Grade 4 — Weekly review — Module 7 Week 2

Date: 2027-05-07

Eight-subject review of taught work; practical evidence may replace a written response. Friday remains flexible.

Math — Angle concepts

1. Classify a 35-degree angle as acute, right, or obtuse. (1 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

ELA — Compare explanations

1. Write a short response to today’s Khan reading or grammar lesson. Include a specific example. (3 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Physical Sciences — Solar-system models

Read before you begin

The Sun is a star at the center of our solar system. Planets orbit it. Models must state whether size, distance, or both are represented to scale.

1. Why label the scale of a model? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Social Studies — Landforms/resources

W2 background: Geology, water, soils, and landforms influence what resources are available. Supplies, environmental impacts, and competing needs matter. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Compare resource use in two landscapes. (3 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Art — Storyboards and narrative

Read before you begin

Storyboards arrange images to plan a narrative or explanation. Viewpoint and timing affect meaning. Captions clarify each panel's purpose.

1. What is a storyboard for? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Life Sciences — Buddhist traditions

Read before you begin

Buddhist traditions trace their beginnings to Siddhartha Gautama in ancient South Asia. Many teachings examine suffering, ethical conduct, and mental training. Communities differ in texts, institutions, and practices.

1. Are Buddhist communities identical everywhere? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Computer Science — Graphs and misleading displays

Read before you begin

Graph scales, labels, and data selection affect interpretation. A numerically accurate graph may still mislead. Inspect units and axis ranges.

1. Why inspect an axis scale? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)

Life Skills — Home hazards and preparedness

Read before you begin

Preparedness identifies safe routes, contacts, hazards, and supplies before an emergency. Plans should fit the home and local risks. Practice with an adult without creating a real hazard.

1. Why choose a meeting place beforehand? (2 points)

2. Show one piece of this week's work and explain one correction or improvement. (2 points)
