Grade 7 · Module 3 Comprehensive gap assessment - TEACHER ANSWER KEY

Scheduled: 2027-01-22 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 7.NS.1 | ELA: RL.7.1-10; RI.7.1-10; W.7.1-9; L.7.1-6; SL.7.1-6 (grade-level coverage; module skill targets below) | Science: P.7.5A-B | Social Studies: 7.4 Ancient Greece | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Writing and conventions · required gap check - 12 points

Score: _____ / 12

Arachne: an Original Retelling

This original retelling draws on the traditional myth. Arachne was a talented weaver who took great pride in her work. When people praised her skill, she insisted that no teacher or goddess deserved any credit. Athena, associated with wisdom and crafts, approached in disguise and advised her to speak with humility. Arachne dismissed the advice and demanded a contest. The two wove remarkable pictures, but their conflict involved more than technical skill: Arachne's attitude challenged the goddess's authority. In the traditional ending, Athena transformed Arachne into a spider, forever connected with weaving. Readers can admire Arachne's ability while questioning her boastfulness and the severity of the punishment. The story invites discussion of pride, power, artistic skill, and the consequences of refusing advice. A theme is a reasoned interpretation, not simply the name of a topic.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Answer / scoring: 4-point rubric: two appropriate module skills identified (2), two accurate applications explained (2). Check against the module's listed learning goals.

Science - 28 points

Score: _____ / 28

W1 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 21 temperature in degrees C; Trial B: 29 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 22 temperature in degrees C; Trial B: 30 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 23 temperature in degrees C; Trial B: 31 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional comparison records temperature before and after a controlled warming step. Trial A: 24 temperature in degrees C; Trial B: 32 temperature in degrees C. These are invented assessment data, not a claim about a real investigation.

1. Is melting usually a physical or chemical change? (1 point)

Answer / scoring: Physical; the substance's identity remains the same.

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

3. Draw particle models for solid, liquid, and gas. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Correct relative spacing/movement and the same particle identity for phase changes.

4. Why can equal-volume objects have different masses? (1 point)

Answer / scoring: They can have different densities/material compositions.

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

6. Model a fair comparison of density or solubility. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). State measured quantities, consistent comparison conditions, and a defensible conclusion.

7. How does chemical change differ from changing state? (1 point)

Answer / scoring: Chemical change changes substance identity; a phase change usually does not.

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

9. Model particles before and after a reaction. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Atoms are rearranged into new groupings; atom counts are conserved in a closed system.

10. Why can observing bubbles alone be insufficient proof of chemical change? (1 point)

Answer / scoring: Bubbles may come from a physical process such as boiling; context/additional evidence is needed.

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 temperature in degrees C.

12. Design a comparison of physical and chemical changes. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Two appropriate examples, identity criterion, evidence, and limitations.

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Answer / scoring: Rubric (4): accurate limited claim (1); two correct data values (1); logical connection to claim (1); relevant limitation/next test (1). Accept varied claims bounded by the supplied data.

Social Studies - 24 points

Score: _____ / 24

W1 background: A city-state/community with its own political organization. Mountains could separate communities; seas supported travel/trade. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Belief in multiple gods. They can reveal beliefs, values, conflicts, and storytelling traditions. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: Political rights were restricted; women, enslaved people, and many noncitizens were excluded. Rule by a small group. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: They helped connect regions and spread/intermix Greek and other traditions. Reasoned inquiry into knowledge, values, existence, or related questions. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. What was a polis in ancient Greece? (1 point)

Answer / scoring: A city-state/community with its own political organization.

2. How could Greek mountains and seas influence connections? (1 point)

Answer / scoring: Mountains could separate communities; seas supported travel/trade.

3. Model Greek geography and city-state connections. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Location/barriers/routes and plausible effects without geographic determinism.

4. What does polytheism mean? (1 point)

Answer / scoring: Belief in multiple gods.

5. Why study myths as cultural evidence rather than scientific accounts? (1 point)

Answer / scoring: They can reveal beliefs, values, conflicts, and storytelling traditions.

6. Analyze a myth's cultural role. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Identify belief/value, text evidence, interpretation, and limits of generalizing from one story.

7. How did Athenian democracy limit participation? (1 point)

Answer / scoring: Political rights were restricted; women, enslaved people, and many noncitizens were excluded.

8. What is an oligarchy? (1 point)

Answer / scoring: Rule by a small group.

9. Compare Athens and Sparta using political/social criteria. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Accurate distinctions, restricted participation acknowledged, and a common comparison framework.

10. How did Alexander's conquests contribute to cultural exchange? (1 point)

Answer / scoring: They helped connect regions and spread/intermix Greek and other traditions.

11. What does philosophy involve? (1 point)

Answer / scoring: Reasoned inquiry into knowledge, values, existence, or related questions.

12. Explain a Hellenistic cultural connection. (3 points)

Answer / scoring: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Two connected regions/traditions, mechanism of exchange, and evidence; avoid claiming culture moved only one way.

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)

Answer / scoring: Rubric (4): identifies chosen note/claim (1); relevant additional source/perspective (1); explains new insight/check (1); recognizes limits rather than treating one source as complete truth (1).
