Grade 4 — Module assessment — Module 4 Week 4 — TEACHER KEY

Date: 2027-02-19

Eight-subject review of taught work; practical evidence may replace a written response. Friday remains flexible.

Math — Explain equivalence and ordering

1. A whole is divided into 8 equal parts. One part is what fraction? (1 points)

Expected answer / rubric: 1/8

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

ELA — Compare craft and structure

1. Write a short response to today’s Khan reading or grammar lesson. Include a specific example. (3 points)

Expected answer / rubric: Relevant response and an accurate example of the day’s skill.

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Physical Sciences — Engineering design: sound/electric device

1. Why test a device more than once? (1 points)

Expected answer / rubric: Repeated trials help reveal inconsistent results and guide improvements.

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Social Studies — Compare communities / civic mini-project

W4 background: Different resources and needs can produce different solutions. Decisions have benefits, costs, and potentially unequal effects. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Compare two civic solutions. (3 points)

Expected answer / rubric: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Common problem, benefits/costs, who is affected, and an evidence-based choice.

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Art — Compose and perform

Read before you begin

Composition selects sounds and structure; performance interprets those choices. Explain how a musical choice contributes to an intended effect.

1. What supports an interpretation? (2 points)

Expected answer / rubric: Specific musical choices and the effects they create.

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Life Sciences — Bias and fair comparison

Read before you begin

Bias can affect what people notice, remember, and believe. Comparing sources and considering alternative explanations can reduce errors. Everyone can be affected by bias.

1. Does identifying bias prove that a claim is false? (2 points)

Expected answer / rubric: No; the evidence and reasoning still require examination.

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Computer Science — Conditions and decisions

Read before you begin

A condition is evaluated as true or false. If-then rules decide when actions happen. Test cases that satisfy and do not satisfy the condition.

1. Why test both outcomes? (2 points)

Expected answer / rubric: To check behavior when the condition is true and false.

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Life Skills — Cooking and evaluation

Read before you begin

Preparation, observation, and review make procedures more reliable. Compare a recipe's result with its goal and record changes. Adults supervise heat and cutting.

1. Why record recipe changes? (2 points)

Expected answer / rubric: To understand results and make the process repeatable.

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.
