Grade 4 — Weekly review — Module 7 Week 2 — TEACHER KEY

Date: 2027-05-07

Eight-subject review of taught work; practical evidence may replace a written response. Friday remains flexible.

Math — Angle concepts

1. Classify a 35-degree angle as acute, right, or obtuse. (1 points)

Expected answer / rubric: Acute

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

ELA — Compare explanations

1. Write a short response to today’s Khan reading or grammar lesson. Include a specific example. (3 points)

Expected answer / rubric: Relevant response and an accurate example of the day’s skill.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Physical Sciences — Solar-system models

Read before you begin

The Sun is a star at the center of our solar system. Planets orbit it. Models must state whether size, distance, or both are represented to scale.

1. Why label the scale of a model? (2 points)

Expected answer / rubric: A model can represent sizes and distances differently.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Social Studies — Landforms/resources

W2 background: Geology, water, soils, and landforms influence what resources are available. Supplies, environmental impacts, and competing needs matter. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Compare resource use in two landscapes. (3 points)

Expected answer / rubric: Rubric (3): accurate relevant content (1); supported comparison/relationship (1); clear organization and source/evidence awareness (1). Relevant landscape/resource connection, one constraint, and a source.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Art — Storyboards and narrative

Read before you begin

Storyboards arrange images to plan a narrative or explanation. Viewpoint and timing affect meaning. Captions clarify each panel's purpose.

1. What is a storyboard for? (2 points)

Expected answer / rubric: Planning a visual sequence before production.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Life Sciences — Buddhist traditions

Read before you begin

Buddhist traditions trace their beginnings to Siddhartha Gautama in ancient South Asia. Many teachings examine suffering, ethical conduct, and mental training. Communities differ in texts, institutions, and practices.

1. Are Buddhist communities identical everywhere? (2 points)

Expected answer / rubric: No; traditions and practices vary across places and history.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Computer Science — Graphs and misleading displays

Read before you begin

Graph scales, labels, and data selection affect interpretation. A numerically accurate graph may still mislead. Inspect units and axis ranges.

1. Why inspect an axis scale? (2 points)

Expected answer / rubric: It changes the apparent size of differences and trends.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.

Life Skills — Home hazards and preparedness

Read before you begin

Preparedness identifies safe routes, contacts, hazards, and supplies before an emergency. Plans should fit the home and local risks. Practice with an adult without creating a real hazard.

1. Why choose a meeting place beforehand? (2 points)

Expected answer / rubric: To help reunite people and notice who may need assistance.

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Expected answer / rubric: Award 1 point for relevant completed evidence and 1 for an accurate explanation of a revision or improvement. Do not assess personal beliefs, diagnoses, or disclosures.
