Grade 4 - Khan Primary Curriculum: Gap Answer Keys

Khan Academy is the primary source for Math and core ELA. Use its named units in course order within the calendar pacing. Grade 7 Science and early World History use appropriate Khan unit selections with required gap materials. Grade 4 Science, Mississippi/regional studies, Spanish, composition, and hands-on work require the listed gap curriculum. Friday weeks 1-3: Khan quiz or teacher-assigned exercise checks plus the printable gap quiz. Friday week 4: completed-unit Khan tests plus comprehensive printable gap assessment. Record first-attempt scores before retakes; keep Khan mastery progress separately. Assign these items in the existing Khan teacher accounts; links on VenvLearning do not create assignments or sync scores. Advance only after sufficient practice; unfinished units carry forward. Printed original assessment books are archived and no longer the current sequence.

Grade 4 · Module 1 Week 1 Friday gap quiz - TEACHER ANSWER KEY

Scheduled: 2026-10-16 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 4.NBT.1-4 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: L.4.1; science/engineering practices | Social Studies: MS CCRS SS 4.MS.1 (Mississippi regions/geography) | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Writing and conventions · required gap check - 8 points

Score: _____ / 8

A Library Garden

Maya wanted a quiet place to read outside. She asked the librarian if the empty corner of the courtyard could become a garden. First, Maya measured the space. Next, she drew a plan with a path and two benches. Her friends brought seed packets, and an adult helped them plant. A week later, Maya noticed that the plants beside the wall were dry. She moved the watering can closer to them and made a watering chart. By spring, visitors were reading beside green leaves. Maya learned that a good plan needs careful observation as well as enthusiasm.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares pulse counts at rest and after activity. Trial A: 71 pulse counts in one minute; Trial B: 101 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

1. Why do scientists record observations? (1 point)

Answer / scoring: So evidence can be compared, checked, and used to answer questions.

2. How is a system different from one part? (1 point)

Answer / scoring: A system has interacting parts; a change in one part can affect others.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 30 pulse counts in one minute.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 101 versus 71 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draw a simple system with at least three interacting parts. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Three labeled parts and at least two arrows explaining interactions; e.g., plant, water, sunlight.

Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Hola. Me llamo Ana. ¿Cómo te llamas?
Word bank: hola, adiós, gracias, por favor, buenos días, hasta luego.

1. Translate into English: hola. (1 point)

Answer / scoring: hello

2. Translate into Spanish: goodbye. (1 point)

Answer / scoring: adiós; accept appropriate article/gender variants when meaning is correct.

3. Complete: Me ___ Ana. (My name is Ana.) (1 point)

Answer / scoring: llamo

4. Oral task (teacher listens): Use 2 short statements or a 2-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Hola. Me llamo Ana. ¿Cómo te llamas? Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.

Social Studies - 10 points

Score: _____ / 10

W2 background: Landforms, water bodies, elevation, or other natural features. Explains the meanings of symbols/colors. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What does a physical map emphasize? (1 point)

Answer / scoring: Landforms, water bodies, elevation, or other natural features.

2. What does a map key do? (1 point)

Answer / scoring: Explains the meanings of symbols/colors.

3. Use W2 background. Identify one claim that could be checked against a map, document, or other reliable source. (1 point)

Answer / scoring: Landforms, water bodies, elevation, or other natural features. OR Explains the meanings of symbols/colors.; accept a checkable claim accurately drawn from the note.

4. Use W2 background. Explain how two ideas in the note connect. (2 points)

Answer / scoring: Accept a logical relationship using accurate details from both statements; do not require one exact interpretation.

5. Name one kind of source that could help check the background note and explain why. (2 points)

Answer / scoring: A relevant map, scholarly/educator text, community source, historical document, or data record; source must match the claim. One point for suitable source and one for purpose.

6. Sketch a physical map with a key and direction marker. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). At least three correctly explained symbols/features and a north/direction marker.

Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Mi nombre se escribe A-N-A.
Word bank: a, e, i, o, u, ñ.

1. Write the first five letters of the Spanish alphabet. (1 point)

Answer / scoring: a, b, c, d, e

2. What is the name of the Spanish letter ñ? (1 point)

Answer / scoring: eñe

3. Write the Spanish letter n with a tilde. (1 point)

Answer / scoring: ñ

4. Oral task (teacher listens): Use 2 short statements or a 2-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Mi nombre se escribe A-N-A. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.

Science - 10 points

Score: _____ / 10

W3 data: A fictional class compares pulse counts at rest and after activity. Trial A: 73 pulse counts in one minute; Trial B: 103 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

1. What is the main role of the digestive system? (1 point)

Answer / scoring: Break down food so nutrients can be absorbed.

2. What is the main role of the respiratory system? (1 point)

Answer / scoring: Exchange gases: bring oxygen into the body and remove carbon dioxide.

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 30 pulse counts in one minute.

4. Use W3 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 103 versus 73 in A; accept an accurate description without an unsupported causal claim.

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draw how digestion and breathing support the body. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct food/nutrient pathway and oxygen/gas-exchange role; labeled arrows, not necessarily every organ.

Spanish - 7 points

Score: _____ / 7

Spanish model and vocabulary (cue support allowed)

Tengo doce libros.
Word bank: uno, dos, siete, doce, quince, veinte.

1. Translate into English: uno. (1 point)

Answer / scoring: one

2. Translate into Spanish: two. (1 point)

Answer / scoring: dos; accept appropriate article/gender variants when meaning is correct.

3. Write 14 in Spanish. (1 point)

Answer / scoring: catorce

4. Oral task (teacher listens): Use 2 short statements or a 2-line exchange about this week/module topic. You may use the supplied vocabulary/model as a cue, but add your own relevant detail or question. (4 points)

Answer / scoring: Oral rubric (4): communicates topic meaning (1); uses relevant vocabulary (1); uses understandable phrases/sentences (1); responds to teacher or adds a relevant original detail/question (1). Sample cue: Tengo doce libros. Accept different accurate answers and appropriate gender/person forms. Minor accent/pronunciation errors do not erase understood meaning.

A Library Garden

Maya wanted a quiet place to read outside. She asked the librarian if the empty corner of the courtyard could become a garden. First, Maya measured the space. Next, she drew a plan with a path and two benches. Her friends brought seed packets, and an adult helped them plant. A week later, Maya noticed that the plants beside the wall were dry. She moved the watering can closer to them and made a watering chart. By spring, visitors were reading beside green leaves. Maya learned that a good plan needs careful observation as well as enthusiasm.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Answer / scoring: 4-point rubric: two appropriate module skills identified (2), two accurate applications explained (2). Check against the module's listed learning goals.

Science - 28 points

Score: _____ / 28

W1 data: A fictional class compares pulse counts at rest and after activity. Trial A: 71 pulse counts in one minute; Trial B: 101 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares pulse counts at rest and after activity. Trial A: 72 pulse counts in one minute; Trial B: 102 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares pulse counts at rest and after activity. Trial A: 73 pulse counts in one minute; Trial B: 103 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares pulse counts at rest and after activity. Trial A: 74 pulse counts in one minute; Trial B: 104 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

1. How is a system different from one part? (1 point)

Answer / scoring: A system has interacting parts; a change in one part can affect others.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 30 pulse counts in one minute.

3. Draw a simple system with at least three interacting parts. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Three labeled parts and at least two arrows explaining interactions; e.g., plant, water, sunlight.

4. Why is the body a system rather than unrelated organs? (1 point)

Answer / scoring: Organs and systems depend on one another.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 30 pulse counts in one minute.

6. Model an interaction between two body systems. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Label two systems and show a correct interaction; e.g., lungs supply oxygen and circulation transports it.

7. What is the main role of the respiratory system? (1 point)

Answer / scoring: Exchange gases: bring oxygen into the body and remove carbon dioxide.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 30 pulse counts in one minute.

9. Draw how digestion and breathing support the body. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct food/nutrient pathway and oxygen/gas-exchange role; labeled arrows, not necessarily every organ.

10. What is one function of the skeleton? (1 point)

Answer / scoring: Support, protection of organs, or assistance with movement.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 30 pulse counts in one minute.

12. Model how bones, muscles, and circulation help a person move. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct labels for support/movement and transport, with a reasonable interaction.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

Social Studies - 24 points

Score: _____ / 24

W1 background: An area grouped by shared physical or human characteristics. Landforms, soils, waterways, and related characteristics vary across the state. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Landforms, water bodies, elevation, or other natural features. Explains the meanings of symbols/colors. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Comparison reveals similarities and differences using common criteria. They can provide water, transport, fertile land, or risk from flooding. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Something from the natural environment people use. They affect possible industries, jobs, production, and trade. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What is a geographic region? (1 point)

Answer / scoring: An area grouped by shared physical or human characteristics.

2. Why does Mississippi include different physical regions? (1 point)

Answer / scoring: Landforms, soils, waterways, and related characteristics vary across the state.

3. Make a simple region-comparison organizer. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). At least two shared/different physical features and a clear basis for grouping.

4. What does a physical map emphasize? (1 point)

Answer / scoring: Landforms, water bodies, elevation, or other natural features.

5. What does a map key do? (1 point)

Answer / scoring: Explains the meanings of symbols/colors.

6. Sketch a physical map with a key and direction marker. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). At least three correctly explained symbols/features and a north/direction marker.

7. Why compare two regions rather than describe only one? (1 point)

Answer / scoring: Comparison reveals similarities and differences using common criteria.

8. How can rivers affect where people live or work? (1 point)

Answer / scoring: They can provide water, transport, fertile land, or risk from flooding.

9. Compare a river plain and a hilly region. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Use landform/water features and one plausible effect on settlement or work.

10. What is a natural resource? (1 point)

Answer / scoring: Something from the natural environment people use.

11. How can resources influence an economy? (1 point)

Answer / scoring: They affect possible industries, jobs, production, and trade.

12. Show a resource-to-product-to-job chain. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Correct resource, useful product, and associated work; e.g., timber to lumber to construction.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

Grade 4 · Module 2 Week 1 Friday gap quiz - TEACHER ANSWER KEY

Writing and conventions · required gap check - 8 points

Score: _____ / 8

The School Butterfly Box

The class watched a butterfly develop. At first, tiny eggs rested on a leaf. Caterpillars hatched and ate plant material. Later, each caterpillar formed a chrysalis. Finally, an adult butterfly emerged. Students recorded dates and made drawings instead of touching the animals. One student wrote that a butterfly is simply a small bird. The teacher asked the class to check its evidence. Their notes showed an insect with six legs, not a bird with two. Careful records helped them correct the mistake. Watching one animal did not tell them everything about every butterfly, but it gave them a useful beginning.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares pulse counts at rest and after activity. Trial A: 71 pulse counts in one minute; Trial B: 101 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

1. Why does the heart beat faster during activity? (1 point)

Answer / scoring: Working tissues need increased transport of oxygen and nutrients.

2. How do lungs and circulation work together? (1 point)

Answer / scoring: Lungs exchange gases; circulation carries oxygen to tissues and returns carbon dioxide.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 30 pulse counts in one minute.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 101 versus 71 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Show the path from breathing to oxygen delivery to a muscle. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Lungs to blood/circulation to muscle; clear labels and arrows.

The School Butterfly Box

The class watched a butterfly develop. At first, tiny eggs rested on a leaf. Caterpillars hatched and ate plant material. Later, each caterpillar formed a chrysalis. Finally, an adult butterfly emerged. Students recorded dates and made drawings instead of touching the animals. One student wrote that a butterfly is simply a small bird. The teacher asked the class to check its evidence. Their notes showed an insect with six legs, not a bird with two. Careful records helped them correct the mistake. Watching one animal did not tell them everything about every butterfly, but it gave them a useful beginning.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

Social Studies - 10 points

Score: _____ / 10

W2 background: An organized area of economic activity producing goods/services. It connects materials, workers, products, and markets. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What is an industry? (1 point)

Answer / scoring: An organized area of economic activity producing goods/services.

2. How can transportation support an industry? (1 point)

Answer / scoring: It connects materials, workers, products, and markets.

3. Use W2 background. Identify one claim that could be checked against a map, document, or other reliable source. (1 point)

Answer / scoring: An organized area of economic activity producing goods/services. OR It connects materials, workers, products, and markets.; accept a checkable claim accurately drawn from the note.

4. Use W2 background. Explain how two ideas in the note connect. (2 points)

Answer / scoring: Accept a logical relationship using accurate details from both statements; do not require one exact interpretation.

5. Name one kind of source that could help check the background note and explain why. (2 points)

Answer / scoring: A relevant map, scholarly/educator text, community source, historical document, or data record; source must match the claim. One point for suitable source and one for purpose.

6. Model a Mississippi resource and related industry. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Plausible resource, processing/service, transport, and market connection.

Grade 4 · Module 2 Week 3 Friday gap quiz - TEACHER ANSWER KEY

Scheduled: 2026-12-04 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 4.NBT.5; 4.OA.1-3 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: L.4.1-2 | Social Studies: MS CCRS SS Grade 4 - Mississippi Studies & Regions | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Score: _____ / 10

W3 data: A fictional class compares pulse counts at rest and after activity. Trial A: 73 pulse counts in one minute; Trial B: 103 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

1. What are common stages in a flowering plant life cycle? (1 point)

Answer / scoring: Seed, germination, growth, flowering, and new seed production.

2. How does a butterfly life cycle differ from simple growth in size? (1 point)

Answer / scoring: It includes distinct stages: egg, larva, pupa, and adult.

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 30 pulse counts in one minute.

4. Use W3 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 103 versus 73 in A; accept an accurate description without an unsupported causal claim.

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draw and compare a flowering plant and butterfly life cycle. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct labeled stages and one similarity/difference; arrows show the cycle.

W1 data: A fictional class compares pulse counts at rest and after activity. Trial A: 71 pulse counts in one minute; Trial B: 101 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares pulse counts at rest and after activity. Trial A: 72 pulse counts in one minute; Trial B: 102 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares pulse counts at rest and after activity. Trial A: 73 pulse counts in one minute; Trial B: 103 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares pulse counts at rest and after activity. Trial A: 74 pulse counts in one minute; Trial B: 104 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

1. How do lungs and circulation work together? (1 point)

Answer / scoring: Lungs exchange gases; circulation carries oxygen to tissues and returns carbon dioxide.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 30 pulse counts in one minute.

3. Show the path from breathing to oxygen delivery to a muscle. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Lungs to blood/circulation to muscle; clear labels and arrows.

4. Why can handwashing reduce spread of some germs? (1 point)

Answer / scoring: It removes many germs from hands, reducing transfer.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 30 pulse counts in one minute.

6. Explain a germ-transfer model using clean paper or a diagram. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Show a transfer pathway and an interruption such as handwashing; no claim that all diseases are prevented.

7. How does a butterfly life cycle differ from simple growth in size? (1 point)

Answer / scoring: It includes distinct stages: egg, larva, pupa, and adult.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 30 pulse counts in one minute.

9. Draw and compare a flowering plant and butterfly life cycle. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct labeled stages and one similarity/difference; arrows show the cycle.

10. What is the difference between an observation and an explanation? (1 point)

Answer / scoring: An observation records what was noticed; an explanation interprets why it happened.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 30 pulse counts in one minute.

12. Plan a research report about two interacting body systems. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Clear question, two appropriate sources, accurate interaction, and a way to record evidence.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

Social Studies - 24 points

Score: _____ / 24

W1 background: Crop growth depends on suitable soil, water, and other conditions. No; renewal takes time and use can exceed replacement. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: An organized area of economic activity producing goods/services. It connects materials, workers, products, and markets. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Births, deaths, and people moving in/out. Shared and changing practices, beliefs, languages, arts, and ways of life. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Readers can check, credit, and evaluate the information. Organization, explanation, and evidence related to a question. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Why can soil and water influence farming? (1 point)

Answer / scoring: Crop growth depends on suitable soil, water, and other conditions.

2. Is a natural resource unlimited because it is renewable? (1 point)

Answer / scoring: No; renewal takes time and use can exceed replacement.

3. Compare two agricultural choices for a region. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Relevant soil/water/climate needs, possible benefit, and a resource constraint.

4. What is an industry? (1 point)

Answer / scoring: An organized area of economic activity producing goods/services.

5. How can transportation support an industry? (1 point)

Answer / scoring: It connects materials, workers, products, and markets.

6. Model a Mississippi resource and related industry. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Plausible resource, processing/service, transport, and market connection.

7. How can a community's population change? (1 point)

Answer / scoring: Births, deaths, and people moving in/out.

8. What is culture? (1 point)

Answer / scoring: Shared and changing practices, beliefs, languages, arts, and ways of life.

9. Describe a community respectfully without assuming everyone is the same. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Use examples of practices and acknowledge variation among people.

10. Why should a regional report identify its sources? (1 point)

Answer / scoring: Readers can check, credit, and evaluate the information.

11. What makes a presentation more useful than a list of facts? (1 point)

Answer / scoring: Organization, explanation, and evidence related to a question.

12. Plan a regional presentation. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Clear topic/question, map, relevant evidence, source notes, and conclusion.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

Score: _____ / 8

The Sparrow and the Lantern

This is an original fable. A sparrow bragged that she could light the whole forest with one lantern. An owl asked her to test the lantern before promising too much. The sparrow refused. At dusk she lifted the lantern, but its light reached only the nearest branch. Embarrassed, she almost flew away. Then she invited the fireflies to help. Together they marked a safe path to the clearing. The sparrow thanked each helper and promised to listen before boasting again. The owl did not laugh at her mistake; he praised the useful path.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

Score: _____ / 10

W1 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 21 temperature in degrees C; Trial B: 29 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. What is thermal energy related to? (1 point)

Answer / scoring: Motion of particles; temperature reflects average particle kinetic energy at this level.

2. In which direction does heat transfer naturally between objects? (1 point)

Answer / scoring: From higher temperature toward lower temperature.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 29 versus 21 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draw heat transfer from a warm object to a cooler one. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Two temperatures identified; arrow from warmer to cooler; transfer reduces the difference.

Score: _____ / 28

W1 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 21 temperature in degrees C; Trial B: 29 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 22 temperature in degrees C; Trial B: 30 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 23 temperature in degrees C; Trial B: 31 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 24 temperature in degrees C; Trial B: 32 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. In which direction does heat transfer naturally between objects? (1 point)

Answer / scoring: From higher temperature toward lower temperature.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

3. Draw heat transfer from a warm object to a cooler one. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Two temperatures identified; arrow from warmer to cooler; transfer reduces the difference.

4. What is a light source? (1 point)

Answer / scoring: Something that produces light, such as the Sun or a lamp.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

6. Model how light allows a person to see a book. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Source to book to eye arrows; book reflects rather than produces the light.

7. What is refraction? (1 point)

Answer / scoring: A change in light's direction as it passes between materials where its speed differs.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

9. Draw reflection and refraction as different paths. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Reflection returns from surface; refraction crosses a boundary and changes direction.

10. What belongs in a claim-evidence explanation? (1 point)

Answer / scoring: An answer to the question, relevant observations/data, and reasoning.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

12. Design a comparison of two reflective surfaces. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Same light source and distance, different surface, a measure/observation, and a cautious claim.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

Social Studies - 24 points

Score: _____ / 24

W1 background: No; Indigenous communities, including the Mississippi Band of Choctaw Indians, continue today. They provide community knowledge and perspectives rather than outside assumptions only. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Water, land, resources, transport, and hazards affect choices. No; technology, history, culture, and other factors also matter. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Communities have different histories, experiences, beliefs, and practices. Its meaning and use can vary among people and over time. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Evidence used to learn about the past, such as documents, objects, maps, or accounts. Each source can offer limited or different evidence. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Are Indigenous peoples of Mississippi only part of the past? (1 point)

Answer / scoring: No; Indigenous communities, including the Mississippi Band of Choctaw Indians, continue today.

2. Why use a tribe's own materials when learning about its culture? (1 point)

Answer / scoring: They provide community knowledge and perspectives rather than outside assumptions only.

3. Plan a respectful study of an Indigenous community. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Identify a community source, distinguish past/present, and avoid treating all tribes as identical.

4. How can geography influence settlement? (1 point)

Answer / scoring: Water, land, resources, transport, and hazards affect choices.

5. Does geography completely determine people's choices? (1 point)

Answer / scoring: No; technology, history, culture, and other factors also matter.

6. Model two factors affecting settlement. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Two relevant factors with a plausible relationship and acknowledgement of other influences.

7. Why can traditions differ among communities in one region? (1 point)

Answer / scoring: Communities have different histories, experiences, beliefs, and practices.

8. Why should a tradition be described with context? (1 point)

Answer / scoring: Its meaning and use can vary among people and over time.

9. Compare two traditions without ranking one culture as better. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Use respectful descriptive criteria, sources, and similarities/differences.

10. What is a historical source? (1 point)

Answer / scoring: Evidence used to learn about the past, such as documents, objects, maps, or accounts.

11. Why compare sources for a regional-history project? (1 point)

Answer / scoring: Each source can offer limited or different evidence.

12. Create a short regional-history project plan. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Question, time/place, two sources, evidence notes, and a presentation idea.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

Grade 4 · Module 4 Week 1 Friday gap quiz - TEACHER ANSWER KEY

Scheduled: 2027-01-29 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 4.NF.1-2 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: P.4.6A,C | Social Studies: MS CCRS SS Grade 4 - civics within Mississippi Studies | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Writing and conventions · required gap check - 8 points

Score: _____ / 8

The Missing Drum

Leo was ready to tell a story with sound effects, but his cardboard drum had disappeared. "I cannot perform without it," he said. His sister pointed to a box of empty containers. Leo tapped a large plastic bowl, then a smaller cup. The sounds were different. He practiced a steady beat and asked his sister to read the first line of the story. At the performance, he used a soft beat for footsteps and a louder beat for thunder. The audience followed the story closely. Afterward, Leo found his old drum behind a chair. He smiled because solving the problem had given him a better performance.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

Science - 10 points

Score: _____ / 10

W1 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 21 temperature in degrees C; Trial B: 29 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. What produces sound? (1 point)

Answer / scoring: Vibrating objects create disturbances that travel through a medium.

2. How are pitch and volume different? (1 point)

Answer / scoring: Pitch relates to vibration frequency; loudness relates partly to amplitude.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 29 versus 21 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draw a vibrating source and explain pitch versus loudness. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Label source/vibration; faster vibration means higher pitch; larger amplitude can mean louder sound.

W2 background: An action supporting community/public life, such as following laws or participating responsibly. Learn about issues, discuss respectfully, help a community project, or communicate ideas. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What is a civic responsibility? (1 point)

Answer / scoring: An action supporting community/public life, such as following laws or participating responsibly.

2. How can a child participate in civic life? (1 point)

Answer / scoring: Learn about issues, discuss respectfully, help a community project, or communicate ideas.

3. Use W2 background. Identify one claim that could be checked against a map, document, or other reliable source. (1 point)

Answer / scoring: An action supporting community/public life, such as following laws or participating responsibly. OR Learn about issues, discuss respectfully, help a community project, or communicate ideas.; accept a checkable claim accurately drawn from the note.

4. Use W2 background. Explain how two ideas in the note connect. (2 points)

Answer / scoring: Accept a logical relationship using accurate details from both statements; do not require one exact interpretation.

5. Name one kind of source that could help check the background note and explain why. (2 points)

Answer / scoring: A relevant map, scholarly/educator text, community source, historical document, or data record; source must match the claim. One point for suitable source and one for purpose.

6. Plan a civic action suitable for a student. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Defined concern, appropriate action, affected people, and a way to evaluate results.

W4 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 24 temperature in degrees C; Trial B: 32 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. How are pitch and volume different? (1 point)

Answer / scoring: Pitch relates to vibration frequency; loudness relates partly to amplitude.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

3. Draw a vibrating source and explain pitch versus loudness. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Label source/vibration; faster vibration means higher pitch; larger amplitude can mean louder sound.

4. What is an insulator? (1 point)

Answer / scoring: A material that resists movement of electric charge.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

6. Model a simple test comparing a conductor and an insulator. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Same battery/bulb/wires; change only test material; predict completed versus interrupted circuit.

7. Name an energy change in a battery-powered lamp. (1 point)

Answer / scoring: Stored chemical energy to electrical energy to light and thermal energy.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

9. Draw a battery, wires, and bulb in a closed circuit. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Complete path; correct labels and an energy-change explanation.

10. What is a design constraint? (1 point)

Answer / scoring: A limit such as materials, time, size, or cost.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

12. Plan a sound or electric device with one goal and one constraint. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Goal, realistic constraint, labeled design, and a test/improvement step.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

Social Studies - 24 points

Score: _____ / 24

W1 background: Make/enforce laws, provide services, protect rights, or manage public decisions. State government addresses statewide matters; local governments address communities within their authority. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: An action supporting community/public life, such as following laws or participating responsibly. Learn about issues, discuss respectfully, help a community project, or communicate ideas. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Shared history, identity, ideals, or institutions, interpreted in context. They serve public/community purposes and are organized for those roles. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Different resources and needs can produce different solutions. Decisions have benefits, costs, and potentially unequal effects. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What is one role of government? (1 point)

Answer / scoring: Make/enforce laws, provide services, protect rights, or manage public decisions.

2. How can state and local governments differ? (1 point)

Answer / scoring: State government addresses statewide matters; local governments address communities within their authority.

3. Compare one state service and one local service. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Appropriate examples and explanation of the different scale/responsibility.

4. What is a civic responsibility? (1 point)

Answer / scoring: An action supporting community/public life, such as following laws or participating responsibly.

5. How can a child participate in civic life? (1 point)

Answer / scoring: Learn about issues, discuss respectfully, help a community project, or communicate ideas.

6. Plan a civic action suitable for a student. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Defined concern, appropriate action, affected people, and a way to evaluate results.

7. What can a public symbol represent? (1 point)

Answer / scoring: Shared history, identity, ideals, or institutions, interpreted in context.

8. Why are libraries and schools called public institutions? (1 point)

Answer / scoring: They serve public/community purposes and are organized for those roles.

9. Explain one public institution's purpose. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Institution, service, people served, and a reason it matters.

10. Why compare how communities solve a civic problem? (1 point)

Answer / scoring: Different resources and needs can produce different solutions.

11. Why should a plan consider people affected by it? (1 point)

Answer / scoring: Decisions have benefits, costs, and potentially unequal effects.

12. Compare two civic solutions. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Common problem, benefits/costs, who is affected, and an evidence-based choice.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

Grade 4 · Module 5 Week 1 Friday gap quiz - TEACHER ANSWER KEY

Scheduled: 2027-02-26 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 4.NF.3-4 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: P.4.6A-C; engineering design | Social Studies: MS CCRS SS Grade 4 - regions/geography/economics | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Writing and conventions · required gap check - 8 points

Score: _____ / 8

Keeping Water Cool

Two students investigated how to keep a cup of water cool. They used identical cups, the same amount of water, and the same starting temperature. One cup was wrapped in cloth; the other was left uncovered. After twenty minutes in the same room, they measured both temperatures. They wrote the results in a table. They did not call one measurement proof that cloth is always the best material. Instead, they proposed trying another material and repeating the test. Their report explained the question, method, observations, and limits of their conclusion. A clear report lets another reader understand what was tested and what still needs investigation.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

Science - 10 points

Score: _____ / 10

W1 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 21 temperature in degrees C; Trial B: 29 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. Name three forms of energy. (1 point)

Answer / scoring: Accept thermal, light, sound, electrical, chemical, motion/kinetic.

2. What does energy transfer mean? (1 point)

Answer / scoring: Energy moves from one object/system to another.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 29 versus 21 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Show an energy transfer in a familiar situation. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct source, receiving object/system, and transfer pathway; e.g., sunlight warms pavement.

Social Studies - 10 points

Score: _____ / 10

W2 background: Temperature and precipitation influence crops, water needs, energy use, and other activities. No; climate uses long-term patterns. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How can climate affect use of resources? (1 point)

Answer / scoring: Temperature and precipitation influence crops, water needs, energy use, and other activities.

2. Does one weather event describe a region's climate? (1 point)

Answer / scoring: No; climate uses long-term patterns.

3. Use W2 background. Identify one claim that could be checked against a map, document, or other reliable source. (1 point)

Answer / scoring: Temperature and precipitation influence crops, water needs, energy use, and other activities. OR No; climate uses long-term patterns.; accept a checkable claim accurately drawn from the note.

4. Use W2 background. Explain how two ideas in the note connect. (2 points)

Answer / scoring: Accept a logical relationship using accurate details from both statements; do not require one exact interpretation.

5. Name one kind of source that could help check the background note and explain why. (2 points)

Answer / scoring: A relevant map, scholarly/educator text, community source, historical document, or data record; source must match the claim. One point for suitable source and one for purpose.

6. Compare climate and resources in two Southeast locations. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Long-term criteria, accurate resource connection, and no one-day generalization.

Their report explained the question, method, observations, and limits of their conclusion. A clear report lets another reader understand what was tested and what still needs investigation.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

Science - 10 points

Score: _____ / 10

W3 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 23 temperature in degrees C; Trial B: 31 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. What does energy transformation mean? (1 point)

Answer / scoring: Energy changes form within a system.

2. Why does a working device often become warm? (1 point)

Answer / scoring: Some energy is transferred as thermal energy.

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

4. Use W3 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 31 versus 23 in A; accept an accurate description without an unsupported causal claim.

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draw an energy-chain model for a fan or lamp. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct initial energy source, intermediate electrical energy, and motion/light plus thermal output.

Grade 4 · Module 5 Comprehensive gap assessment - TEACHER ANSWER KEY

Scheduled: 2027-03-26 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 4.NF.3-4 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: P.4.6A-C; engineering design | Social Studies: MS CCRS SS Grade 4 - regions/geography/economics | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Keeping Water Cool

Two students investigated how to keep a cup of water cool. They used identical cups, the same amount of water, and the same starting temperature. One cup was wrapped in cloth; the other was left uncovered. After twenty minutes in the same room, they measured both temperatures. They wrote the results in a table. They did not call one measurement proof that cloth is always the best material. Instead, they proposed trying another material and repeating the test. Their report explained the question, method, observations, and limits of their conclusion. A clear report lets another reader understand what was tested and what still needs investigation.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Answer / scoring: 4-point rubric: two appropriate module skills identified (2), two accurate applications explained (2). Check against the module's listed learning goals.

Science - 28 points

Score: _____ / 28

W1 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 21 temperature in degrees C; Trial B: 29 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 22 temperature in degrees C; Trial B: 30 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 23 temperature in degrees C; Trial B: 31 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 24 temperature in degrees C; Trial B: 32 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. What does energy transfer mean? (1 point)

Answer / scoring: Energy moves from one object/system to another.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

3. Show an energy transfer in a familiar situation. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct source, receiving object/system, and transfer pathway; e.g., sunlight warms pavement.

4. Why does an insulating material slow heat transfer? (1 point)

Answer / scoring: Its properties reduce the rate of thermal transfer; it does not create cold.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

6. Plan a fair insulation comparison. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Equal cups, water amounts and initial temperatures; change wrap material; compare temperatures over equal intervals.

7. Why does a working device often become warm? (1 point)

Answer / scoring: Some energy is transferred as thermal energy.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

9. Draw an energy-chain model for a fan or lamp. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct initial energy source, intermediate electrical energy, and motion/light plus thermal output.

10. Why revise a design after testing? (1 point)

Answer / scoring: Evidence can show a weakness and suggest improvement.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

12. Propose an energy-saving design and a test. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Reasonable goal, design, measured comparison, and a possible revision based on results.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

Social Studies - 24 points

Score: _____ / 24

W1 background: To study shared location, physical features, climate, or cultural/economic patterns. Yes; groupings depend on purpose and criteria. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Temperature and precipitation influence crops, water needs, energy use, and other activities. No; climate uses long-term patterns. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Resources, transport, population, skills, history, and decisions vary. Exchange of goods/services among people or places. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Broad regional similarities coexist with local differences. It makes similarities/differences interpretable. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Why do people group states into regions? (1 point)

Answer / scoring: To study shared location, physical features, climate, or cultural/economic patterns.

2. Can regional boundaries vary by source? (1 point)

Answer / scoring: Yes; groupings depend on purpose and criteria.

3. Map a Southeast grouping and explain your source's criteria. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Labeled states and stated grouping/source; accept reasonable sourced regional definitions.

4. How can climate affect use of resources? (1 point)

Answer / scoring: Temperature and precipitation influence crops, water needs, energy use, and other activities.

5. Does one weather event describe a region's climate? (1 point)

Answer / scoring: No; climate uses long-term patterns.

6. Compare climate and resources in two Southeast locations. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Long-term criteria, accurate resource connection, and no one-day generalization.

7. Why can two nearby places have different economies? (1 point)

Answer / scoring: Resources, transport, population, skills, history, and decisions vary.

8. What is trade? (1 point)

Answer / scoring: Exchange of goods/services among people or places.

9. Show an economic connection between two places. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Goods/service, reason for exchange, and a transport/communication connection.

10. How can Mississippi share features with the Southeast and still have its own regions? (1 point)

Answer / scoring: Broad regional similarities coexist with local differences.

11. Why should comparisons use the same criteria? (1 point)

Answer / scoring: It makes similarities/differences interpretable.

12. Compare Mississippi with another Southeast state. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Same criteria such as water, landforms, climate, or work; source-supported statements.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

Score: _____ / 8

A Case for Shade

Our reading area should have a shaded bench. At noon, the sunny bench can be uncomfortable. A shaded seat would give readers another choice. We can first move a portable shade nearby and record how many students use the area. Then we can ask whether the change helped. Some people worry that a permanent structure would cost too much. That is a fair concern, so a temporary test is a sensible first step. The goal is not to promise that every reader will love the bench. The goal is to use evidence to decide whether a small improvement is worthwhile.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. What drives much of the water cycle? (1 point)

Answer / scoring: Solar energy helps evaporate water; gravity moves precipitation and runoff.

2. How are evaporation and condensation different? (1 point)

Answer / scoring: Liquid becomes gas in evaporation; gas becomes liquid in condensation.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 19 versus 11 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draw a water-cycle model. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Include evaporation, condensation, precipitation, and collection/runoff with correct arrows.

W2 background: Flat land and suitable soils can support large fields, subject to climate/resources. Regions include physical, cultural, and economic variation. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How can broad plains support some types of farming? (1 point)

Answer / scoring: Flat land and suitable soils can support large fields, subject to climate/resources.

2. Why is the Midwest more than one kind of land or community? (1 point)

Answer / scoring: Regions include physical, cultural, and economic variation.

3. Use W2 background. Identify one claim that could be checked against a map, document, or other reliable source. (1 point)

Answer / scoring: Flat land and suitable soils can support large fields, subject to climate/resources. OR Regions include physical, cultural, and economic variation.; accept a checkable claim accurately drawn from the note.

4. Use W2 background. Explain how two ideas in the note connect. (2 points)

Answer / scoring: Accept a logical relationship using accurate details from both statements; do not require one exact interpretation.

5. Name one kind of source that could help check the background note and explain why. (2 points)

Answer / scoring: A relevant map, scholarly/educator text, community source, historical document, or data record; source must match the claim. One point for suitable source and one for purpose.

6. Compare a farm area and an urban area in the Midwest. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Land/resource use and economic connection; avoid assuming every place is identical.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How are evaporation and condensation different? (1 point)

Answer / scoring: Liquid becomes gas in evaporation; gas becomes liquid in condensation.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

3. Draw a water-cycle model. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Include evaporation, condensation, precipitation, and collection/runoff with correct arrows.

4. Why record weather at consistent times? (1 point)

Answer / scoring: Measurements become more comparable across days.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

6. Design a five-day weather log. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). At least two variables with units, consistent time/location, and a table format.

7. What does a thermometer measure? (1 point)

Answer / scoring: Temperature.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

9. Draw a simple weather instrument and explain its use. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Appropriate instrument, labels, measurement variable, and consistent measurement method.

10. What data might help a weather forecast? (1 point)

Answer / scoring: Temperature, pressure, wind, humidity, cloud/radar information, or prior patterns.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

12. Write a cautious forecast from a pattern in a weather log. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Use stated evidence and qualified language; do not claim a pattern guarantees an outcome.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

Social Studies - 24 points

Score: _____ / 24

W1 background: Coasts/rivers supported travel, trade, settlement, and industry. Human decisions and changes over time also shape communities. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Flat land and suitable soils can support large fields, subject to climate/resources. Regions include physical, cultural, and economic variation. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: It supports a fair, clear geographic comparison. Water, food, transport, housing, work, or public services. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: People carry skills, ideas, relationships, and cultural practices as they move. Jobs, family, safety, education, and many other circumstances vary. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What is one way water has influenced the Northeast's development? (1 point)

Answer / scoring: Coasts/rivers supported travel, trade, settlement, and industry.

2. Why should a region's history be considered along with its geography? (1 point)

Answer / scoring: Human decisions and changes over time also shape communities.

3. Compare two Northeast states using a labeled map or table. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Two relevant shared/different features and clearly named sources/criteria.

4. How can broad plains support some types of farming? (1 point)

Answer / scoring: Flat land and suitable soils can support large fields, subject to climate/resources.

5. Why is the Midwest more than one kind of land or community? (1 point)

Answer / scoring: Regions include physical, cultural, and economic variation.

6. Compare a farm area and an urban area in the Midwest. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Land/resource use and economic connection; avoid assuming every place is identical.

7. Why compare Northeast and Midwest using common categories? (1 point)

Answer / scoring: It supports a fair, clear geographic comparison.

8. What is one shared need of communities in both regions? (1 point)

Answer / scoring: Water, food, transport, housing, work, or public services.

9. Construct a region-comparison chart. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). At least two common criteria, accurate similarities/differences, and a source note.

10. How can migration connect regions? (1 point)

Answer / scoring: People carry skills, ideas, relationships, and cultural practices as they move.

11. Why can people move for different reasons? (1 point)

Answer / scoring: Jobs, family, safety, education, and many other circumstances vary.

12. Model one movement between regions. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Origin/destination, possible reason, and a connection/effect; avoid claiming all migrants share one reason.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

Scheduled: 2027-04-30 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 4.G.1-3; 4.MD.4-7 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: E.4.9B-C | Social Studies: MS CCRS SS Grade 4 - regions/geography | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Writing and conventions · required gap check - 8 points

Score: _____ / 8

Rain at the Window

Original poem:
Rain drums softly on the glass,
Silver footsteps cross the grass.
Clouds pull blankets through the sky,
While busy birds go fluttering by.
A puddle holds a crooked tree;
The wind sings low and talks to me.
Then sunlight opens one bright door,
And rain retreats to drum no more.

Prose companion: A short rain shower passed over the yard. Wind moved the clouds. When sunlight returned, the shower stopped.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How do weather and climate differ? (1 point)

Answer / scoring: Weather is short-term conditions; climate describes long-term patterns.

2. Can one hot day establish a climate trend? (1 point)

Answer / scoring: No; a long record is needed.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 19 versus 11 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Compare a daily weather report with a long-term climate summary. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct time scales and at least two comparable measures.

Social Studies - 10 points

Score: _____ / 10

W2 background: Geology, water, soils, and landforms influence what resources are available. Supplies, environmental impacts, and competing needs matter. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What is the connection between landforms and some resources? (1 point)

Answer / scoring: Geology, water, soils, and landforms influence what resources are available.

2. Why should resource use consider limits? (1 point)

Answer / scoring: Supplies, environmental impacts, and competing needs matter.

3. Use W2 background. Identify one claim that could be checked against a map, document, or other reliable source. (1 point)

Answer / scoring: Geology, water, soils, and landforms influence what resources are available. OR Supplies, environmental impacts, and competing needs matter.; accept a checkable claim accurately drawn from the note.

4. Use W2 background. Explain how two ideas in the note connect. (2 points)

Answer / scoring: Accept a logical relationship using accurate details from both statements; do not require one exact interpretation.

5. Name one kind of source that could help check the background note and explain why. (2 points)

Answer / scoring: A relevant map, scholarly/educator text, community source, historical document, or data record; source must match the claim. One point for suitable source and one for purpose.

6. Compare resource use in two landscapes. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Relevant landscape/resource connection, one constraint, and a source.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How can proximity to a large body of water affect temperature patterns? (1 point)

Answer / scoring: Water heats/cools more slowly than land and can moderate nearby temperatures.

2. Why does elevation matter for climate? (1 point)

Answer / scoring: Higher elevations are often cooler; other factors also matter.

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W3 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 21 versus 13 in A; accept an accurate description without an unsupported causal claim.

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Model two factors that can affect a region's climate. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Two relevant factors, correct explanations, and acknowledgement that climate has multiple influences.

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 12 milliliters of water collected; Trial B: 20 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Can one hot day establish a climate trend? (1 point)

Answer / scoring: No; a long record is needed.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

3. Compare a daily weather report with a long-term climate summary. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct time scales and at least two comparable measures.

4. What does an average hide? (1 point)

Answer / scoring: Variation/extremes and differences among observations.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

6. Make a climate comparison using a table or graph. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct labels/units, at least two locations or periods, and a cautious interpretation.

7. Why does elevation matter for climate? (1 point)

Answer / scoring: Higher elevations are often cooler; other factors also matter.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

9. Model two factors that can affect a region's climate. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Two relevant factors, correct explanations, and acknowledgement that climate has multiple influences.

10. What is one way to use an official weather alert? (1 point)

Answer / scoring: Read the alert and follow locally appropriate instructions from trusted authorities.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

12. Design a preparedness information poster. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Identify hazard, trusted information source, and a clear planning action; avoid unsupported guarantees.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

Social Studies - 24 points

Score: _____ / 24

W1 background: They affect routes, water access, land use, and costs/risks. Region groupings vary by purpose/source. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Geology, water, soils, and landforms influence what resources are available. Supplies, environmental impacts, and competing needs matter. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: No; regional generalizations do not capture all communities. Skills, customs, markets, arts, and livelihoods interact. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Distance represented by map measurements. They show complementary location and contextual information. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How can mountains or deserts influence travel and settlement? (1 point)

Answer / scoring: They affect routes, water access, land use, and costs/risks.

2. Why do West and Southwest labels need a defined source? (1 point)

Answer / scoring: Region groupings vary by purpose/source.

3. Create a West/Southwest physical-feature map. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Source-defined grouping, at least three features, legend, and direction.

4. What is the connection between landforms and some resources? (1 point)

Answer / scoring: Geology, water, soils, and landforms influence what resources are available.

5. Why should resource use consider limits? (1 point)

Answer / scoring: Supplies, environmental impacts, and competing needs matter.

6. Compare resource use in two landscapes. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Relevant landscape/resource connection, one constraint, and a source.

7. Does one product or tradition describe every person in a region? (1 point)

Answer / scoring: No; regional generalizations do not capture all communities.

8. How can culture and economy affect one another? (1 point)

Answer / scoring: Skills, customs, markets, arts, and livelihoods interact.

9. Describe a regional cultural/economic connection respectfully. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Specific sourced example and recognition of diversity/variation.

10. What does a map's scale help determine? (1 point)

Answer / scoring: Distance represented by map measurements.

11. Why use both map and written evidence for comparison? (1 point)

Answer / scoring: They show complementary location and contextual information.

12. Compare regions using a map and a second source. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Correct map interpretation, common criteria, and source-supported explanation.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

Grade 4 · Module 8 Week 1 Friday gap quiz - TEACHER ANSWER KEY

Scheduled: 2027-05-28 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 4.MD.1-3 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: E.4.9C; E.4.10 | Social Studies: MS CCRS SS Grade 4 - Mississippi Studies & U.S. regions | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Writing and conventions · required gap check - 8 points

Score: _____ / 8

A Map for the Show

Original short script:
[Nora puts a blank map on the table.]
NORA: Our trip story needs a map.
ELI: I can mark the river, but I do not know where to put the mountains.
NORA: Let us compare two sources before we draw.
[They examine a book and a map key.]
ELI: Now I see how the symbols work.
NORA: We can explain our choices to the audience.
Narrator: The friends label their route and practice their presentation.

Comparison note: In Greek tradition, Hermes is a messenger associated with travel; the Roman god Mercury has similar roles. Their names differ, but the shared roles make a useful comparison.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How do weathering and erosion differ? (1 point)

Answer / scoring: Weathering breaks material down; erosion moves it.

2. What is deposition? (1 point)

Answer / scoring: Material settles after being transported.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 19 versus 11 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draw a rock-to-sediment-to-deposit sequence. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correctly separate breakdown, transport, and settling with labels/arrows.

Comparison note: In Greek tradition, Hermes is a messenger associated with travel; the Roman god Mercury has similar roles. Their names differ, but the shared roles make a useful comparison.
Background for comparison: Hermes in Greek tradition and Mercury in Roman tradition are messengers associated with travel.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Answer / scoring: 4-point rubric: two appropriate module skills identified (2), two accurate applications explained (2). Check against the module's listed learning goals.

Science - 28 points

Score: _____ / 28

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 12 milliliters of water collected; Trial B: 20 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. What is deposition? (1 point)

Answer / scoring: Material settles after being transported.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

3. Draw a rock-to-sediment-to-deposit sequence. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correctly separate breakdown, transport, and settling with labels/arrows.

4. Why study past hazards in a place? (1 point)

Answer / scoring: Past records can help identify risks, though they do not guarantee future events.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

6. Model a hazard and one way to reduce an impact. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Hazard mechanism, realistic mitigation, and explanation of its limitation.

7. Why compare evidence before and after a change? (1 point)

Answer / scoring: It helps describe differences, though other factors may also influence them.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

9. Show one impact and a possible improvement. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Clear cause/pathway, affected system, and realistic action supported by evidence.

10. What makes a fair design test? (1 point)

Answer / scoring: Comparable conditions and a clearly defined outcome measure.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

12. Plan a model erosion-control test. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Same soil/water conditions, one design difference, sediment/runoff measurement, and revision step.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

Social Studies - 24 points

Score: _____ / 24

W1 background: Combine information to explain connections or a larger pattern. Not every place fits a broad pattern. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Distances, landforms, time, and resources affect travel choices. Routes, distances, landmarks, climate needs, and economic/cultural connections. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: They exchange goods, services, labor, knowledge, and resources. Evidence supports accurate claims; stereotypes erase variation. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: It organizes evidence into a coherent explanation or comparison. Sources/groupings/measurements can have limits. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What does synthesis mean in a regional study? (1 point)

Answer / scoring: Combine information to explain connections or a larger pattern.

2. Why should a region summary include exceptions? (1 point)

Answer / scoring: Not every place fits a broad pattern.

3. Create a U.S.-regions summary. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Common framework, key connections, and one example of variation within a region.

4. Why plan a route before a multi-region trip? (1 point)

Answer / scoring: Distances, landforms, time, and resources affect travel choices.

5. What can a trip plan show besides state names? (1 point)

Answer / scoring: Routes, distances, landmarks, climate needs, and economic/cultural connections.

6. Plan a hypothetical trip across two regions. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Labeled route, at least two destinations, relevant geographic reasoning, and a source.

7. How can regions depend on one another economically? (1 point)

Answer / scoring: They exchange goods, services, labor, knowledge, and resources.

8. Why do comparisons need evidence rather than stereotypes? (1 point)

Answer / scoring: Evidence supports accurate claims; stereotypes erase variation.

9. Compare two regions' economy/culture using the same criteria. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Two supported comparisons, clear sources, and respectful language.

10. What makes a presentation a synthesis rather than isolated facts? (1 point)

Answer / scoring: It organizes evidence into a coherent explanation or comparison.

11. Why explain uncertainty in a regional project? (1 point)

Answer / scoring: Sources/groupings/measurements can have limits.

12. Plan a regional-project presentation. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Question, map/table, supported synthesis, sources, and limitation.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).

Grade 4 · Module 9 Week 1 Friday gap quiz - TEACHER ANSWER KEY

Scheduled: 2027-06-25 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: Cumulative Grade 4 math standards | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: Cumulative L.4.1-2; P.4.6; E.4.9-10 | Social Studies: Cumulative MS CCRS SS Grade 4 | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Writing and conventions · required gap check - 8 points

Score: _____ / 8

The Final Project

Tara's class planned a display about their community. Tara chose a question: How can we help visitors understand the river? She gathered a map, a short library article, and notes from a visit. She labeled each source so she could find it again. Her first poster had many facts but no clear order. After reading it aloud, Tara grouped the information into three sections: location, uses, and ways to care for the river. She checked a number against the original article instead of trusting her memory. At the display, she explained both what she had learned and one question she still wanted to investigate.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. What makes a scientific question investigable? (1 point)

Answer / scoring: It can be explored using observations, measurements, or a test.

2. Why identify a system's boundary? (1 point)

Answer / scoring: It clarifies which parts/interactions are included in the model.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 19 versus 11 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Plan a systems/energy capstone investigation. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Question, system boundary, variables, evidence collection, and expected type of explanation.

Social Studies - 10 points

Score: _____ / 10

W2 background: Labels clarify place, measure, units, and purpose. Memory or copying may introduce errors. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Why label a map or data chart? (1 point)

Answer / scoring: Labels clarify place, measure, units, and purpose.

2. Why compare original information when a number seems doubtful? (1 point)

Answer / scoring: Memory or copying may introduce errors.

3. Use W2 background. Identify one claim that could be checked against a map, document, or other reliable source. (1 point)

Answer / scoring: Labels clarify place, measure, units, and purpose. OR Memory or copying may introduce errors.; accept a checkable claim accurately drawn from the note.

4. Use W2 background. Explain how two ideas in the note connect. (2 points)

Answer / scoring: Accept a logical relationship using accurate details from both statements; do not require one exact interpretation.

5. Name one kind of source that could help check the background note and explain why. (2 points)

Answer / scoring: A relevant map, scholarly/educator text, community source, historical document, or data record; source must match the claim. One point for suitable source and one for purpose.

6. Plan a map/data research check. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Trace a claim to its source, check labels/date/context, and record corrections.

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 12 milliliters of water collected; Trial B: 20 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Why identify a system's boundary? (1 point)

Answer / scoring: It clarifies which parts/interactions are included in the model.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

3. Plan a systems/energy capstone investigation. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Question, system boundary, variables, evidence collection, and expected type of explanation.

4. Why collect several observations? (1 point)

Answer / scoring: They reveal variation and strengthen comparison.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

6. Improve a model after receiving new evidence. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Identify a changed feature, cite evidence, and explain the improvement.

7. Why report limitations? (1 point)

Answer / scoring: They help readers judge what the evidence does and does not show.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

9. Write a claim-evidence-reasoning outline. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Clear claim, specific data/observations, correct mechanism, and one limitation.

10. How can a science showcase communicate uncertainty? (1 point)

Answer / scoring: State limits, unresolved questions, and possible next investigations.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

12. Plan a short science presentation. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Question, method/model, evidence, conclusion, limitation, and one next step.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

Social Studies - 24 points

Score: _____ / 24

W1 background: It identifies the problem, affected people, evidence, and options. The goal gives a basis for choosing actions and judging success. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Labels clarify place, measure, units, and purpose. Memory or copying may introduce errors. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: A clear question/claim, relevant evidence, geographic relationships, and sources. Feedback can reveal unclear reasoning or inaccurate information. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Explain learning, changes in thinking, limits, and next questions. It shows how evidence, revision, and skills developed. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How can research support a civic-action project? (1 point)

Answer / scoring: It identifies the problem, affected people, evidence, and options.

2. Why define a project's goal before acting? (1 point)

Answer / scoring: The goal gives a basis for choosing actions and judging success.

3. Plan a Mississippi/community civic-action project. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Specific need, sources/voices, realistic action, and evidence for judging results.

4. Why label a map or data chart? (1 point)

Answer / scoring: Labels clarify place, measure, units, and purpose.

5. Why compare original information when a number seems doubtful? (1 point)

Answer / scoring: Memory or copying may introduce errors.

6. Plan a map/data research check. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Trace a claim to its source, check labels/date/context, and record corrections.

7. What should a final regional product communicate? (1 point)

Answer / scoring: A clear question/claim, relevant evidence, geographic relationships, and sources.

8. Why revise after feedback? (1 point)

Answer / scoring: Feedback can reveal unclear reasoning or inaccurate information.

9. Outline a final product with a revision step. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Organized content, map/data, supporting sources, and a specific check or improvement.

10. What can reflection add to a year-end presentation? (1 point)

Answer / scoring: Explain learning, changes in thinking, limits, and next questions.

11. Why can growth matter alongside a final score? (1 point)

Answer / scoring: It shows how evidence, revision, and skills developed.

12. Plan a year-end geographic/civic reflection. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Accurate learning example, evidence, reflection on improvement, and a next question.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).
