Grade 4 — Module assessment — Module 4 Week 4

Date: 2027-02-19

Eight-subject review of taught work; practical evidence may replace a written response. Friday remains flexible.

Math — Explain equivalence and ordering

1. A whole is divided into 8 equal parts. One part is what fraction? (1 points)

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

ELA — Compare craft and structure

1. Write a short response to today’s Khan reading or grammar lesson. Include a specific example. (3 points)

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Physical Sciences — Engineering design: sound/electric device

1. Why test a device more than once? (1 points)

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Social Studies — Compare communities / civic mini-project

W4 background: Different resources and needs can produce different solutions. Decisions have benefits, costs, and potentially unequal effects. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Compare two civic solutions. (3 points)

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Art — Compose and perform

Read before you begin

Composition selects sounds and structure; performance interprets those choices. Explain how a musical choice contributes to an intended effect.

1. What supports an interpretation? (2 points)

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Life Sciences — Bias and fair comparison

Read before you begin

Bias can affect what people notice, remember, and believe. Comparing sources and considering alternative explanations can reduce errors. Everyone can be affected by bias.

1. Does identifying bias prove that a claim is false? (2 points)

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Computer Science — Conditions and decisions

Read before you begin

A condition is evaluated as true or false. If-then rules decide when actions happen. Test cases that satisfy and do not satisfy the condition.

1. Why test both outcomes? (2 points)

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Life Skills — Cooking and evaluation

Read before you begin

Preparation, observation, and review make procedures more reliable. Compare a recipe's result with its goal and record changes. Adults supervise heat and cutting.

1. Why record recipe changes? (2 points)

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)
