Grade 7 · Module 1 Comprehensive gap assessment

Scheduled: 2026-11-06 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Student: _____ Date completed: _____

Math: 7.RP.1-2 | ELA: RL.7.1-10; RI.7.1-10; W.7.1-9; L.7.1-6; SL.7.1-6 (grade-level coverage; module skill targets below) | Science: L.7.3 | Social Studies: MS CCRS SS Grade 7 Early World History - prehistory/Mesopotamia | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Writing and conventions · required gap check - 12 points

Score: _____ / 12

A Pond Study

A class studied a small pond near its school. Students recorded water temperature, counted visible organisms from the bank, and drew a model of a food web. Because the first visit happened after rain, they wondered whether that single visit represented typical conditions. They returned at the same time of day during three later weeks. Their records were not identical. One student wanted to erase the unusual measurements, but her partner argued that differences could be useful evidence. The group kept the records and described the limits of its method: it had observed only one pond and had not counted organisms beneath the water. Their report distinguished observations from explanations. "We saw fewer insects" was an observation; "the cooler temperature caused the change" was a hypothesis that needed further testing. The study taught the class that careful questions are as important as confident conclusions.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Science - 28 points

Score: _____ / 28

W1 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 9 distinct species observed; Trial B: 15 distinct species observed. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 10 distinct species observed; Trial B: 16 distinct species observed. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 11 distinct species observed; Trial B: 17 distinct species observed. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional survey uses the same area and observation time in two habitats. Trial A: 12 distinct species observed; Trial B: 18 distinct species observed. These are invented assessment data, not a claim about a real investigation.

1. Why is the water cycle a cycle rather than a one-way path? (1 point)

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

3. Model water and carbon movement in an ecosystem. (3 points)

4. How do photosynthesis and respiration relate to oxygen? (1 point)

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

6. Model a nitrogen or oxygen cycle. (3 points)

7. What does cellular respiration do? (1 point)

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

9. Compare photosynthesis with aerobic cellular respiration. (3 points)

10. What is an ecosystem service? (1 point)

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

12. Model a food web and a possible effect of losing one species. (3 points)

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Social Studies - 24 points

Score: _____ / 24

W1 background: The period before written records for a society; it does not mean people lacked history. Resources, climate, population, opportunities, and other pressures could influence movement. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: It supported more permanent settlements and changed work, resources, and social organization. No; crops, environments, timing, and choices varied. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: They supported water access, irrigation, transport, and fertile lands while posing flood risks. Specialized work, institutions, networks, writing in some societies, or organized infrastructure. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: A writing system using wedge-shaped marks, associated with ancient Mesopotamia. They show rules/ideals and authority, but not necessarily how every case was handled. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What does prehistory mean? (1 point)

2. Why might early humans migrate? (1 point)

3. Model an early migration question. (3 points)

4. How did agriculture change some human communities? (1 point)

5. Was adopting agriculture an identical process everywhere? (1 point)

6. Compare foraging and early farming. (3 points)

7. Why were the Tigris and Euphrates important in Mesopotamia? (1 point)

8. What is one feature of an early city/civilization? (1 point)

9. Model river, agriculture, and city development. (3 points)

10. What is cuneiform? (1 point)

11. Why are written laws useful historical evidence? (1 point)

12. Compare a law text with evidence of everyday life. (3 points)

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)
