Grade 4 — Weekly review — Module 4 Week 2

Date: 2027-02-05

Eight-subject review of taught work; practical evidence may replace a written response. Friday remains flexible.

Math — Equivalent fractions

1. Complete: 1/2 = ___/8. (1 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

ELA — Analyze text structure

1. Write a short response to today’s Khan reading or grammar lesson. Include a specific example. (3 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Physical Sciences — Electricity, conductors & insulators

1. What is a conductor? (1 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Social Studies — Civic roles & responsibilities

W2 background: An action supporting community/public life, such as following laws or participating responsibly. Learn about issues, discuss respectfully, help a community project, or communicate ideas.

This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Plan a civic action suitable for a student. (3 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Art — Harmony and accompaniment

Read before you begin

Accompaniment supports a main line; harmony concerns relationships among pitches heard or implied together. A supporting pattern need not duplicate the melody.

1. Must accompaniment copy the melody? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Life Sciences — Evidence and uncertainty

Read before you begin

Evidence supports claims with varying strength. A reasonable conclusion may need revision when better evidence appears. Saying that something is uncertain can be more accurate than claiming certainty.

1. Why might a reasonable conclusion change? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Computer Science — Events and interaction

Read before you begin

An event triggers instructions, such as a click or key press. Programs may have several event-driven scripts. State which event starts each action.

1. What is an event in a program? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Life Skills — Recipe fractions and measuring

Read before you begin

Recipes specify quantities, units, and order. Use appropriate marked tools. Scaling changes ingredient amounts consistently, but cooking time needs separate judgment.

1. When doubling a recipe, what changes? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)
