Grade 7 · Module 7 Week 3 Friday gap quiz - TEACHER ANSWER KEY

Scheduled: 2027-05-14 | Required writing, hands-on/science, social studies, and Spanish gap work. Complete the separately listed Khan assessments for primary-course coverage.

Math: 7.SP.1-8 | ELA: RL.7.1-10; RI.7.1-10; W.7.1-9; L.7.1-6; SL.7.1-6 (grade-level coverage; module skill targets below) | Science: E.7.9 + integrated practices | Social Studies: MS CCRS SS Grade 7 - Medieval Europe | Spanish: MS World Languages Framework 2016 - Novice communication

Award points by item. Accept equivalent correct mathematical forms and supported written interpretations. For open responses, use the stated rubric; do not require identical wording. Score each subject separately, then apply your grading policy.

Writing and conventions · required gap check - 8 points

Score: _____ / 8

After the Storm

Original poem:
The street unrolls its silver thread,
The restless clouds move overhead.
A window holds the fading light;
A branch writes slowly into night.
I count the drops that leave the leaves,
And hear the roof repeat its eaves.
The storm has gone; its quiet trace
Still draws a map across this place.

Prose companion: Rainwater remains on leaves and the street after a storm. Clouds move away as evening approaches. A person observes these remaining signs of the weather. The prose summarizes observable conditions; the poem uses images to create a reflective mood.

1. Using the supplied passage, write two organized paragraphs explaining its central message. Include two accurate details and explain how they support your response. (5 points)

Answer / scoring: 5-point rubric: accurate central message (1), two relevant text details (2), logical explanation/organization (1), clear sentences/conventions (1). Accept supported interpretations.

2. Revise two sentences from your response. Explain one change that improves grammar, word choice, or clarity. (3 points)

Answer / scoring: 3-point rubric: two effective revisions (2); accurate explanation of one improvement (1).

Science - 10 points

Score: _____ / 10

W3 data: A fictional class compares water collection in two labeled trials using the same time interval. Trial A: 13 milliliters of water collected; Trial B: 21 milliliters of water collected. These are invented assessment data, not a claim about a real investigation.

1. Why trace pathways when evaluating human impacts? (1 point)

Answer / scoring: Effects can move through connected systems rather than stay local.

2. Why compare alternative explanations for a change? (1 point)

Answer / scoring: Other factors may account for observed differences.

3. Use W3 data. Which trial has the higher recorded value, and by how much? (2 points)

Answer / scoring: Trial B; 8 milliliters of water collected.

4. Use W3 data. State one observation without claiming its cause. (1 point)

Answer / scoring: Trial B recorded 21 versus 13 in A; accept an accurate description without an unsupported causal claim.

5. Use W3 data. Does this two-value table alone prove which factor caused the difference? Explain. (2 points)

Answer / scoring: No. Need a clear tested variable, controls, repeated trials, and consideration of other causes. One point for no; one for a relevant reason.

6. Model one human impact and an alternative explanation. (3 points)

Answer / scoring: Rubric (3): scientifically accurate parts/ideas (1); correct relationships/reasoning (1); clear labels/evidence or method (1). Clear pathway, evidence needed, and a plausible confounding influence.
