Grade 4 — Weekly review — Module 6 Week 3 — TEACHER KEY

Date: 2027-04-16

Eight-subject review of taught work; practical evidence may replace a written response. Friday remains flexible.

Math — Compare decimals

1. Insert <, >, or =: 0.7 ___ 0.67. (1 points)

Expected answer / rubric: >

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

ELA — Integrate text and visual information

1. Write a short response to today’s Khan reading or grammar lesson. Include a specific example. (3 points)

Expected answer / rubric: Relevant response and an accurate example of the day’s skill.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Physical Sciences — Build/use weather instruments

1. What does a rain gauge measure? (1 points)

Expected answer / rubric: Amount/depth of precipitation collected.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Social Studies — Compare Northeast/Midwest

W3 background: It supports a fair, clear geographic comparison. Water, food, transport, housing, work, or public services. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Construct a region-comparison chart. (3 points)

Expected answer / rubric: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). At least two common criteria, accurate similarities/differences, and a source note.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Art — Dance and sequences

Read before you begin

Dance organizes movement through space and time. Sequences repeat, reverse, or vary like patterns. Respect named traditions and use safe original adapted movement.

1. How can dance resemble an algorithm? (2 points)

Expected answer / rubric: Both may specify ordered actions and repetitions.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Life Sciences — Christianity

Read before you begin

Christianity developed from the life and teachings of Jesus in the first-century eastern Mediterranean. Christians use the Bible and belong to diverse churches and traditions with different interpretations and practices.

1. Is Christianity a uniform set of practices? (2 points)

Expected answer / rubric: No; traditions and individual practices are diverse.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Computer Science — Interfaces and accessibility

Read before you begin

Interfaces connect people and systems. Labels, readable contrast, alternative inputs, and clear feedback improve usability. Decoration should support comprehension.

1. Why label controls clearly? (2 points)

Expected answer / rubric: To reduce guessing and make interaction predictable.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Life Skills — Anatomy and reproduction

Read before you begin

Ovaries contain egg cells; testes produce sperm cells after puberty begins. A pregnancy can begin when a sperm fertilizes an egg, usually in a fallopian tube, and the resulting developing structure implants in the uterus. Puberty does not mean someone is ready to become a parent. Private body parts have correct anatomical names, and questions deserve accurate respectful answers. Grade 7 extension: sexually transmitted infections can spread through sexual contact, sometimes without symptoms. Avoiding sexual contact prevents sexual transmission; correctly used condoms reduce but do not eliminate infection risk. Other birth-control methods do not protect against STIs. A trusted adult or health professional can answer questions.

1. Which organ supports an implanted developing pregnancy, and which cells can combine in fertilization? (2 points)

Expected answer / rubric: The uterus supports an implanted pregnancy; a sperm cell and egg cell can combine in fertilization.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.
