Two Sources for a Forecast

Fictional classroom sources: Source A, "Weather Log," by a student team, dated March 8, records local temperature, wind direction, and pressure at noon for five days. Source B, an unsigned advertisement dated March 8, says that one device "always predicts weather perfectly" but gives no measurements. A research group prefers Source A for describing what was actually observed. It still checks the team's instruments and method, because named authors and a date do not guarantee accuracy. The group writes a cautious forecast, separating data from inference. Its notes include each source's title, creator, date, and the particular information used. In its final explanation, it paraphrases the data instead of copying a paragraph and identifies its source. Readers can judge the explanation more easily because the evidence and its limits are visible.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Social Studies - 10 points

Score: _____ / 10

W2 background: The Arabian Peninsula in the seventh century CE. Movement of people, texts, institutions, and contacts can carry ideas; mechanisms vary. This is an assessment background note written for this packet, not an actual historical primary-source quotation.
