Grade 4 — Weekly review — Module 3 Week 3 — TEACHER KEY

Date: 2027-01-15

Eight-subject review of taught work; practical evidence may replace a written response. Friday remains flexible.

Math — Factors and multiples

1. List all factor pairs of 22. (1 points)

Expected answer / rubric: 1 and 22; 2 and 11

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

ELA — Explain a supported inference

1. Write a short response to today’s Khan reading or grammar lesson. Include a specific example. (3 points)

Expected answer / rubric: Relevant response and an accurate example of the day’s skill.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Physical Sciences — Reflection/refraction/absorption

1. What is reflection? (1 points)

Expected answer / rubric: Light bouncing from a surface.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Social Studies — Cultural regions and traditions

W3 background: Communities have different histories, experiences, beliefs, and practices. Its meaning and use can vary among people and over time. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Compare two traditions without ranking one culture as better. (3 points)

Expected answer / rubric: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Use respectful descriptive criteria, sources, and similarities/differences.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Art — Dynamics and timbre

Read before you begin

Dynamics concern relative loudness; timbre is sound quality. Changing either can alter an interpretation. Protect hearing and avoid unnecessarily loud sound.

1. How do timbre and dynamics differ? (2 points)

Expected answer / rubric: Timbre is sound quality; dynamics concern loudness.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Life Sciences — Institutions and cooperation

Read before you begin

Institutions organize recurring social needs, such as education, government, and health care. Rules and shared responsibilities support cooperation, but institutions can also be questioned and improved.

1. What is an institution? (2 points)

Expected answer / rubric: An organized social structure serving recurring needs or functions.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Computer Science — Binary information

Read before you begin

A bit has two possible values, commonly written 0 and 1. Binary places represent powers of two. Patterns of bits can encode information.

1. What values can a bit have? (2 points)

Expected answer / rubric: Two values, conventionally 0 and 1.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Life Skills — Garden measurement and records

Read before you begin

Records connect measurements with dates and conditions. Use a consistent reference point and units. A measurement-method change can look like a growth change.

1. Why use a consistent method? (2 points)

Expected answer / rubric: To make comparisons meaningful.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.
