Grade 4 — Weekly review — Module 4 Week 3

Date: 2027-02-12

Eight-subject review of taught work; practical evidence may replace a written response. Friday remains flexible.

Math — Compare fractions

1. Insert <, >, or =: 1/2 ___ 3/4. (1 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

ELA — Explain purpose and viewpoint

1. Write a short response to today’s Khan reading or grammar lesson. Include a specific example. (3 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Physical Sciences — Simple circuits & energy transformations

1. Why does a simple circuit need a closed path? (1 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Social Studies — Symbols, traditions & public institutions

W3 background: Shared history, identity, ideals, or institutions, interpreted in context. They serve public/community purposes and are organized for those roles. This is an assessment background note

written for this packet, not an actual historical primary-source quotation.

1. Explain one public institution’s purpose. (3 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Art — Music and cultural context

Read before you begin

Music serves purposes including celebration, worship, storytelling, and protest. Describe a named tradition with reliable context instead of treating a continent as one style.

1. Why identify a specific tradition? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Life Sciences — Arguments and counterexamples

Read before you begin

An argument connects reasons to a conclusion. A counterexample challenges a broad claim with a case it cannot explain. Respectful disagreement can improve reasoning.

1. What is a counterexample? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Computer Science — Loops and repetition

Read before you begin

A loop repeats instructions. Some loops count repetitions; others depend on a condition. Loops can express repetition clearly with less duplicate code.

1. Why use a loop? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Life Skills — Nutrition and meal planning

Read before you begin

Foods supply different nutrients. Meal planning should consider varied foods, individual needs, allergies, access, and cultural practices. Avoid judging health from body size.

1. Why check allergies? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)
