Grade 4 — Module assessment — Module 8 Week 4

Date: 2027-06-18

Eight-subject review of taught work; practical evidence may replace a written response. Friday remains flexible.

Math — Measurement word problems

1. Convert 5 m to cm. (1 points)

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

ELA — Conventions and word-study editing

1. Write a short response to today’s Khan reading or grammar lesson. Include a specific example. (3 points)

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Physical Sciences — Engineering: reduce hazard/erosion impact

1. Why compare more than one erosion-control design? (1 points)

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Social Studies — Regions project presentation

W4 background: It organizes evidence into a coherent explanation or comparison. Sources/groupings/measurements can have limits. This is an assessment background note written for this packet, not an actual historical primary-source quotation.

1. Plan a regional-project presentation. (3 points)

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Art — Exhibitions and curation

Read before you begin

Curation selects and arranges works to communicate ideas. Labels explain context and attribution. Selection itself creates an interpretation.

1. What does a curator do? (2 points)

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Life Sciences — Change in communities

Read before you begin

Communities change through migration, invention, conflict, cooperation, and environmental conditions. A timeline shows sequence, but sequence alone does not establish cause. Consider multiple explanations.

1. Does happening first prove causation? (2 points)

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Computer Science — Project testing

Read before you begin

A finished project should meet stated requirements and handle ordinary and unusual inputs. Record failures honestly and retest fixes. One success does not establish universal correctness.

1. Does one successful run prove universal correctness? (2 points)

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)

Life Skills — Repair, reuse, and evaluation

Read before you begin

Repair and reuse can conserve materials when an item remains safe and fit for use. A cosmetic patch is not necessarily a structural repair. Evaluate the function as well as appearance.

1. Does looking repaired guarantee safety? (2 points)

2. Select evidence from two different weeks of this module. Explain a concept or practical skill and one improvement. (2 points)
