Grade 4 — Weekly review — Module 3 Week 3

Date: 2027-01-15

Eight-subject review of taught work; practical evidence may replace a written response. Friday remains flexible.

Math — Factors and multiples

1. List all factor pairs of 22. (1 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

ELA — Explain a supported inference

1. Write a short response to today’s Khan reading or grammar lesson. Include a specific example. (3 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Physical Sciences — Reflection/refraction/absorption

1. What is reflection? (1 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Social Studies — Cultural regions and traditions

W3 background: Communities have different histories, experiences, beliefs, and practices. Its meaning and use can vary among people and over time. This is an assessment background note written for this

packet, not an actual historical primary-source quotation.

1. Compare two traditions without ranking one culture as better. (3 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Art — Dynamics and timbre

Read before you begin

Dynamics concern relative loudness; timbre is sound quality. Changing either can alter an interpretation. Protect hearing and avoid unnecessarily loud sound.

1. How do timbre and dynamics differ? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Life Sciences — Institutions and cooperation

Read before you begin

Institutions organize recurring social needs, such as education, government, and health care. Rules and shared responsibilities support cooperation, but institutions can also be questioned and improved.

1. What is an institution? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Computer Science — Binary information

Read before you begin

A bit has two possible values, commonly written 0 and 1. Binary places represent powers of two. Patterns of bits can encode information.

1. What values can a bit have? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Life Skills — Garden measurement and records

Read before you begin

Records connect measurements with dates and conditions. Use a consistent reference point and units. A measurement-method change can look like a growth change.

1. Why use a consistent method? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)
