Grade 7 · Module 6 Comprehensive gap assessment

Scheduled: 2027-04-23 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Student: _____ Date completed: _____

Math: 7.EE.1-4 | ELA: RL.7.1-10; RI.7.1-10; W.7.1-9; L.7.1-6; SL.7.1-6 (grade-level coverage; module skill targets below) | Science: E.7.9A.4-7 | Social Studies: MS CCRS SS Grade 7 - Africa/Asia/trade networks | Spanish: MS World Languages Framework 2016 - Novice communication

Student paper contains no answers. Complete all sections. Show math work. Use only the supplied passages/background notes and teacher-approved tools. Spanish cue support is allowed. A module test may be divided into 2-3 sittings.

Writing and conventions · required gap check - 12 points

Score: _____ / 12

An Argument for Trees

A community group argues that a school should plant trees near its outdoor learning area. Its claim is narrower than "trees solve every problem": a carefully chosen location may provide shade and support habitat. The group presents a fictional class data table comparing temperatures at a sunny spot and a shaded spot. It also acknowledges counterarguments: planting and watering cost money, and roots or branches may interfere with structures. Its proposal recommends consulting knowledgeable staff, selecting a suitable location, and comparing costs before planting. An effective response to a counterargument does not mock the people who raise it. Instead, it explains how the plan addresses a reasonable concern or why the evidence supports a different choice. The final paragraph asks the school to try a manageable plan and report the results.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

3. Connect your writing to this module's Khan reading/grammar goals. Name two skills, show an example of each in your own writing, and explain your choices. (4 points)

Science - 28 points

Score: _____ / 28

W1 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 11 milliliters of water collected; Trial B: 19 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W2 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 12 milliliters of water collected; Trial B: 20 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

W4 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 14 milliliters of water collected; Trial B: 22 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. How can elevation and large water bodies affect climate? (1 point)

2. Use W1 data. Which trial has the higher recorded value, and by how much? (2 points)

3. Model three climate controls for two hypothetical places. (3 points)

4. How can currents redistribute thermal energy? (1 point)

5. Use W2 data. Which trial has the higher recorded value, and by how much? (2 points)

6. Model an ocean-atmosphere energy pathway. (3 points)

7. Why is solar heating important to atmospheric motion? (1 point)

8. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

9. Draw a convection model. (3 points)

10. How do hazard and risk differ? (1 point)

11. Use W4 data. Which trial has the higher recorded value, and by how much? (2 points)

12. Evaluate a storm explanation using data and limits. (3 points)

13. Choose one of the supplied data comparisons. Write a claim supported by those data, give the two values as evidence, and explain what further information would be needed for a causal explanation. (4 points)

Social Studies - 24 points

Score: _____ / 24

W1 background: Control and taxation of important trade networks supported wealth and political power. They were valuable goods demanded in different regions. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W2 background: Water, distances, routes, and transport needs shaped journeys. Travelers needed routes, supplies, skills, and relationships. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W3 background: It includes diverse societies and changing institutions. Trade, movement, diplomacy, religion, and conflict linked regions. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

W4 background: Spread and adaptation of ideas/practices through contact. People adapt it to their language, beliefs, needs, and institutions. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. How did trade contribute to West African kingdoms such as Ghana and Mali? (1 point)

2. Why were gold and salt important in trans-Saharan trade? (1 point)

3. Model a West African trade network. (3 points)

4. How did desert geography influence trans-Saharan trade? (1 point)

5. Why were knowledge and cooperation important to long-distance travel? (1 point)

6. Plan a historical trade-route explanation. (3 points)

7. Why should medieval/imperial Asia be studied through specific times and places? (1 point)

8. How could land/sea routes connect Asian communities? (1 point)

9. Compare two Asian communities using a defined framework. (3 points)

10. What is cultural diffusion? (1 point)

11. Why can an adopted practice change in a new setting? (1 point)

12. Trace an example of cultural diffusion. (3 points)

13. Choose one background note. Describe an additional perspective or source that could improve it, and explain what it might reveal or challenge. (4 points)
