Grade 4 · Module 6 Week 1 Friday gap quiz - TEACHER ANSWER KEY

Scheduled: 2027-04-02 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 4.NF.5-7; 4.MD.2 | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: E.4.9A-B | Social Studies: MS CCRS SS Grade 4 - regions/geography/economics | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Writing and conventions · required gap check - 8 points

Score: _____ / 8

A Case for Shade

Our reading area should have a shaded bench. At noon, the sunny bench can be uncomfortable. A shaded seat would give readers another choice. We can first move a portable shade nearby and record how many students use the area. Then we can ask whether the change helped. Some people worry that a permanent structure would cost too much. That is a fair concern, so a temporary test is a sensible first step. The goal is not to promise that every reader will love the bench. The goal is to use evidence to decide whether a small improvement is worthwhile.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

Science - 10 points

Score: _____ / 10

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. What drives much of the water cycle? (1 point)

Answer / scoring: Solar energy helps evaporate water; gravity moves precipitation and runoff.

2. How are evaporation and condensation different? (1 point)

Answer / scoring: Liquid becomes gas in evaporation; gas becomes liquid in condensation.

3. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W1 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 19 versus 11 in A; accept an accurate description without an unsupported causal claim.

5. Use W1 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Draw a water-cycle model. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Include evaporation, condensation, precipitation, and collection/runoff with correct arrows.
