Grade 4 · Module 3 Comprehensive gap assessment

Scheduled: 2027-01-22 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Student: _____ Date completed: _____

Math: 4.NBT.6; 4.OA.4-5 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: P.4.6A-B | Social Studies: MS CCRS SS Grade 4 - Mississippi Studies & Regions | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Writing and conventions · required gap check - 12 points

Score: _____ / 12

The Sparrow and the Lantern

This is an original fable. A sparrow bragged that she could light the whole forest with one lantern. An owl asked her to test the lantern before promising too much. The sparrow refused. At dusk she lifted the lantern, but its light reached only the nearest branch. Embarrassed, she almost flew away. Then she invited the fireflies to help. Together they marked a safe path to the clearing. The sparrow thanked each helper and promised to listen before boasting again. The owl did not laugh at her mistake; he praised the useful path.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Science - 28 points

Score: _____ / 28

W1 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 21 temperature in degrees C; Trial B: 29 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 22 temperature in degrees C; Trial B: 30 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 23 temperature in degrees C; Trial B: 31 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 24 temperature in degrees C; Trial B: 32 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. In which direction does heat transfer naturally between objects? (1 point)

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

3. Draw heat transfer from a warm object to a cooler one. (3 points)

4. What is a light source? (1 point)

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

6. Model how light allows a person to see a book. (3 points)

7. What is refraction? (1 point)

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

9. Draw reflection and refraction as different paths. (3 points)

10. What belongs in a claim-evidence explanation? (1 point)

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

12. Design a comparison of two reflective surfaces. (3 points)

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Social Studies - 24 points

Score: _____ / 24

W1 background: No; Indigenous communities, including the Mississippi Band of Choctaw Indians, continue today. They provide community knowledge and perspectives rather than outside assumptions only. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Water, land, resources, transport, and hazards affect choices. No; technology, history, culture, and other factors also matter. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Communities have different histories, experiences, beliefs, and practices. Its meaning and use can vary among people and over time. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Evidence used to learn about the past, such as documents, objects, maps, or accounts. Each source can offer limited or different evidence. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Are Indigenous peoples of Mississippi only part of the past? (1 point)

2. Why use a tribe's own materials when learning about its culture? (1 point)

3. Plan a respectful study of an Indigenous community. (3 points)

4. How can geography influence settlement? (1 point)

5. Does geography completely determine people's choices? (1 point)

6. Model two factors affecting settlement. (3 points)

7. Why can traditions differ among communities in one region? (1 point)

8. Why should a tradition be described with context? (1 point)

9. Compare two traditions without ranking one culture as better. (3 points)

10. What is a historical source? (1 point)

11. Why compare sources for a regional-history project? (1 point)

12. Create a short regional-history project plan. (3 points)

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)
