Grade 4 — Weekly review — Module 3 Week 1

Date: 2026-12-18

Eight-subject review of taught work; practical evidence may replace a written response. Friday remains flexible.

Math — Division strategies

1. Divide 139 by 3. Give a quotient and remainder. (1 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

ELA — Read a longer passage

1. Write a short response to today’s Khan reading or grammar lesson. Include a specific example. (3 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Physical Sciences — Heat/thermal energy sources

1. What is thermal energy related to? (1 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Social Studies — Indigenous peoples of Mississippi

W1 background: No; Indigenous communities, including the Mississippi Band of Choctaw Indians, continue today. They provide community knowledge and perspectives rather than outside assumptions

only. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Plan a respectful study of an Indigenous community. (3 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Art — Beat and rhythm

Read before you begin

Beat is a regular pulse; rhythm organizes durations around it. Rhythm can change while beat remains steady. Use clapping or gentle tapping.

1. Are beat and rhythm identical? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Life Sciences — Groups and social roles

Read before you begin

Sociology studies social relationships, groups, and institutions. A role involves expected actions in a setting. One person may be a learner, sibling, friend, and teammate.

1. Can someone have several roles? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Computer Science — Algorithms and precision

Read before you begin

An algorithm is an ordered procedure for a task. Instructions must make order and choices clear. Testing with another person reveals missing or ambiguous steps.

1. Why test an algorithm? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Life Skills — Seeds and plant needs

Read before you begin

Garden plants need suitable water, light, temperature, nutrients, and space. Germination and later growth differ. Follow local planting guidance and avoid unknown plants and chemicals.

1. Why label planting conditions? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)
