broad. (2 points)

5. What does the student do when accounts disagree? (1 point)

6. Why does the timeline need explanation? (1 point)

7. Correct this misspelling: conclution. (1 point)

8. Write two organized paragraphs (at least 8 sentences total) about the passage's main message. Use two accurate details, explain their connection, and edit sentences and spelling. (5 points)

Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How do matter cycles differ from energy flow through an ecosystem? (1 point)

2. Why frame a capstone around a focused question? (1 point)

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

4. Use W1 data. State one observation without claiming its cause. (1 point)

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

6. Plan a systems/cycles capstone. (3 points)
