Arachne: an Original Retelling

This original retelling draws on the traditional myth. Arachne was a talented weaver who took great pride in her work. When people praised her skill, she insisted that no teacher or goddess deserved any credit. Athena, associated with wisdom and crafts, approached in disguise and advised her to speak with humility. Arachne dismissed the advice and demanded a contest. The two wove remarkable pictures, but their conflict involved more than technical skill: Arachne's attitude challenged the goddess's authority. In the traditional ending, Athena transformed Arachne into a spider, forever connected with weaving. Readers can admire Arachne's ability while questioning her boastfulness and the severity of the punishment. The story invites discussion of pride, power, artistic skill, and the consequences of refusing advice. A theme is a reasoned interpretation, not simply the name of a topic.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

1. Is melting usually a physical or chemical change? (1 point)

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

3. Draw particle models for solid, liquid, and gas. (3 points)

4. Why can equal-volume objects have different masses? (1 point)

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

6. Model a fair comparison of density or solubility. (3 points)

7. How does chemical change differ from changing state? (1 point)

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

9. Model particles before and after a reaction. (3 points)

10. Why can observing bubbles alone be insufficient proof of chemical change? (1 point)

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

12. Design a comparison of physical and chemical changes. (3 points)

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)
