Grade 4 · Module 5 Week 1 Friday gap quiz

Scheduled: 2027-02-26 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Student: _____ Date completed: _____

Math: 4.NF.3-4 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: P.4.6A-C; engineering design | Social Studies: MS CCRS SS Grade 4 - regions/geography/economics | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Writing and conventions · required gap check - 8 points

Score: _____ / 8

Keeping Water Cool

Two students investigated how to keep a cup of water cool. They used identical cups, the same amount of water, and the same starting temperature. One cup was wrapped in cloth; the other was left uncovered. After twenty minutes in the same room, they measured both temperatures. They wrote the results in a table. They did not call one measurement proof that cloth is always the best material. Instead, they proposed trying another material and repeating the test. Their report explained the question, method, observations, and limits of their conclusion. A clear report lets another reader understand what was tested and what still needs investigation.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Science - 10 points

Score: _____ / 10

W1 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 21 temperature in degrees C; Trial B: 29 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. Name three forms of energy. (1 point)

2. What does energy transfer mean? (1 point)

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

4. Use W1 data. State one observation without claiming its cause. (1 point)

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

6. Show an energy transfer in a familiar situation. (3 points)
