Grade 4 · Module 1 Comprehensive gap assessment

Scheduled: 2026-11-06 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Student: _____ Date completed: _____

Math: 4.NBT.1-4 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: L.4.1; science/engineering practices | Social Studies: MS CCRS SS 4.MS.1 (Mississippi regions/geography) | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Writing and conventions · required gap check - 12 points

Score: _____ / 12

A Library Garden

Maya wanted a quiet place to read outside. She asked the librarian if the empty corner of the courtyard could become a garden. First, Maya measured the space. Next, she drew a plan with a path and two benches. Her friends brought seed packets, and an adult helped them plant. A week later, Maya noticed that the plants beside the wall were dry. She moved the watering can closer to them and made a watering chart. By spring, visitors were reading beside green leaves. Maya learned that a good plan needs careful observation as well as enthusiasm.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Science - 28 points

Score: _____ / 28

W1 data: A fictional class compares pulse counts at rest and after activity. Trial A: 71 pulse counts in one minute; Trial B: 101 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares pulse counts at rest and after activity. Trial A: 72 pulse counts in one minute; Trial B: 102 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares pulse counts at rest and after activity. Trial A: 73 pulse counts in one minute; Trial B: 103 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares pulse counts at rest and after activity. Trial A: 74 pulse counts in one minute; Trial B: 104 pulse counts in one minute. These are invented assessment data, not a claim about a real investigation.

1. How is a system different from one part? (1 point)

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

3. Draw a simple system with at least three interacting parts. (3 points)

4. Why is the body a system rather than unrelated organs? (1 point)

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

6. Model an interaction between two body systems. (3 points)

7. What is the main role of the respiratory system? (1 point)

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

9. Draw how digestion and breathing support the body. (3 points)

10. What is one function of the skeleton? (1 point)

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

12. Model how bones, muscles, and circulation help a person move. (3 points)

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Social Studies - 24 points

Score: _____ / 24

W1 background: An area grouped by shared physical or human characteristics. Landforms, soils, waterways, and related characteristics vary across the state. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Landforms, water bodies, elevation, or other natural features. Explains the meanings of symbols/colors. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Comparison reveals similarities and differences using common criteria. They can provide water, transport, fertile land, or risk from flooding. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Something from the natural environment people use. They affect possible industries, jobs, production, and trade. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What is a geographic region? (1 point)

2. Why does Mississippi include different physical regions? (1 point)

3. Make a simple region-comparison organizer. (3 points)

4. What does a physical map emphasize? (1 point)

5. What does a map key do? (1 point)

6. Sketch a physical map with a key and direction marker. (3 points)

7. Why compare two regions rather than describe only one? (1 point)

8. How can rivers affect where people live or work? (1 point)

9. Compare a river plain and a hilly region. (3 points)

10. What is a natural resource? (1 point)

11. How can resources influence an economy? (1 point)

12. Show a resource-to-product-to-job chain. (3 points)

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)
