Grade 4 · Module 9 Comprehensive gap assessment

Scheduled: 2027-07-16 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Student: _____ Date completed: _____

Math: Cumulative Grade 4 math standards | ELA: RL.4.1-10; RI.4.1-10; W.4.1-9; L.4.1-6; SL.4.1-6 (grade-level coverage; module skill targets below) | Science: Cumulative L.4.1-2; P.4.6; E.4.9-10 | Social Studies: Cumulative MS CCRS SS Grade 4 | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Writing and conventions · required gap check - 12 points

Score: _____ / 12

The Final Project

Tara's class planned a display about their community. Tara chose a question: How can we help visitors understand the river? She gathered a map, a short library article, and notes from a visit. She labeled each source so she could find it again. Her first poster had many facts but no clear order. After reading it aloud, Tara grouped the information into three sections: location, uses, and ways to care for the river. She checked a number against the original article instead of trusting her memory. At the display, she explained both what she had learned and one question she still wanted to investigate.

1. Using the supplied passage, write one organized paragraph explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Science - 28 points

Score: _____ / 28

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 12 milliliters of water collected; Trial B: 20 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Why identify a system's boundary? (1 point)

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

3. Plan a systems/energy capstone investigation. (3 points)

4. Why collect several observations? (1 point)

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

6. Improve a model after receiving new evidence. (3 points)

7. Why report limitations? (1 point)

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

9. Write a claim-evidence-reasoning outline. (3 points)

10. How can a science showcase communicate uncertainty? (1 point)

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

12. Plan a short science presentation. (3 points)

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Social Studies - 24 points

Score: _____ / 24

W1 background: It identifies the problem, affected people, evidence, and options. The goal gives a basis for choosing actions and judging success. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Labels clarify place, measure, units, and purpose. Memory or copying may introduce errors. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: A clear question/claim, relevant evidence, geographic relationships, and sources. Feedback can reveal unclear reasoning or inaccurate information. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Explain learning, changes in thinking, limits, and next questions. It shows how evidence, revision, and skills developed. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How can research support a civic-action project? (1 point)

2. Why define a project's goal before acting? (1 point)

3. Plan a Mississippi/community civic-action project. (3 points)

4. Why label a map or data chart? (1 point)

5. Why compare original information when a number seems doubtful? (1 point)

6. Plan a map/data research check. (3 points)

7. What should a final regional product communicate? (1 point)

8. Why revise after feedback? (1 point)

9. Outline a final product with a revision step. (3 points)

10. What can reflection add to a year-end presentation? (1 point)

11. Why can growth matter alongside a final score? (1 point)

12. Plan a year-end geographic/civic reflection. (3 points)

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)
